Preface	7
1. Definition of the topic: a study of the morphogenesis of the Himalaya and the Karakoram	9
1.1 The challenge of searching for landform development as the geomorphological record of orogeny	9
1.2 Orography related to geological structure and morphoclimatic processes.	16
2. The geomorphology of the Himalaya in the Chomolongma and Makalu Massifs — Sapt Kosi lowland sector	52
2.1 Morphostructural features and morphoclimatic zones	52
2.2 Landforms	64
2.2.1 The Khumbu Himal	64
2.2.2 The Barun region	83
2.2.3 The Arun valley.	114
2.3 The relative chronology of relief development	122
2.3.1 Pre-Quaternary paleogeographic events.	122
2.3.2 Landform development during the Quaternary.	133
3. The geomorphology of the Karakoram in the Trivor and Lupal Shar Massifs — Hunza valley sector	145
3.1 Morphostructural features and morphoclimatic zones	145
3.2 Landforms	154
3.2.1 The Ghareisa region	154
3.2.2 The western Hispar Mustagh	179
3.2.3 The Hunza valley	198
3.3 The relative chronology of relief development	211

3.3.1	Pre-Quaternary paleogeographic events	211
3.3.2	Landform development during the Quaternary.	218
4.	Relief building during the course of the collision orogeny	235
4.1	The dynamics of formation of landform patterns	235
4.2	Morphogenesis of the Himalaya and the Karakoram during the Quaternary	263
