Foreword: From Cybernetics to Cybersemiotics xvii

MARCEL DANESI

Introduction: The Quest of Cybersemiotics 3

- I.1 Subject Matter and Aims 3
- I.2 Approach to Writing and Developing the Argument 14
- I.3 Technical Points 15
- I.4 Acknowledgments 18
- I.5 The Book's View of the Subject Area and Cybersemiotics:
A Summary 20

1 The Problems of the Information-Processing Paradigm as a Candidate for a Unified Science of Information 35

- 1.1 The Conflict between Informational and Semiotic Paradigms 35
- 1.2 Wienerian: Pan-Information 37
- 1.3 Peircean-Based Pan-Semiotics 41
- 1.4 The Document-Mediating System 44
- 1.5 The Technological Impetus for the Development of Information Science 47
- 1.6 The Development of the Information Processing Paradigm in Cognitive Science 51
- 1.7 Critique of the Objective Concept of Information in the Information Processing Paradigm 59
- 1.8 The Problem of Language as the Carrier of Information in Document-Mediating Systems 69

- 1.9 LIS: The Science of Document-Mediating Systems 75
- 1.10 The Cognitive Perspectives Opening towards a Cybersemiotic Concept of Information in LIS 78
- 1.11 Aspects That Must Be Further Developed in the Framework of the Cognitive Viewpoint 80
- 1.12 Analysing the Possibility of an Information Science 81
- 1.13 The Cybernetic Turn 84
- 1.14 Peirce's New List of Categories as the Foundation for a Theory of Cognition and Signification 94
- 1.15 Conclusion 100
- 2 The Self-Organization of Knowledge: Paradigms of Knowledge and Their Role in Deciding What Counts as Legitimate Knowledge 103**
 - 2.1 Introduction 103
 - 2.2 Science and the Development of World Formula Thinking 104
 - 2.3 Objectivist Metaphysics 106
 - 2.4 The Turn Away from an Externalist towards an Internalist Realism 116
 - 2.5 Developing a Framework to Understand the Relationships among the Sciences and Other Types of Knowledge 119
 - 2.6 The Role of the Biology of Embodied Knowledge 130
 - 2.7 A Suggestion for a Transdisciplinary Framework for the Conception of Knowledge 137
- 3 An Ethological Approach to Cognition 147**
 - 3.1 Overview 147
 - 3.2 The Ethological Research Program 150
 - 3.3 A Selective Historical Summary of the Ethological Science Project 153
 - 3.4 The Necessity of a Galilean Psychology 158
 - 3.5 Reventlow's Theoretical and Methodological Background 160
 - 3.6 The 'Rependium': An Attempt to Construct a Fundamental Galilean Concept in Psychology 165
 - 3.7 Limitations to a Galilean Psychology 169
- 4 Bateson's Concept of Information in Light of the Theory of Autopoiesis 174**
 - 4.1 The Pattern That Connects 174
 - 4.2 Mind, Information, and Entropy 177
 - 4.3 Autopoiesis, Mind, and Information 179

- 4.4 The Limits of 'Bring-Forth-ism' 181
- 4.5 Information and Negative Entropy 185
- 4.6 The Problems of Order and Chance in Physics 187
- 4.7 A Philosophical Reflection on the Concept of Reality in Second-Order Cybernetics 194
- 4.8 On Matter and the Universe as the Ultimate Reality 199
- 4.9 Conclusions 204
- 5 A Cybersemiotic Re-entry Into von Foerster's Construction of Second-Order Cybernetics 207**
 - 5.1 Introduction 207
 - 5.2 From First- to Second-Order Cybernetics 207
 - 5.3 The Ontology of Constructivism and Its Concept of Knowledge 210
 - 5.4 Luhmann's Theory of Socio-Communicative Systems 234
 - 5.5 Semiosis and Second-Order Cybernetics 252
 - 5.6 Cybersemiotics 261
- 6 Foundations of Cybersemiotics 264**
 - 6.1 The Complexity View 264
 - 6.2 Peirce's Philosophical Framework for Semiotics 268
 - 6.3 One, Two, Three ... Eternity 271
 - 6.4 Sign Trigonometries and Classes 276
 - 6.5 The Ten Fundamental Sign Classes 280
 - 6.6 The Usefulness of Peirce's Approach in LIS 284
 - 6.7 Indexing in Light of Semiotics 291
- 7 Cognitive Semantics: Embodied Metaphors, Basic Level, and Motivation 295**
 - 7.1 Cognitive Semantics 295
 - 7.2 Basic-Level Categorization 298
 - 7.3 Kinaesthetic Image-Schemas 302
 - 7.4 Metaphors, Metonymy, and Radial Structures 303
 - 7.5 Idealized Cognitive Models 305
 - 7.6 The Concept of Motivation in the Theory of Embodied Cognitive Semantics 307
- 8 The Cybersemiotic Integration of *Umweltlehre*, Ethology, Autopoiesis Theory, Second-Order Cybernetics, and Peircean Biosemiotics 312**
 - 8.1 The Mechanistic Quest for Basic Order 312

8.2	The Biological-Evolutionary View of the Roots of Cognition	313
8.3	The Cybernetics Theory of Information and Cognition	325
8.4	Luhmann's Generalization of the Theory of Autopoiesis	328
8.5	The Relevance of Peirce's Semiotics as a Framework for Biosemiotics	331
8.6	Living Systems as the True Individuals of the World	336
8.7	The Integration of Second-Order Cybernetics, Cognitive Biology (Autopoiesis), and Biosemiotics	338
8.8	Signification Spheres as <i>Umwelten</i> of Anticipation	342
8.9	The Ethological Model of Motivated Cognition Based on a Theory of Feeling	344
8.10	The Ecosemiotics Perspective	349
9	An Evolutionary View on the Threshold between Semiosis and Informational Exchange	352
9.1	Introduction	352
9.2	The Explanatory Quest of the Sciences since Religion Lost Power	358
9.3	Critique of Current Approaches	366
9.4	The Peircean Theory of Mind	371
9.5	Uniting System Science and Semiotics in a Theory of Evolution and Emergence	381
10	The Cybersemiotic Model of Information, Signification, Cognition, and Communication	392
10.1	The Cybersemiotic View of Cognition and Communication	392
10.2	Pheno-, Thought-, Endo-, and Intra-semiotics	395
10.3	The Cybersemiotic Model of Biosemiotics	399
10.4	Peirce and Luhmann from a Cybersemiotic Perspective	402
11	LIS and Cybersemiotics	415
11.1	Indexing and Idealized Cognitive Models	415
11.2	The Need for an Alternative Metatheory to the Information Processing Paradigm in the LIS Context	417
11.3	Indexing and Significance Effect	420

12 Summing Up Cybersemiotics: The Five-Level Cybersemiotic Framework for the Foundation of Information, Cognition, and Communication	425
12.1 Introduction	425
12.2 The Problem of Meaning	429
12.3 Mind and Reality	433
12.4 The Role of Information	435
12.5 Abduction as a Meaningful Rationality	436
12.6 Summary	437
 <i>Notes</i>	 441
