Foreword	v
Preface	vii
Section One. Skin as a Habitat	
1 Physical Features	3
2 Nutrient Factors	24
3 Cutaneous Populations	50
Section Two. Microbial Inhabitants of the Skin	
4 The Corynebacteria	79
5 Corynebacteria as Pathogens	100
6 The Micrococcaceae	121
7 Micrococcaceae as Pathogens	144
8 The Streptococci	160
9 The Gram-Negative Bacilli	172
10 Other Cutaneous Bacteria	185
11 The Fungal Flora	206
12 Virus and Mycoplasma	225
13 The Skin Fauna	241

Section Three. Ecology of the Skin

14 Microbiology of Non-Infective Conditions	251
15 Microbiology of Specialised Sites	268
16 Host Factors and their Effect on the Normal Flora	284
17 External Agents and their Effect on the Normal Flora	302
18 Methods for Examining the Skin Flora	316
Appendix. Examples of the Flora of Individual Persons	329
Index	335
