1 Gradable and non-gradable adjectives: preliminary description	1
1.1 The adjective as a grammatical category	1
1.2 Gradability	3
1.3 Types of scales	5
1.4 Relativity	8
1.5 The marked/unmarked opposition	13
1.6 Numerical and non-numerical adjectives	15
2 Comparatives and positives	23
2.1 Form relativity and scale relativity	23
2.2 Problems of derivation of comparatives	25
2.3 Problems of interpretation of the positive-degree form	27
2.4 Set-theoretical interpretation of relative adjectives	33
3 Typology of sentences with gradable adjectives in predicative function	42
3.1 Introductory remarks	42
3.2 Non-comparative sentences	42
3.3 Comparative sentences	43
3.3.1 General description	43
3.3.2 Comparative sentences of linear difference	44
3.3.2.1 'Aer than' sentences	44

3.3.2.2	'Less <i>A</i> than' sentences	45
3.3.2.3	'Aest' sentences	46
3.3.3	Comparative sentences of proportionality ('as <i>A</i> as' sentences)	47
3.4	Pseudo-comparative sentences	48
3.5	Subclassification of sentence types	49
4	Elicitation tests	58
4.1	General information	58
4.2	Description of test items	59
4.3	The results and their interpretation	65
5	Non-comparative sentences with gradable adjectives in predicative function	68
5.1	Type A sentences: positive statements	68
5.1.1	Open-scale, primary numerical antonymic pairs	68
5.1.2	Open-scale, secondary numerical antonymic pairs	75
5.1.3	Bounded-scale antonymic pairs	75
5.1.4	Asymmetric antonymic pairs and quasi-antonymic pairs	77
5.2	Type A sentences: negative statements	77
5.3	Type B sentences: positive statements	78
5.3.1	Open-scale antonymic pairs	78
5.3.2	Bounded-scale antonymic pairs	81
5.3.3	Asymmetric antonymic pairs	82
5.3.4	Quasi-antonymic pairs	83
5.3.5	Unary-scale adjectives	83
5.4	Type B sentences: negative statements	84
5.5	Non-comparative forms of gradable adjectives used in attributive function	86
6	Comparative sentences of linear difference: 'Aer than' sentences	88
6.1	Introduction	88
6.1.1	'Aer' and 'more <i>A</i> ' comparatives: corpus evidence	88
6.1.2	'Aer than' sentences: general description	89
6.2	Sentences with members of open-scale antonymic pairs: positive statements referring to one dimension	92
6.2.1	The difference between the values of the M_D not stated numerically (type C sentences)	92
6.2.2	The difference between the values of the M_D stated numerically (type D sentences)	103

6.3 Sentences with members of open-scale antonymic pairs: positive statements referring to two dimensions	106
6.3.1 General description	106
6.3.2 Sentences based on one-argument propositions (types E and F)	108
6.3.3 Sentences based on two-argument propositions (Types G and H)	110
6.4 Sentences with members of open-scale antonymic pairs: negative statements	110
6.4.1 The difference between the values of the M_D not stated numerically (type C sentences)	110
6.4.2 The difference between the values of the M_D stated numerically (type D sentences)	112
6.5 Sentences with members of bounded-scale antonymic pairs	113
6.6 Sentences with asymmetric-scale adjectival pairs	114
6.7 Sentences with quasi-antonymic adjectival pairs and with unary-scale adjectives	118
6.8 Comparative-degree forms of adjectives used in attributive function	124
6.9 Pseudo-comparative 'Aer than' sentences	126
7 Comparative sentences of linear difference: 'less A than' sentences and superlative-degree sentences ('Aest' sentences)	129
7.1 'Less A than' sentences	129
7.1.1 'Less A' phrases and 'less A than' sentences: general discussion	129
7.1.2 'Less A than' sentences with the various types of adjectives	131
7.2 'Aest' sentences	135
7.2.1 Introduction	135
7.2.2 The inflected superlative-degree forms: corpus evidence	135
7.2.3 The periphrastic superlative-degree forms: corpus evidence	136
7.2.4 Semantic interpretation of sentences with superlative-degree forms used in the relative sense	137
7.2.5 Semantic interpretation of sentences with superlative-degree forms used in the absolute sense ('most A' superlatives)	140
7.3 Pseudo-comparative 'less A than' sentences	141

8 Comparative sentences of proportionality ('as A as' sentences)	143
8.1 Introduction	143
8.1.1 'As A as' sentences: general description	143
8.1.2 Corpus evidence	144
8.2 Sentences with members of open-scale antonymic pairs: positive statements referring to one dimension (type R and type S sentences)	145
8.2.1 Introductory remarks	145
8.2.2 Type R and type S sentences with the unmarked members of antonymic pairs	146
8.2.2.1 The value of the ratio between the values of the measure function interpreted as equalling 'approximately n '	146
8.2.2.2 The value of the ratio between the values of the measure function interpreted as 'equal or greater than n ' (or 'equal or less than n ')	153
8.2.3 Type S sentences with the marked members of antonymic pairs	155
8.3 Sentences with members of open-scale antonymic pairs: positive statements referring to two dimensions	157
8.3.1 General description	157
8.3.2 Sentences based on one-argument propositions (types T and U)	158
8.3.2.1 Sentences with the unmarked members of antonymic pairs	158
8.3.2.2 Sentences with the marked members of antonymic pairs	160
8.3.3 Sentences based on two-argument propositions (types V and W)	161
8.4 Sentences with members of open-scale antonymic pairs: negative statements	162
8.5 Sentences with members of bounded-scale antonymic pairs	168
8.5.1 Positive statements	168
8.5.2 Negative statements	170
8.6 Sentences with members of asymmetric-scale adjectival pairs	171
8.7 Sentences with quasi-antonymic adjectival pairs and with unary-scale adjectives	174

8.7.1	Positive statements	174
8.7.2	Negative statements	176
8.8	Pseudo-comparative 'as <i>A</i> as' sentences	178
9	Overview	181
9.1	Factors in the semantic analysis of sentences with gradable adjectives	181
9.2	Coda	190
