

Table of contents

Acronyms and abbreviations	11
Executive summary	15
Chapter 1. Overview of inequality trends, key findings and policy directions	19
1.1. Introduction and key findings	20
1.2. Inequality increased in good times, and it continued increasing in bad times	23
1.3. Higher inequality drags down economic growth	26
1.4. Why increased non-standard work can lead to more inequality	28
1.5. Tackling job and wage discrimination of women will boost growth and equality	32
1.6. Wealth concentration widens disparities further and limits investment opportunities for many	34
1.7. Designing sustainable policy packages to promote equality of opportunities	36
Notes	51
References	52
<i>Annex 1.A1. Key indicators of income inequality and poverty</i>	<i>55</i>
Chapter 2. The impact of income inequality on economic growth	59
2.1. Introduction and key findings	60
2.2. How inequality may affect economic growth	60
2.3. The impact of inequality on growth	63
2.4. Inequality, social mobility and human capital accumulation	71
2.5. Conclusion	79
Notes	81
References	85
<i>Annex 2.A1. Estimating the inequality, social mobility and growth nexus</i>	<i>91</i>
Chapter 3. Income inequalities during the crisis and fiscal consolidation	101
3.1. Introduction and key findings	102
3.2. Income inequality continued to increase through the crisis	103
3.3. Income poverty increased, no matter how it is measured	109
3.4. Taxes and benefits cushioned the impact of the crisis on household income, but mostly during the first years	114
3.5. Tax-benefit measures during the crisis: A summary of detailed analyses of ten countries	116
3.6. Conclusion	128
Notes	130
References	131

Chapter 4. Non-standard work, job polarisation and inequality	135
4.1. Introduction and key findings	136
4.2. A snapshot of non-standard work	138
4.3. The role of non-standard employment in overall employment growth and job polarisation	143
4.4. Wage gaps between standard and non-standard workers and their impact on the distribution of earnings	152
4.5. The impact of non-standard work on household income and poverty	170
4.6. The role of taxes and benefits with regard to non-standard work	179
4.7. Conclusion	188
Notes	191
References	194
<i>Annex 4.A1. Measuring job polarisation</i>	199
<i>Annex 4.A2. Data sources for Sections 4.4 and 4.5</i>	201
<i>Annex 4.A3. Additional tables and figures</i>	203
<i>Annex 4.A4. Tax-benefit simulations</i>	207
Chapter 5. Women, work and income inequality	209
5.1. Introduction and key findings	210
5.2. Trends in employment and earnings gaps between men and women	211
5.3. Trends in individual earnings inequality among male and female workers	214
5.4. From individual to household earnings and the income distribution	217
5.5. Conclusion	226
Notes	227
References	228

<i>Annex 5.A2. Decomposition of individual earnings inequality by subgroup</i>	234
<i>Annex 5.A3. A counterfactual decomposition analysis of changes in income inequality</i>	236
Chapter 6. How does the concentration of household wealth compare across countries?	239
6.1. Introduction and key findings	240
6.2. The distribution of household wealth across OECD countries	241
6.3. Demographic characteristics of households with positive wealth	256
6.4. The composition of assets	260
6.5. The incidence of debt and over-indebtedness	266
6.6. Trends in household wealth since the Great Recession	271
6.7. Conclusion	274
Notes	276
References	279
<i>Annex 6.A1. Methodological features of household wealth data</i>	282
<i>Annex 6.A2. Long-term determinants of private wealth in eight OECD countries</i>	285
<i>Annex 6.A3. Estimations of future pension wealth</i>	288

Chapter 7. Inequality and fiscal redistribution in emerging economies	291
7.1. Introduction and key findings	292
7.2. Inequality trends and policy responses in emerging economies (EEs)	294
7.3. Fiscal policy and income redistribution in Brazil, Chile, Colombia, Indonesia, Mexico, Peru and South Africa	305
Notes	321
References	322
<i>Annex 7.A1. The CEQ project and underlying household survey data</i>	328
<i>Annex 7.A2. Lambert’s conundrum</i>	330
