Tables

1.1. An overview of headline well-being indicators	27
4.A1.1. The determinants of time poverty.	143
5.1. Main dimensions of work and employment quality.	150
5.2. Indicators of job demands and job resources	166
6.1. Classification of environmental assets in the SEEA Central Framework.	181
6.2. Proposed types of measures to monitor the sustainability of well-being over time	197
6.3. Suggested measurement themes and example indicators for measuring the sustainability of well-being over time	198

Figures

1.1. The OECD <i>Better Life Index</i> web application.	18
1.2. The OECD well-being conceptual framework.	21
1.A1.1. Strengths and weaknesses in well-being vary across countries.	34
1.A1.2. Dimensions that count most for overall well-being performance	35
1.A1.3. Correlation between well-being performance and performance dispersion across indicators	35
1.A1.4. Correlation between well-being performance and socio-economic differences in well-being.	36
2.1. Household net adjusted disposable income per capita	39
2.2. Household net financial wealth per capita	40
2.3. Income inequalities	40
2.4. Employment rate	42
2.5. Long-term unemployment rate	42
2.6. Average gross annual earnings of full-time employees in the total economy	43
2.7. Employment rate by educational attainment	43
2.8. Number of rooms per person	44
2.9. People living in dwellings without basic facilities.	46
2.10. Housing expenditure	46
2.11. Life expectancy at birth.	48
2.12. Self-reported health status.	49
2.13. Self-reported health status by disposable income	49
2.14. Employees working long hours	51
2.15. Time devoted to leisure and personal care.	51
2.16. Educational attainment	53
2.17. Education expectancy	54
2.18. Cognitive skills of 15-year-old students	54
2.19. Competencies of the adult population	55
2.20. Cognitive skills of 15-year-old students by socio-economic background	55
2.21. Perceived social network support	57
2.22. Social network support by educational level	57
2.23. Voter turnout	59
2.24. Formal and open consultation processes on rule-making.	60
2.25. Voter turnout by income	61
2.26. Air pollution	63
2.27. Satisfaction with water quality	63

2.28. Satisfaction with water quality by educational level	64
2.29. Intentional homicides	66
2.30. Self-reported victimisation.	66
2.31. Life satisfaction	68
2.32. Life satisfaction by educational level	68
3.1. Trends in real GDP and in real household income during the crisis	73
3.2. Components of household adjusted net disposable income.	75
3.3. Inequality in household market income and disposable income.	76
3.4. Income poverty rates.	77
3.5. Household financial and non-financial wealth.	78
3.6. Housing costs in Europe	79
3.7. Employment and long-term unemployment rate.	80
3.8. Youth and low-skilled workers in the labour market	81
3.9. Discouraged workers and inactive persons	82
3.10. Involuntary part-time workers.	82
3.11. Temporary and permanent employment	83
3.12. Perceived work-family conflict.	84
3.13. Trends in gross annual earnings	85
3.14. Self-reported health.	87
3.15. Unmet medical needs	88
3.16. Subjective well-being and the crisis	89
3.17. Expectations of subjective well-being.	90
3.18. Trust in the wake of the crisis	91
3.19. Civic engagement in Europe.	92
3.20. Capacity to help others.	93
3.21. Informal support	93
3.A1.1. Real GDP per capita and real household net adjusted disposable income	99
4.1. Gender gaps in life expectancy at birth	107
4.2. Gender gaps in self-rated health status and self-reported limitations in daily activities	109
4.3. Gender gaps in years of healthy life	111
4.4. Gender gaps in fields of tertiary education	112
4.5. Gender gaps in employment rates among tertiary-educated individuals.	114
4.6. Gender wage gaps	115
4.7. Gender gaps in job satisfaction	116
4.8. Relative poverty headcount by gender	117
4.9. Relative poverty headcount for single-adult households	119
4.10. Gender differences in time allocated to unpaid and total work.	120
4.11. Ten-year changes in weekly hours allocated to paid and unpaid work.	121
4.12. Time poverty rates for men and women, by presence of children in the household	123
4.13. Gender gaps in social network support when looking for a job and for psychological help in European countries	124
4.14. Proportion of seats held by women in national parliaments	125
4.15. Homicide rates: Levels and gender gaps.	127
4.16. Intimate partner violence against women.	128
4.17. Gender gaps in feelings of security	129

4.18. Gender gaps in life satisfaction	131
4.19. Gender gaps in affect balance	131
5.1. Life satisfaction and labour market status	154
5.2. People marginally attached to the labour force in Europe	156
5.3. Temporary work and job tenure	157
5.4. Job tenure, temporary work and the business cycle	159
5.5. Year-to-year earnings volatility	160
5.6. Unemployment insurance benefits	161
5.7. In-work poverty	163
5.8. Link between job demands, job resources and workers' health in Europe	167
5.A1.1. Job demands, job resources and workers' health	173
5.A1.2. Quality of the work environment in selected European countries	174
6.1. Linking capital stocks, flows and well-being outcomes in the OECD well-being framework	179
6.2. Global premature deaths from selected environmental risks	184
