

CONTENTS

Present Photovoltaics State of Art and Education (IWTPV'16 opening address) <i>V. Benda</i>	5
Using energy of the SUN to drive global education <i>Miro Zeman</i>	10
From nanostructured to nanophotonic solar cells <i>Jean-Michel Nunzi</i>	13
Innovative approaches for hybrid PV system control <i>P. Wolf and J. Včelák</i>	14
New curricula of undergraduate and graduate courses on Photovoltaics at the Czech Technical University in Prague, Faculty of Electrical Engineering <i>V. Benda</i>	17
Solar Radiation Prediction towards the Intelligent Energy Building S. Kaplanis, E. Kaplani	22
About the Solar Cell Materials Laboratory at Obuda Univerity and about the student's contribution in its work Ákos Nemcsics, Gusztáv V. Tényi, Antal Ürmös, Tamás Sándor, Márton Csutorás, Szakolci Hunor	23
Analysis of Photovoltaic Power Station condition Jiří Vaněk , Jakub Mačát, Josef Hylský, Dávid Strachala	27
Temperature changes of I-V characteristics of PV cells P. Kouřim, M. Libra and V. Poulek	31
A low cost electroluminescence system for solar cell laboratory activities based on a commercial digital camera J. A. Silva, K. Lobato, M. S. Frazão and J. M. Serra	35
Degradation in Field-aged Crystalline Silicon Photovoltaic Modules and Diagnosis using Electroluminescence Imaging E. Kaplani	38
Teaching the Ansys Workbench Program M. Janda and K. Jandova,	42
Teaching aid for spectral properties of solar cells R. Nevyhoštěný, P. Hrzina, and J. Holovský	45
PV System Design Course L. Cerna, P. Hrzina, T. Finsterle, T. Reichl	49
Teaching of PV Energy Storage at the Department of Electrotechnology P. Hrzina, T. Reichl, L. Cerna	51
INDEX	53
