## PART 1

### **Yesterday's children: today's mothers and fathers**

1

#### **1 Cherishing parents**

3

Helping professionals to help parents

4

The Dynamic-Maturational Model of Attachment  
and Adaptation

9

DMM Integrative Treatment

12

Important concepts and terms

13

Notes

13

#### **2 A primer of DMM theory: twelve crucial constructs**

14

The context of life: from genes to culture

14

Developmental possibilities: diversity and change

17

Treatment of maladaptation

20

Conclusions

23

Important concepts and terms

25

## PART 2

### **Growing up**

27

#### **3 Early childhood: learning to be safe at home**

29

Protection, danger, and attachment figures

29

Infancy (birth to 1–2 years)

32

Preschool years (2–5 years of age)

36

Important concepts and terms

47

Note

47

## CONTENTS

<b>4</b>	<b>Going to school: coping with a complex world</b>	<b>48</b>
	School age (approximately 6–12 years)	48
	Issues for children using a compulsive Type A strategy	52
	Issues for children using a coercive Type C strategy	56
	Issues for children using a Type A/C strategy	58
	Adolescence (puberty–16 years)	60
	Important concepts and terms	70
<b>5</b>	<b>Becoming an adult: loving and leaving</b>	<b>71</b>
	Transition to adulthood (16–25 years)	71
	Yesterday's children	86
	Important concepts and terms	87
<b>PART 3</b>		
	<b>Information processing</b>	<b>89</b>
<b>6</b>	<b>Remembering the future: the process of mental representation</b>	<b>91</b>
	Seven transformations of information	91
	Dispositional representations (DRs)	93
	Selection of a dispositional representation upon which to act	103
	Conclusions	104
	Important concepts and terms	105
	Notes	105
<b>7</b>	<b>How do parents affect children's representations?</b>	<b>106</b>
	Representation and protective strategies	106
	Reorganization, trauma, depression, disorientation, and intrusions of forbidden negative affect	111
	How does perception of danger affect behavior?	114
	How do parents' strategies affect children's strategies?	115
	Important concepts and terms	118
<b>8</b>	<b>Representation and childrearing that endangers children</b>	<b>119</b>
	Why parents behave as they do	119
	Interpersonal disorders in children	125
	Assessing transformations of information and DRs	127
	A hypothesis and questions for future research	128
	Conclusions	130
	Important concepts and terms	130

PART 4

**Parents' dispositional representations 131**

**9 Cluster 1 – distortions of normal child-protective behavior: under-responding to children 133**

Inconsistency from mixed dispositional representations (DRs)	134
Inconsistency from competing mother and father DRs	134
Inconsistency from distraction	135
Couples' issues and inconsistency	139
Conclusions about Cluster 1	140
Outcomes	142
Important concepts and terms	143
Note	143

**10 Cluster 2 – distortions of normal child-protective behavior: over-responding to children 144**

Fear of loss: impairments and imagined medical threats	145
Fear of children doing the wrong thing: punishment and child abuse	147
Immigrant populations	153
Outcomes for children	153
Conclusions	154
Important concepts and terms	154

**11 Cluster 3 – distortions of perception: seeing yourself in your child 155**

Comfort me/you: paternal incest	155
Give me sugar: spousification	160
Oh, no! I can't! Mother's compulsive performance and postnatal depression	163
Never again – the long reach of unresolved trauma	167
Conclusions	169
Important concepts and terms	170

**12 Cluster 4 – obscured perceptions: the disappearing child 171**

Depression and insufficient caregiving	172
Unpredictable and changing dangerous parental behavior	175
Triangulating parental behavior	178
Disoriented parental behavior	180
Important concepts and terms	185

<b>13 Cluster 5 – distortions that substitute erroneous information for accurate information: misconstruing children as being threatened</b>	<b>186</b>
Kate and the Cutters: a hard rock in search of balance	187
Perceived on-going threat	190
Child death	197
Understanding Cluster 5	198
Important concepts and terms	201
<b>14 Cluster 6 – distortions that substitute deadly delusional information for accurate information: misconstruing the child as the threat</b>	<b>202</b>
A Type A example	205
A Type C example	210
Child homicide	214
Understanding parents who intentionally kill their children	215
Preventing child deaths	216
Important concepts and terms	221
Note	221
<b>PART 5</b>	
<b>An integrative approach to treatment</b>	<b>223</b>
<b>15 DMM Integrative Treatment with families</b>	<b>225</b>
A rationale for DMM Integrative Treatment	226
Beginning the process of DMM Integrative Treatment with parents	230
Using attachment to promote the goals of therapy	235
Adaptation	242
Important concepts and terms	244
Notes	244
<b>16 When things fall apart</b>	<b>246</b>
Problems in treatment	246
Alternatives to out-of-home placement	260
IASA Family Attachment Court Protocol	261
Foster care and out-of-home placement	263
Research to learn what we do not now know	265
Important concepts and terms	266

<b>17 Assessment that is r</b>	
What sort of assessment	
What we need to know	
What is assessment?	
Assessing attachment a
