

Contents

Preface/1

PART I

1. The Information Society

The Internet/5

The Information Society/7

The National Information Infrastructure (NII)/9

2. The Scope of Digital Libraries

The History of Traditional Libraries/13

Critical Issues of Traditional Libraries/16

The Scope of Digital Libraries/17

Social Impacts of Digital Libraries/19

PART II

3. A Framework of Digital Libraries

Why A General Framework?/23

The Information Encapsulation Principle/24

Why Digital Objects?/26

An Object-Oriented Framework/34

The Dynamic Model: Object-Oriented Analysis/40

Basic Library Operations: Functional Mappings/42

Basic Library Operations: Intelligent Agents/44

Six Supporting Infrastructures/45

4. Digital Objects

Digital Objects in Perspectives/49

Digital Publishing/49

Client/Server Architectures: Compound Documents and Component Software/57

Merging WWW and Client/Server: Networked Objects/63

Multimedia Objects/66

The Richness of Physical Objects in Digital Museums/70

Complex Geographic Footprints/71

A Killer Application: Temporal Digital Objects?/72

5. Basic Library Operations

- Basic Library Operations/75
- Information Indexing/77
- Information Access/85
- Information Organization/92
- Information Utilization/95

PART III

6. The Communication Infrastructure

- Interoperability/97
- Global Naming/99
- Distributed Search and Resource Discovery/101
- Meta Information for Global Naming/102
- Federated Distributed Repositories/103
- The Communication Infrastructure/105

7. The Semantics Infrastructure

- The IITA Workshop/107
- A Dilemma – User Serendipity, Information Complexity, and Interoperability/108
- The Semantics Infrastructure/110
- Meta Information: Indexing the Internet and Digital Libraries/112
- The Dublin Metadata Core/113
- MAKERS (Metadata Knowledge Representation Scheme)/115
- Design Rationales of MAKERS/119
- The Promise of Intelligent Agents/122
- Semantics of Basic Library Operations: Intelligent Agents/124

8. The Protection Infrastructure

- Copyright in Digital Libraries/125
- Digital Watermarking, Encryption, and Signature/128
- Information Security: Inter-Domain Authorization/129
- Billing in Digital Libraries/133

9. The Preservation Infrastructure

- Information Coding/139
- Interoperability of Computer, Media, and Storage/139

Storage of Multimedia Information/141
The Reality of CD-ROM's/142
Storage Hardware Technologies/143
NSL (National Storage Laboratory)/144

10. The User Infrastructure

Who Are the Users?/149
Usability and User Needs/151
The Interaction Model of Digital Libraries/153
Design Methodology for User-Centered Digital Libraries/155
Information Seeking: Planning/158
Information Seeking: Task Analysis/160
Information Seeking: Evaluation/161
User Serendipity/163

11. The Collaboration Infrastructure

The Collaboration Infrastructure/167
The Shared Workspace/169
Shared Objects/170
The ComMentor Annotation System/176
A General Indexing Scheme for Shared Objects/178
Semantics in Collaboration: Self-Organization/183

PART IV

12. The NSF/DARPA/NASA Initiative

Some Important Initiatives/187
The NSF/DARPA/NASA Initiative/187
The Six Projects: An Initial Account/191
Final Results and Phase II /199

References/203

Index/211

INDEX

- ACM Interim Copyright Policy, 126
- Automatic link generation, 55
- Basic library operation, 36, 75
- BC (Bounded Convex) directory tree, 178
- Billing in digital libraries, 133
- Carnegie Mellon University, 67, 191, 195
- CD-ROM, 142
- Client/server architecture, 57
- CNRI handle system, 99
- Collaboration infrastructure, 48, 167
- Collaboration technology, 167
- ComMentor Annotation System, 170, 176
- Communication infrastructure, 47, 97, 105
- Complex geographic footprints, 71
- Complex object, 36
- Component software, 57
- Compound document, 57
- Conceptual clustering, 111
- Conceptual graph, 111
- Content object, 81
- Content-based indexing, 81
- Copyright laws and billing policies, 134
- Copyright, 125
- CORBA (Common Object Request Broker Architecture), 58
- CSCW (Computer-Supported Cooperative Work), 73, 169
- CSDGM (Content Standards for Digital Geospatial Metadata), 72
- Design methodology for user-centered digital libraries, 155
- Dictionary construction, 77
- Digital encryption, 129
- Digital libraries, 13, 17
- Digital object, 26, 49
- Digital publishing, 49
- Digital signature, 129
- Digital watermarking, 128
- Direct file, 92
- Distributed information access, 89
- Distributed information repositories, 18
- Distributed search and resource discovery, 101

