INTRODUCTION

The State of Research in Primary Geography

15

Simon Catling & Fran Martin

SECTION 1: CHILDREN AND PEDAGOGY

Children's geographical understanding

Children's Understanding of Locality

29

Rachel Bowles

Teaching Places: Developing early understanding of 'nested hierarchies'

43

Colin Storey

Children's Understanding of Rivers: Is there need for more constructivist research in primary geography?

55

Margaret Macintosh

Researching the Development of Children's Environmental Values in the Early School Years

64

Paula Owens

Place Attachment, Place Identity and the Development of the Child's Self-identity: Searching the literature to develop an hypothesis

77

Christopher Spencer

Children's Geographical Understanding: The perception of landscape and sites of representation

86

Ana Francisca de Azevedo

Urban Children's Perceptions of Rural Villages in England

93

Greg Walker

Processes of learning in geography

Computer Supported Collaborative Mapmaking and Children's Talk: Developing a research focus

109

David Owen

10	Geography, Learning and the Brain: An example of literature-based Research <i>Stephen Scoffham</i>	120
11	Education for Sustainable Development and Citizenship through Outdoor Education: Gardening as a focus <i>Peter Bloomfield</i>	129
12	Children's Developing Images and Representations of the School Link Environment <i>Anna Disney</i>	139
13	Mapwork and spatial cognition Small People Thinking about Big Spaces: Young children's navigational use of aerial photographs <i>Beverly Plester</i>	151
14	The Skills Children Use when Encoding and Decoding Spatial Information about the Environment: A case study <i>Di Wilmot</i>	162

SECTION 2: TEACHER DEVELOPMENT.

	Beginning teacher development	
15	Primary Student Teachers' World Map Knowledge <i>Simon Catling</i>	173
16	Knowledge Bases for Effective Teaching: A case study of one beginning teacher's development as a teacher of primary geography <i>Fran Martin</i>	187
17	Student Teachers' Understanding of Locality <i>John Halocha</i>	202
18	Comparing Children's and Adults Understanding of locality <i>Rachel Bowles</i>	211
19	Student Teachers' Attitudes towards Education for Sustainable Development <i>Alison Ryan</i>	225
20	Student Teachers' Perceptions of Geographical Enquiry <i>John Halocha</i>	235

SECTION 3: DEVELOPMENT OF THE SUBJECT.

The state of geography

- 21 Geography Subject Leaders' Perceptions of the State of Primary Geography 245
Simon Catling

- 22 Pupils' Perceptions of Geography: KS2/3 transfer issues 256
Lorraine Harrison & Melanie Norman

- 23 Don't Forget the Trainees: Issues relating to the recruitment of geographers into primary teaching 266
Steve Rawlinson

Resource and curriculum development

- 24 Researching the Development of a Primary Geography Resource: Why, how, issues and implications 281
Jane Graham & Greg Walker

- 25 Developing a Locality Resource Using ICT to Support Staff Development and Primary Children's Geographical Thinking 289
John Moore

CONCLUSION

- 26 Future Developments and Directions for Primary Geography Research 301
Fran Martin & Simon Catling

Ana Francisco de Azevedo teaches in the Departamento de Geografia e Planeamento in the Instituto de Ciências Sociais at the Universidade do Minho, Portugal. She has lectured in education, where she had a particular interest in early years and primary education through children's geographies. However, in 2005 she moved departments to her current post, in which she focuses on the teaching and research in cultural geography. Her research interests lie in the representations of Portuguese landscapes, linking geography, aesthetics and symbolic representations. Working with postgraduate students she has been able to maintain the link with primary education and research children's perceptions of landscape, one outcome of which is the chapter in this book.
