

METALLURGY

Study of materials based on granulated blast furnace slag activated by solid alkali activators <i>P. Bábková, V. Tomková, V. Matějka</i>	1
Possibilities to increase the lifetime of oxygen converter lining <i>J. Dzuro</i>	2
Preparation and modifications lightweight materials based on granulated blast furnace slag and fly ash <i>H. Eleková, V. Tomková</i>	3
Sampling and utilization of flue gases dry desuphurization by - product from heating plant <i>Z. Gajdorusová, P. Šonovský</i>	4
Investigation of sources of nozzle clogging <i>H. Béla</i>	5
The structures and properties of repairing welds of the AZ91-magnesium alloy <i>T. Chabko, J. Adamiec</i>	6
Ultra-low CO₂ steelmaking: A strong commitment of the steel industry to climate change <i>J. C. Charbonnier</i>	7
Repair welding of gravity cast ZRE1 magnesium alloy <i>A. Kierzek, J. Adamiec</i>	8
Constructing a thermal conductivity measurement device for exothermal insulation materials <i>G. Klančík, J. Medved</i>	9
Steel slag treatment for secondary recovery <i>M. Klárová, P. Hašek</i>	10
The EAF slag as a basic material for the building industry <i>O. Norbert, M. Róbert, G. Oszkar</i>	11
Quality analysis of blast furnace coke <i>L. Pástorová</i>	12
Thermal diffusivity measurement of zirconia and zirconate powders characterization of laser – flash method and LFA427 apparatus <i>A. Rozmysłowska, B. Witala, G. Moskal</i>	13
Reduction possibilities of inclusions with melt treatment in casting Al-Si melts <i>A. Szombatfalvy, J. Dül</i>	14
Microfracturing of rolls in cold rolling mills <i>K. Titz, K. Konečná, M. Špok, M. Tvrđý</i>	15
Molybdenum oxide alloying in production of tool steels <i>J. Turščák, A. Rozman, M. Knap, J. Lamut</i>	16

Determination of heat transfer coefficient and spraying intensity for nozzles of secondary cooling area of CCM	17
<i>M. Vaculík, D. Dittel, M. Velička</i>	
Thermal processes in primary cooling of continuous casting machine	18
<i>M. Velička, M. Vaculík, D. Dittel</i>	

PROCESS ENGINEERING

Microstructure of in situ Ti-Al-Si composites	19
<i>K. Bialasová, D. Vojtěch, P. Lejček</i>	
Characteristics of chromium coating formed on carbon fibers by physical vapour deposition	20
<i>A. Botor-Probiez, A. Urbańczyk, M. Misiowiec</i>	
Processing of titanium	21
<i>M. Černý, V. Snašel, M. Greger</i>	
Heterogeneous nucleation and microstructure formation in peritectic alloy systems - Coupling Calphad assessment, directional solidification and phase field modeling	22
<i>E. Doerberg, R. Siquieri, R. Schmid-Fetzer, H. Emmerich</i>	
The elimination of the mistakes while measuring the materials of the low hardness	23
<i>M. Dzuravčin</i>	
Measuring of oxidic layer by the method of magnetic pole	24
<i>M. Flanderka</i>	
Thermodynamics of magnesium alloy solders	25
<i>M. Hampl, S. Mucklich, B. Wielage, R. Schmid-Fetzer</i>	
Ti based alloy doped with Nb prepared by electron beam melting and mechanical alloying	26
<i>J. Juřica, M. Losertová</i>	
Evolution of greenhouse gas emissions	27
<i>L. Karaffa</i>	
Monitoring of soil environment modification induced by cathodic polarization	28
<i>J. Kohout, M. Kouřil, P. Novák</i>	
Texture and earing of deep drawing sheet metals	29
<i>M. Kontúr, Š. Nižník</i>	
Energetic utilization of plastics waste	30
<i>J. Krejček</i>	
Influence of chemical composition of magnesium-aluminum alloys on thermal diffusivity	31
<i>W. Kroker, A. Kielbus, G. Moskal, T. Rzychoń</i>	
Recovery of pure tungsten from Scheelite ores	32
<i>C. Máté</i>	
Evolution of Ni-P and Ni-P-Al₂O₃ coatings during heat treatment	33
<i>M. Novák</i>	

Studing of opportunities production ferroaluminum silicon from nepheline ore <i>V. Omelchenko, O. Mach, Y. Kostetsky, K. Spilevov</i>	34
Processing of scrap tyres co-pyrolysis with black coal <i>J. Pavelka, V. Roubíček</i>	35
Chemicals used for reducing the interfacial tension between oil and water <i>L. Perutka, L. Kuboňová</i>	36
Oxidation resistance and thermal stability of Ti-Al-Si alloys produced by reactive sintering <i>F. Průša, P. Novák, J. Šerák, D. Vojtěch</i>	37
The electrorefining of tin in HCl solutions <i>G. Rimaszeki, J. Majtenyi, T. Kekesi</i>	38
Industrial and ecological aspects of control methane emission from the transported mining mass <i>V. Kostenko, H. Shevchenko</i>	39
The effect of the cooling rate and the strontium content <i>M. Tokár, T. Mende, P. Jónás</i>	40
Possibilities of used mobile phones processing <i>E. Turócziová</i>	41

