

CONTENTS

Addresses of the authors	VIII
Preface: JOHN A. MATTHEWS, DENYS BRUNSDEN & BURKHARD FRENZEL	XI
Holocene and historical records of landslide activity in mountain areas of Europe	
GERHARD ABELE: Influence of glacier and climatic variation on rockslide activity in the Alps	1
THEO W. J. VAN ASCH: The temporal activity of landslides and its climatological signals	7
MARIO PANIZZA, ALESSANDRO PASUTO, SANDRO SILVANO & MAURO SOLDATI: Landsliding during the Holocene in the Cortina d'Ampezzo region, Italian Dolomites	17
GIULIANO RODOLFI: Holocene mass movement activity in the Tosco-Romagnolo Apennines (Italy)	33
FRANCO MANTOVANI: The frequency of large landslides in the eastern Alps	47
JOSÉ MOYA, JOAN MANUEL VILAPLANA & JORDI COROMINAS: Late Quaternary and historical landslides in the south-eastern Pyrenees	55
STEFAN W. ALEXANDROWICZ: Holocene dated landslides in the Polish Carpathians	75
Holocene and historical records of landslide activity in Mediterranean and eastern Europe	
JOHN THORNES: Mass failure and climate change in a Mediterranean climate: the case of the Sierra Nevada, south-east Spain	85
MARINO SORRISO-VALVO: Landsliding during the Holocene in Calabria, Italy	97
ÁGOSTON JUHÁSZ: Landslides and climate in Hungary	109
DAN BĂLTEANU: Mass movements and climate in Romania	127
JAN KALVODA, JIŘÍ ZVELEBIL & VÍT VILÍMEK: Geomorphological history and monitoring of selected rapid mass movements in north-western Bohemia	137
ADAM KOTARBA & MARIA BAUMGART-KOTARBA: Holocene debris-flow activity in the light of lacustrine sediment studies in the High Tatra Mountains, Poland	147

Climatic and other causes of landslide activity in north-western and coastal Europe

JÖRG GRUNERT & ULRIKE HARDENBICKER: The frequency of landsliding in the north Rhine area and possible climatic implications 159

MAIA-LAURA IBSEN & DENYS BRUNSDEN: Mass movement and climatic variation on the south coast of Great Britain 171

OLIVIER MAQUAIRE: The frequency of landslides on the Normandy coast and their behaviour during the present climatic regime 183

COLIN K. BALLANTYNE: Holocene rock-slope failures in the Scottish Highlands 197

SUSAN M. BROOKS: Modelling the role of climatic change in landslide initiation for different soils during the Holocene 207

Debris flow and avalanche records and climate in the Alps and northern Europe

HORST STRUNK: A 3300 years history of debris-flow activity in the southern Alps: vegetation cover, soil depth, forest fire and overgrazing as controlling factors 223

JOHN L. INNES: Historical debris-flow activity and climate in Scotland 233

MARTIN LATERNER & CHRISTIAN PFISTER: Avalanches in Switzerland 1500-1990 241

Debris flows, snow avalanche records and climate in the Arctic and Scandinavia

CHRISTER JONASSON, ROLF NYBERG & ANDERS RAPP: Dating of rapid mass movements in Scandinavia: talus rockfalls, large rockslides, debris flows and slush avalanches 267

BRIAN H. LUCKMAN & CATHERINE J. FISKE: Holocene development of coarse-debris landforms in the Canadian Rocky Mountains 283

LARS HARALD BLIKRA & ATLE NESJE: Holocene avalanche activity in western Norway: chronostratigraphy and palaeoclimatic implications 299

DANNY MCCARROLL & JOHN A. MATTHEWS: Using the 'Little Ice Age' to define transfer functions between climate and rapid mass movements: the example of snow avalanche activity in western Norway 313

FRODE SANDERSEN: The influence of meteorological factors on the initiation of debris flows in Norway 321

Broader perspectives and relationships with other programmes

MICHAEL CROZIER: The climate-landslide couple: a Southern Hemisphere perspective 333

OLGA SOLOMINA: Holocene rapid mass movement in the former USSR: avalanches and mudflows 355

DAVID M. CRUDEN: Rapid mass movement and climate: a North American perspective 371

OKSANA S. SAVOSKUL: Variations in debris-flow activity in the Aksay valley, Kirgizskiy ridge, Central Asia 379

LESZEK STARKEL: Mass movements during the Holocene: the Carpathian example and the European perspective 385

DENYS BRUNSDEN & MAIA-LAURA IBSEN: The temporal occurrence and forecasting of landslides in the European Community: summary of relevant results of the European Community EPOCH Programme 401

Synthesis and conclusion

MARK S. BERRISFORD & JOHN A. MATTHEWS: Phases of enhanced rapid mass movement and climatic variation during the Holocene: a synthesis 409

Periodical title abbreviations 441
