

# Making Sense

## A Student's Guide to Research and Writing

An indispensable guide for students in all areas of geography and environmental sciences—from cultural, human, and political geography to the geological sciences and environmental studies—the fifth edition of *Making Sense in Geography and Environmental Sciences* offers up-to-date, detailed information on

- documenting sources using the latest CSE, APA, and MLA guidelines
- writing essays, lab reports, and field reports
- creating powerful visual aids: maps, tables, diagrams, graphs, and posters
- using computer-generated images and graphic presentation software
- writing with clarity, force, and precision
- researching and evaluating Internet sources
- keeping up to date with new developments in technology-based research
- avoiding plagiarism while conducting research
- eliminating problems with grammar, punctuation, and usage
- preparing for tests and exams
- doing presentations and group work

**MARGOT NORTHEY** is a specialist in communications and the former dean of the School of Business at Queen's University. **DAVID B. KNIGHT** is a geographical research and performance consultant and a former professor of geography at Carleton University and the University of Guelph. **DIANNE DRAPER** is a professor of geography at the University of Calgary.
