Contents

	Series Editors' Introduction	**vii**
	Preface	**viii**
	About the Author	**x**
1.	**Bloom's Taxonomy**	**1**
	A Brief History of the Use of Bloom's Taxonomy	2
	Bloom's Taxonomy—A Summary	5
	Problems With Bloom's Taxonomy	8
	Toward a New Taxonomy	9
	Summary	9
2.	**A Theoretical Model**	**10**
	The Three Systems and Knowledge	11
	The Model and Bloom's Taxonomy	12
	Some Empirical Evidence	13
	Summary	14
3.	**The Knowledge Domains**	**15**
	Knowledge as Domains	16
	The Domain of Information	17
	The Domain of Mental Procedures	23
	The Domain of Psychomotor Procedures	26
	Relationship to Bloom's Taxonomy	28
	Summary	28
4.	**The Three Systems of Thinking**	**29**
	Memory	29
	Level 1: Retrieval (Cognitive System)	30
	Level 2: Comprehension (Cognitive System)	33
	Level 3: Analysis (Cognitive System)	38

Level 4: Knowledge Utilization (Cognitive System) 45
Level 5: Metacognition 48
Level 6: Self-System Thinking 50
Revisiting the Hierarchical Nature of the New Taxonomy 54
Taxonomy of Objectives 56
Summary 56

5. The New Taxonomy and the Three Knowledge Domains 59

Level 1: Knowledge Retrieval 59
Level 2: Comprehension 64
Level 3: Analysis 71
Level 4: Knowledge Utilization 83
Level 5: Metacognition 92
Level 6: Self-System Thinking 98
Summary 105

6. Applying the Taxonomy 106

Educational Outcomes 106
As a Structure for Designing a Spiral Curriculum 109
As a Tool for Planning Assessments 115
Epilogue 130
