

CONTENTS

PART I

INTERNATIONAL BIO LAW TRASCENDING BIOETHICS 15

INTRODUCTION 17

CHAPTER I

THE NECESSARY INTERNATIONAL APPROACH TO BIO LAW. 37

1.1. Introduction. 37

1.2. The International Law contribution to Global Bioethics. 41

1.3. An international objective regime on human embryo re-
search for the benefit of the mankind as a whole 46

1.4. Concluding observations. 58

CHAPTER 2

**HUMAN EMBRYO RESEARCH AND INTERNATIONAL LAW: SOME
ISSUES AT STAKE. 63**

2.1. Introduction 63

2.2. The possibility of establishing an international regulation
on the principle of human dignity and the moral consideration
of human embryo. 64

2.3. The question of fundamental human rights which could
be affected by any international legal frame regulating human
embryo research 76

2.3.1. How fundamental human rights can be protected against the risks of the human embryo research?	76
2.3.2. What is the fair balance to be struck facing other compelling human rights such as the right to health?	81
2.4. Concluding observations.	87

PART II

REGIONAL BIO LAW.	91
---------------------------	----

CHAPTER 3

EUROPEAN LAW AND HUMAN EMBRYONIC STEM CELL RESEARCH: TOO FAR FROM NOWHERE	93
3.1. Introduction.	93
3.2. The European pluralism and a <i>variable geometry</i> in Europe as regards regulation of human embryo research	95
3.2.1. The lack of a European common conception of human life and concerning the beginning of human life as stated by the European Courts	95
3.2.2. The moral clause and its consequences in a European Patent system unsuitable for human embryo research	101
3.3. Public and private interests in reaching an international regulation: the European experience on umbilical cord blood banks.	106
3.4. Concluding observations.	116

CHAPTER 4

INFERRING PRINCIPLES OF INTERNACIONAL BIO LAW CONCERNING BIOMEDICAL RESEARCH ON HUMAN CLONING AND HUMAN EMBRYONIC STEM CELLS	119
4.1. Introduction.	119
4.2. The contribution of the Council of Europe to achieving a European minimum consensus as regards the research in human cloning and Human embryonic stem cells	123

4.2.1. Resolutions of the Parliamentary Assembly and the works of the Committee of Ministers of the Organisation of the Council of Europe	123
4.2. The reports of European Committees of Bioethics.	127
4.3. A principle-based European approach to regulate the research on human cloning and human embryonic stem cells	132
4.3.1. Principles directly applicable to the research and experimentation on human cloning and human embryonic stem cells. . .	135
4.3.2. Principles ruling the patentability of results of research on Human embryos	138
4.4. Concluding observations.	142

PART III

NEW CHALLENGES AHEAD FOR INTERNATIONAL BIO LAW 145

CHAPTER 5

THE BLOOMING PROMISES OF RESEARCH ON HUMAN CELLS RE-PROGRAMMING: THE CASES OF SPAIN AND ANDALUSIA 147

5.1. Introduction.	147
5.2. Biomedical research in Andalusia (Spain): human cells reprogramming through nuclear transfer exclusively for therapeutic purposes.	148
5.3. Somatic embryos versus human embryos. A revival of Dr. Jekyll and Mr Hide?	156
5.4. Concluding observations	163

CHAPTER 6

WAITING FOR GODOT AND FOR LEGAL REGULATION OF IRREDUCIBLE BIOETHICAL PROBLEMS. THE JUDICIAL APPROACH OR THE IMPORTANCE OF BEING EARNEST	167
6.1. Introduction	167

6.2. The European Court of Human Rights' management of a fair balance between legitimate competing interests at stake. . . .	171
6.3. The doctrine of the margin of appreciation and the principle of proportionality as a paradigm to follow at universal level. . . .	174
6.4. Concluding observations	178
FINAL OBSERVATIONS	181
