

# OBSAH

## Úvod

### I. Makulózní projevy

|                       |   |
|-----------------------|---|
| Melanoma malignum     | 7 |
| Pityriasis versicolor | 8 |
| Vitiligo              | 9 |

### II. Papulózní projevy

|                                     |    |
|-------------------------------------|----|
| Angioma senile                      | 10 |
| Basalioma                           | 12 |
| Fibroma durum                       | 12 |
| Lichen (ruber) planus               | 13 |
| Lupus erythematoses discoides (DLE) | 14 |
| Milia                               | 15 |
| Molluscum contagiosum               | 15 |
| Neurodermitis circumscripta         | 16 |
| Pediculosis                         | 16 |
| Psoriasis                           | 18 |
| Scabies                             | 21 |
| Verruca vulgaris                    | 22 |

### III. Nodulární a tumorózní projevy

|                          |    |
|--------------------------|----|
| Absces                   | 23 |
| Borreliový lymfocytom    | 23 |
| Fibroma molle            | 25 |
| Granuloma pyogenicum     | 25 |
| Hemangioma               | 27 |
| Carcinoma spinocellulare | 27 |
| Cornu cutaneum           | 29 |
| Keloid                   | 29 |
| Keratoacanthoma          | 30 |
| Verruca seborrhoica      | 31 |

### IV. Urtikariální projevy

|           |    |
|-----------|----|
| Urticaria | 32 |
|-----------|----|

### V. Vezikulobulózní projevy

|                                  |    |
|----------------------------------|----|
| Dermatitis herpetiformis Duhring | 34 |
| Herpes simplex                   | 34 |

|                        |    |
|------------------------|----|
| Herpes zoster          | 35 |
| Impetigo contagiosa    | 36 |
| Miliaria               | 36 |
| Pemphigoid             | 37 |
| Pemphigus vulgaris     | 38 |
| Pophyria cutanea tarda | 39 |

## **VI. Pustulózní projevy**

|                           |    |
|---------------------------|----|
| Acne vulgaris             | 41 |
| Furunculus et carbunculus | 42 |
| Rosacea                   | 44 |

## **VII. Erytematózní projevy**

|                                      |    |
|--------------------------------------|----|
| Acrodermatitis chronica atrophicans  | 44 |
| Dermatitis contacta irritativa       | 45 |
| Dermatitis perioralis                | 46 |
| Dermatitis seborrhoica               | 47 |
| Dermatitis solaris acuta             | 48 |
| Eczema atopicum                      | 49 |
| Eczema contactum allergicum          | 51 |
| Eczema microbiale (E.nummulare)      | 52 |
| Erysipelas                           | 53 |
| Erythema exsudativum multiforme      | 54 |
| Erythema (chronicum) migrans         | 54 |
| Kandidózy                            | 56 |
| Lupus erythematosus systemicus (SLE) | 59 |
| Mycosis fungoides                    | 61 |
| Polékové exantémy                    | 63 |
| Sclerodermia                         | 64 |
| Tinea corporis                       | 65 |
| Tinea inguinalis                     | 67 |

## **VIII. Skvamózní projevy**

|                          |    |
|--------------------------|----|
| Bowenova dermatóza       | 67 |
| Keratoma senile (solare) | 67 |
| Pityriasis rosea         | 69 |
| Tinea pedum              | 71 |

## **IX. Ulcerující projevy**

|                       |    |
|-----------------------|----|
| Ulcus cruris          | 72 |
| Vascullitis allergica | 75 |
