

Table of Contents

Materials for Machining and Grinding Applications . . . 1

General Guidelines for Selecting Cutting Tool Materials	3
Wrought High-Speed Tool Steels	10
Powder Metallurgy High-Speed Tool Steels	21
Cobalt-Base Alloys	32
Cemented Carbides	36
Cermets	59
Ceramics	67
Coated Carbide, Cermet, and Ceramic Tool Materials	77
Ultrahard Tool Materials	85
Abrasives for Grinding Operations	101

Materials for Metalworking Applications 117

Classification and Properties of Tool and Die Steels	119
Nonferrous Tool and Die Materials	154
Selection of Material for Shearing and Slitting Tools	164
Selection of Material for Blanking and Piercing Dies	168
Selection of Material for Press Forming Dies	174
Selection of Material for Deep Drawing Dies	179
Selection of Material for Spinning Tools	183
Selection of Material for Metalworking Rolls	187
Selection of Material for Thread Rolling Dies	195
Selection of Material for Coining Dies	198
Selection of Material for Cold Heading Tools	201
Selection of Material for Cold Extrusion Tools	204
Selection of Material for Tools for Drawing Wire, Rod, and Tubing	210
Selection of Material for Cold Forging Tools	214
Selection of Material for Hot Forging Tools	218
Selection of Material for Isothermal and Hot-Die Forging Tools	236

Selection of Material for Hot Extrusion and Hydrostatic Extrusion Tools	241
Selection of Material for High-Energy Rate Forming/Forging Tools	245
Selection of Material for Die-Casting Dies	251
Selection of Material for Permanent Molds	259
Selection of Material for Metal Powder Consolidation	266
Selection of Material for Forming Metal-Matrix Composites	268
Selection of Material for Molds for Plastics	274
Selection of Tool Materials for Structural Applications	283

Heat Treatment and Secondary Processing of Tool Materials 291

Introduction to Heat Treating of Tool Steels	293
Furnace Equipment for Heat Treating of Tool Steels	303
Heat Treating of Specific Classes of Tool Steels	312
Control of Distortion in Tool Steels	346
Machining of Tool Steels	352
Welding and Brazing of Tool Steels	377
Surface Engineering of Tool and Die Steels	383

Microstructural Analysis and Failure Analysis of Tool Materials 397

Microstructural Analysis of Tool Steels	399
Microstructural Analysis of Cemented Carbides	415
Failure Analysis of Tools and Dies	421
Wear and Failure Modes for Cutting Tools	443

Index 457
