|------------------------------------------------------|----|
| ABOUT THE AUTHOR.....                                | 4  |
| 1 INTRODUCTION .....                                 | 5  |
| 2 THERMAL ENERGY STORAGE .....                       | 6  |
| 2.1 Energy Storage Density.....                      | 7  |
| 2.2 Phase Change Materials .....                     | 8  |
| 2.3 Compact storage modules .....                    | 9  |
| 3 AIR SOLAR COLLECTOR WITH LATENT HEAT STORAGE ..... | 10 |
| 3.1 Climatic chamber experiments.....                | 12 |
| 3.2 Numerical simulations.....                       | 16 |
| 3.3 Results .....                                    | 20 |
| 4 HEAT STORAGE IN SOLAR AIR HEATING .....            | 21 |
| 4.1 Experimental heat storage unit.....              | 22 |
| 4.2 Experimental investigations .....                | 23 |
| 4.3 Numerical investigations.....                    | 24 |
| 4.4 Results and discussion.....                      | 25 |
| 5 CONCLUSIONS .....                                  | 30 |
| ABSTRACT .....                                       | 34 |