MATERIALS SCIENCE

Structure and properties of modern PVD coatings <i>R. Dzedzina, M. Hagarová</i>	42
Corrosion behaviour of Ti35Nb alloy for stomatology <i>J. Fojt, L. Joska</i>	43
Adaption eines Heiztischmikroskops für Ansmelzvorgänge von Magnesiumlegierungen <i>K. Grätz, D. Mirkovic, R. Schmid-Fetzer</i>	44
Carbonaceous thin layers on clay mineral substrate <i>O. Guney, G. S. Martynková</i>	45
Characterization of carbon nanofibers by SEM, TEM, HREM and ESCA <i>V. Puchý, L. Hegedűs, Z. Bastl, J. Morgiel, P. Švec, J. Dusza</i>	46
Structural transformations in two-phase titanium alloys during hydrogen treatment <i>B. Chmiela, M. Sozańska</i>	47
Corrosive tests of amalgam fillings in artificial saliva solution <i>B. Jarzebinski, L. Frużyński, P. Nadborski</i>	48
Hot corrosion resistance of Ni-based superalloys <i>L. Jelonek, M. Goral, S. Antosiewicz</i>	49
Microstructure and properties of Fe-Al-Si alloys prepared by reactive sintering <i>V. Knotek, P. Novák, J. Šerák, A. Michalcová, D. Vojtěch</i>	50

Intercalation of montmorillonite with zinc and copper ions <i>O. Kozák, P. Praus</i>	51
The influence of filling temperature on microstructure and mechanical properties of MSR-B magnesium alloy <i>T. Kukička</i>	52
Non-equilibrium phases in Al-TM alloys <i>A. Michalcová, D. Vojtěch, P. Novák, J. Šerák</i>	53
Optimization of reactive sintering production of Ti-Al-Si alloys <i>T. Popela, P. Novák, J. Šerák, D. Vojtěch</i>	54
Some aspects of acicular ferrite and granular bainite <i>Z. Rucká, E. Mazancová</i>	55
Study of refractory materials lifetime and abrasion intended for ceramic filters production <i>L. Socha, J. Bažan, P. Lev</i>	56
Hydrogen effect on structure and mechanical features of NiTi-Me alloys <i>P. Štěpán, M. Losertová</i>	57
Structure of aluminide and Pt-Al diffusion coatings deposited on single crystal superalloy CMSX-4 <i>R. Swadzba, M. Sozanska, B. Witala</i>	58
Corrosive tests of stainless steel wire for orthopaedics <i>A. Szula, P. Buczek</i>	59
The precipitation sequence in Al-Cu alloys <i>M. Vončina, J. Medved, R. Barbič</i>	60
Mechanical properties of thermoplastic composites <i>I. Zajacová</i>	61

SIMULATION

The generalized plain strain approach study of a rolling in grooves process <i>S. Aksenov, M. Kotas</i>	62
Usage of computer simulations for solving of thermal transport problems during continuous steel casting <i>D. Dittel, P. Fojtik, M. Vaculik, M. Velička</i>	63
Theory of motivation and trends about staff benefits <i>E. Dzurová</i>	64
Modern qualification of non-destructive testing personnel <i>R. Holstein</i>	65
Physical modelling of ladle homogenization while using different methods of gas stirring <i>Z. Hudzieczek, K. Michalek, K. Gryc</i>	66
Use of neural networks for the analysis of lifetime of casting ladle linings <i>D. Jančar, P. Tvardek, P. Hašek</i>	67

Calculation of the immiscibility gap in an oxide system <i>T. Mende, A. Roósz</i>	68
Processes of crystal grows in liquid melt: modeling and rendering <i>V. A. Pashinskaya, Karabchevskiy</i>	69
Simulation des Rekristallisationsglühens von Karosseriestahlbleche <i>M. Ruska, Š. Nižnik</i>	70
Communication in process of engineering industrial systems <i>L. Švajdová, A. Sikorová, P. Besta, M. Stoch</i>	71
Modern diagnostic of technological devices <i>P. Švec, R. Frischer, O. Zimný, M. Bogar</i>	72
Application of QFD (Quality Function Deployment) method in company <i>M. Turis</i>	73
The improvement of quality of steelworks products using artificial neural network <i>O. Zimný, R. Frischer, M. Bogar, P. Švec</i>	74