DOM (Document Object Model), 53
 DTD (Document Type Definition), 51
 Dublin Metadata Core, 113
 Dublin Metadata Workshop, 113
 Dynamic model, 40
 Electronic commerce, 20
 Execution-evaluation cycle, 154
 Federating distributed objects, 90
 Federating distributed repositories, 103
 FGDC (Federal Geographic Data Committee), 71
 Framework of digital libraries, 23
 Functional mapping, 42
 Functional model, 42
 GII (Global Information Infrastructure), 5
 Global naming, 99
 HPSS (High Performance Storage System) Project, 144
 HTML (Hypertext Markup Language), 50
 Hypertext, 53
 HyTime (Hypermedia/Time-Based Structuring Language), 51
 IITA Workshop, 107
 Index object, 79
 Indexing and organizing scheme for shared objects, 178
 Indexing of segment time tree structure, 182
 Indexing server of shared objects, 175
 Information access, 39, 75, 85
 Information acquisition and collection, 36, 75
 Information base, 34
 Information brokerage and filtering, 88
 Information brokerage and integration, 36
 Information coding, 139
 Information communication and transmission, 36, 75
 Information complexity, 108, 164
 Information conversion and transformation, 36, 75
 Information delivery and presentation, 36, 75
 Information dissemination and utilization, 36, 75
 Information element, 142
 Information encapsulation principle, 24, 26
 Information indexing and organization, 36, 75
 Information indexing theory, 82
 Information organization, 92

- Information security, 129
- Information seeking, 151
- Information seeking: Evaluation, 161
- Information seeking: Planning, 158
- Information seeking: Task analysis, 160
- Information society, 5, 7
- Information unit, 142
- Information utilization, 95
- Intelligent agent, 44
- Interaction model, 153
- Inter-domain authorization, 129
- Internet, 5
- Internet-2 or NGI (Next Generation Internet), 28
- Interoperability, 97
- Inverted file, 93
- Landmark, 172
- Language and content analysis, 77
- Life cycle of information, 18
- Linear associative mapping, 76
- Machine learning, 56
- MAKERS (Meta Knowledge Representation Scheme) 115, 119
- Meta Information, 112
- MPEG format conversion, 29
- Multimedia object, 66
- National Digital Library Program, 187
- NCSA (National Center for Supercomputing Applications), 111
- NCSTRL (Networked Computer Science Technical Report Library), 90
- Networked digital object, 31
- Networked information system, 18
- NII (National Information Infrastructure) 5, 9
- Nonlinear structure of multimedia object, 67
- NREN (National Research and Educational Network), 5
- NSF/DARPA/NASA Research on Digital Libraries Initiative Phase II, 200
- NSF/DARPA/NASA Research on Digital Libraries Initiative, 187
- NSL (National Storage Laboratory), 144
- Object-oriented analysis, 40
- Object-oriented technology, 24
- OCLC (Online Computer Library Center), 113
- Physical object, 70
- Preservation Infrastructure, 48, 139

- Protection Infrastructure, 47, 125
- Query object, 85
- RAID technology, 143
- Scope of digital libraries, 17
- Semantics in collaboration, 183
- Semantics infrastructure, 47, 107, 110
- SGML (Standard Generalized Markup Language), 50
- Shared object, 170
- Shared workspace, 169
- Social impacts of digital libraries, 19
- Stanford University, 194, 199
- Storage hardware, 143
- Storage of multimedia information, 141
- Structured document, 50
- Supporting infrastructure, 45
- System-centered library, 151
- TEI (Text Encoding Initiative), 187
- Temporal digital object, 72
- Third party payment and collection, 136
- Tour, 175
- Traditional libraries, 13, 16
- Trail of shared objects, 172,175
- U.S. Library of Congress, 71, 187
- University of California – Berkeley, 192, 196
- University of California - Santa Barbara, 193, 197
- University of Illinois - Urbana/Champaign, 193, 197
- University of Michigan - Ann Arbor, 194,198
- Usability and user needs, 151
- User community, 150
- User group, 149
- User infrastructure, 48, 149
- User organization, 150
- User serendipity, 163
- User/system/information interaction model, 153
- User-centered information access, 86
- User-centered library, 151
- USMARC (US MACHine-Readable Catalog), 71
- Video object, 67
- Vocabulary expansion, 86
- Vocabulary feedback, 86
- WWW (World-Wide Web), 6

XML (eXtensible Markup Language), 50,53
Z39.50, 72
