

CONTENTS

Addresses of the authors	VII
Preface: MARIE-JOSÉ GAILLARD & BJÖRN E. BERGLUND	IX
SHINYA SUGITA: Modelling pollen representation of vegetation	1
KARIN DAMBACH: An attempt to quantify land surfaces cleared of forests by means of pollen analysis in southern Central Europe	17
MARIE-JOSÉ GAILLARD, H. JOHN B. BIRKS, MARGARETHA IHSE & SIV RUNBORG: Pollen/landscape calibrations based on modern pollen assemblages from surface-sediment samples and landscape mapping - a pilot study in South Sweden	31
SHEILA HICKS: Fields, boreal forests and forest clearings as recorded by modern pollen deposition	53
BENT V. ODGAARD & PETER RASMUSSEN: The use of historical data and sub-recent (A.D. 1800) pollen assemblages to quantify vegetation/pollen relationships	67
W. O. VAN DER KNAAP & JACQUELINE F. N. VAN LEEUWEN: Calibration of forest cover based on pollen in surface sediments of 25 Swiss lowland lakes north of the Alps	77
MIROSLAV MAKOHONIENKO, MARIE-JOSÉ GAILLARD & KAZIMIERŻ TOBOLSKI: Modern pollen/land-use relationships in ancient cultural landscapes of north-western Poland, with an emphasis on mowing, grazing, and crop cultivation	85
KARL-DAG VORREN, UNN TVERAABAK & CHRISTIN JENSEN: Empirical data on the modern pollen/vegetation relationships from northern Norway	103
JAMES GREIG: Modern pollen rain studies for the interpretation of vegetation types from pollen analyses in England - a short report	119
Discussion Issues	
SHINYA SUGITA, SVEND T. ANDERSEN, MARIE-JOSÉ GAILLARD, JOSÉ MATEUS, BENT V. ODGAARD, I. COLIN PRENTICE & KARL-DAG VORREN: Modelling and data analysis for the quantification of forest clearance signals in pollen records	125
BJÖRN E. BERGLUND, BURKHARD FRENZEL, JACQUES-LOUIS DE BEAULIEU, URSULA HUCKRIEDE & W. O. VAN DER KNAAP: Quantification priorities	133

VI

URBAN EMANUELSSON, JAMES GREIG, LEIF BJÖRKMAN, MIROSLAV MAKOHONIENKO & JACQUELINE F. N. VAN LEEUWEN: The selection of modern analogues of former land uses	135
SHEILA HICKS, ELIZAVETA BOŽILOVA, KARIN DAMBACH, RUTH DRESCHER-SCHNEIDER & MAŁGORZATA LATAŁOWA: Sampling methodologies for the collection of modern pollen data and related vegetation and environment	141
ALL WORKSHOP PARTICIPANTS: Workshop recommendations and future research collaboration	145
Periodical title abbreviations	148
