

Contents

Section I

Special Issue

Emerging Technologies for Engineering Education

Guest Editors

Miltiadis D. Lytras—The American College of Greece, Athens, Greece
Wadee Alhalab—King Abdulaziz University, Jeddah, Kingdom of Saudi Arabia
Miguel Jesus Torres Ruiz—Instituto Politécnico Nacional, Mexico City, Mexico
Paraskevi Papadopoulou—The American College of Greece, Athens, Greece
Christina Marouli—The American College of Greece, Athens, Greece

Section II

Contributions in: Student Success, Emotional Intelligence, Coaching, Cognitive Structure, Undergraduate Research, Design Thinking, Innovation, Industrial Design, Service Learning, Underrepresented Students, Professional Careers, Doctoral Education, Self Assessment, Self-Regulated Learning, MOOCs, Faculty Development, Education History, Computer Languages, Robot Programming

Ahmad Ibrahim	1559	Editorial
Miltiadis D. Lytras, Wade Alhalabi, Miguel Jesus Torres Ruiz, Paraskevi Papadopoulou and Christina Marouli	1560–1565	Guest Editorial: Emerging Technologies for Engineering Education: Flexibility, Consistent exploration, Realism, Integration, and Sustainable Development for Active Learning
Ángel Ferreira-Santiago, Cornelio Yáñez-Márquez, Itzamá López-Yáñez, Oscar Camacho-Nieto, Mario Aldape-Pérez and Amadeo-José Argüelles-Cruz	1566–1578	Enhancing Engineering Education through Link Prediction in Social Networks
Inma Rodríguez-Ardura, Antoni Mesguer-Artola and Gisela Ammettler	1579–1585	How do the Experiences of Virtual Presence and Flow Differ? Evidence from Engineering and ICT Online Education
A. M. Artoli and Hassan Mathkour	1586–1595	Model-based Assessment of College Alumni Applied to Computer Engineering and Sciences
Eugenijus Kurilovas and Valentina Dagiene	1596–1603	Computational Thinking Skills and Adaptation Quality of Virtual Learning Environments for Learning Informatics
Athanasios S. Drigas, Marios A. Pappas and Miltiadis Lytras	1604–1610	Emerging Technologies for ICT based Education for Dyscalculia: Implications for Computer Engineering Education
Maria Teresa García-Álvarez, Laura Varela-Candamio and Fernando Rubiera Morollón	1611–1617	Simulation in Software Engineering Education: A System Dynamics Proposal
Eugenijus Kurilovas and Irina Vinogradova	1618–1624	Improved Fuzzy AHP Methodology for Evaluating Quality of Distance Learning Courses
Francesco Colace, Massimo De Santo, Donato Di Stasi and Mario Casillo	1625–1636	An Adaptive Educational Hypermedia System for Supporting Students in their Traditional Learning Process in Computer Engineering Education
Hernan Sagastegui Chigne, Jose Emilio Labra Gayo, María Elena Alva Obeso, Patricia Ordóñez De Pablos and Juan Manuel Cueva Lovelle	1637–1646	Towards the Implementation of the Learning Analytics in the Social Learning Environments for the Technology-Enhanced Assessment in Computer Engineering Education
Amy L. Kaleita, Gregory R. Forbes, Ekaterina Ralston, Jonathan Compton, Darin Wholgemuth and D. Raj Raman	1647–1659	Pre-Enrollment Identification of At-Risk Students in a Large Engineering College
M ^a Luisa Casado, Daniel López-Fernández and Victoria Lapuerta	1660–1678	Socio-Emotional Competencies in Engineering Education
Jingxiao Zhang, Haiyan Xie and Hui Li	1679–1690	Exploring the Cognitive Structure and Quality Elements: Building Information Modeling Education in Civil Engineering and Management
Benjamin Ahn	1691–1703	Applying the Cognitive Apprenticeship Theory to Examine Graduate and Postdoctoral Researchers' Mentoring Practices in Undergraduate Research Settings
Andre Leme Fleury, Henrique Stabile and Marly M. Carvalho	1704–1718	An Overview of the Literature on Design Thinking: Trends and Contributions

V. Pérez-Belis and M. D. Bovea	1719–1731	The Role of Eco-design Education in Influencing the Design of Electrical and Electronic Equipment: A Case Study Involving Industrial Design Engineering Students
Brooke Cannon, Shuchisnigdha Deb, Lesley Strawderman and April Heiselt	1732–1741	Using Service-Learning to Improve the Engagement of Industrial Engineering Students
Allison Godwin, Leidy Klotz, Zahra Harari and Geoff Potvin	1742–1748	Sustainability Goals of Students Underrepresented in Engineering: An Intersectional Study
Abe Zeid and Alexandra Carver	1749–1758	Developing a CAD Portfolio to Advance Engineering Students' Professional Careers
Catherine G. P. Berdanier, Anne Tally, Sara E. Branch, Benjamin Ahn and Monica F. Cox	1759–1773	A Strategic Blueprint for the Alignment of Doctoral Competencies with Disciplinary Expectations
Jhon Jairo Ramírez-Echeverry, Agueda García-Carrillo and Fredy Andres Olarte Dussán	1774–1787	Adaptation and Validation of the Motivated Strategies for Learning Questionnaire—MSLQ—in Engineering Students in Colombia
Jeremi London and Cynthia Young	1788–1800	The Role of Massive Open Online Courses (MOOCs) in Engineering Education: Faculty Perspectives on its Potential and Suggested Research Directions
Jacqueline C. McNeil, Matthew W. Ohland and Catherine E. Brawner	1801–1812	Faculty Perspectives and Institutional Climate for Teaching Quality in Engineering
Piera Centobelli, Roberto Cerchione, Emilio Esposito and Mario Raffa	1813–1822	The Evolution of Engineering Management Education
J. M. Rodríguez Corral, A. Morgado-Estévez, D. Molina Cabrera, F. Pérez-Peña, C. A. Amaya Rodríguez and A. Civit Balcells	1823–1832	Application of Robot Programming to the Teaching of Object-Oriented Computer Languages
	1833	Guide for Authors
