## Part One COMPETING THROUGH LOGISTICS

<b>1 Logistics and the supply chain</b>	<b>3</b>
Introduction	3
1.1 Logistics and the supply chain	4
1.1.1 Definitions and concepts	8
1.1.2 Supply chain: structure and tiering	9
1.2 Material flow and information flow	14
1.2.1 Material flow	14
1.2.2 Information flow	16
1.3 Competing through logistics	17
1.3.1 Hard objectives	18
1.3.2 Supportive capabilities	21
1.3.3 Soft objectives	28
1.3.4 Order winners and qualifiers	28
1.4 Logistics strategies	30
1.4.1 Defining 'strategy'	30
1.4.2 Aligning strategies	32
1.4.3 Differentiating strategies	32
1.4.4 Trade-offs in logistics	34
Summary	35
Discussion questions	36
References	36
Suggested further reading	38
<b>2 Putting the end-customer first</b>	<b>39</b>
Introduction	39
2.1 The marketing perspective	40
2.1.1 Rising customer expectations	42
2.1.2 The information revolution	42

2.2	Segmentation	43
2.3	Demand profiling	51
2.4	Quality of service	55
2.4.1	Customer loyalty	57
2.4.2	Value disciplines	59
2.4.3	Relationship marketing and customer relationship management (CRM)	60
2.5	Segmented supply chain strategy	62
2.5.1	Supply chain and marketing alignment	63
2.5.2	The supply chain strategy drivers	65
2.5.3	Selecting drivers for segmentation	68
2.5.4	The four-step approach to developing segmented supply chain strategy	71
	Summary	76
	Discussion questions	77
	References	78
	Suggested further reading	80
<b>3</b>	<b>Value and logistics costs</b>	<b>81</b>
	Introduction	81
3.1	Where does value come from?	83
3.2	How can conventional return on capital employed (ROCE) be measured?	84
3.2.1	ROCE and implications for supply chain management	84
3.2.2	Financial ratios and ROCE drivers	87
3.3	Why is liquidity important and what are the implications for supply chain management?	88
3.4	How can logistics costs be represented?	93
3.4.1	Fixed/variable	95
3.4.2	Direct/indirect	99
3.4.3	Engineered/discretionary	102
3.5	Activity-based costing (ABC)	104
3.5.1	Cost-time profile (CTP)	106
3.5.2	Cost-to-serve (CTS)	108
3.6	How can capital investment decisions be made?	111
3.6.1	Four investment appraisal approaches	112
3.6.2	What are discounted cash flows?	113
3.7	A balanced measurement portfolio	118
3.7.1	Balanced measures	119
3.7.2	Supply chain management and the balanced scorecard	120
3.7.3	Supply chain operations reference model (SCOR)	121
	Summary	125
	Discussion questions	126
	References	127
	Suggested further reading	128

## Part Two LEVERAGING LOGISTICS OPERATIONS

<b>4</b>	<b>Managing logistics internationally</b>	<b>131</b>
	Introduction	131
4.1	Drivers and logistics implications of internationalisation	133
4.1.1	Logistical implications of internationalisation	137
4.1.2	Time-to-market	138
4.1.3	Global consolidation	138
4.2	The tendency towards internationalisation	142
4.2.1	Focused factories: from geographical to product segmentation	142
4.2.2	Centralised inventories	143
4.3	The challenges of international logistics and location	147
4.3.1	Extended lead time of supply	147
4.3.2	Extended and unreliable transit times	147
4.3.3	Multiple consolidation and break points	148
4.3.4	Multiple freight modes and cost options	149
4.3.5	Price and currency fluctuations	149
4.3.6	Location analysis	150
4.4	Organising for international logistics	152
4.4.1	Layering and tiering	152
4.4.2	The evolving role of individual plants	153
4.4.3	Reconfiguration processes	154
4.5	Managing for risk readiness	159
4.5.1	Immediate risk readiness	161
4.5.2	Structural risk readiness	162
4.6	Reverse logistics	162
4.7	Corporate social responsibility in the supply chain	165
4.8	Establishing global governance of the supply chain	170
4.8.1	Decentralised centralisation	171
4.8.2	Incorporating new regions into global governance	171
4.8.3	Ownership of goods in the international flow of goods	173
	Summary	174
	Discussion questions	175
	References	175
	Suggested further reading	176
<b>5</b>	<b>Managing the lead-time frontier</b>	<b>177</b>
	Introduction	177
5.1	The role of time in competitive advantage	178
5.1.1	Time-based competition: definition and concepts	178
5.1.2	Variety and complexity	179
5.1.3	Time-based initiatives	180
5.1.4	Time-based opportunities to add value	181

5.1.5	Time-based opportunities to reduce cost	183
5.1.6	Limitations to time-based approaches	185
5.2	P:D ratios and differences	186
5.2.1	Using time as a performance measure	186
5.2.2	Using time to measure supply pipeline performance	187
5.2.3	Consequences when P-time is greater than D-time	189
5.3	Time-based process mapping	192
5.3.1	Stage 1: Create a task force	193
5.3.2	Stage 2: Select the process to map	193
5.3.3	Stage 3: Collect data	194
5.3.4	Stage 4: Flow chart the process	194
5.3.5	Stage 5: Distinguish between value-adding and non-value-adding time	194
5.3.6	Stage 6: Construct the time-based process map	195
5.3.7	Stage 7: Solution generation	195
5.4	Managing timeliness in the logistics pipeline	200
5.4.1	Strategies to cope when P-time is greater than D-time	200
5.4.2	Practices to cope when P-time is greater than D-time	201
5.5	When, where and how?	203
	Summary	203
	Discussion questions	204
	References	204
	Suggested further reading	204
<b>6</b>	<b>Supply chain planning and control</b>	<b>205</b>
	Introduction	205
6.1	The supply chain 'game plan'	207
6.1.1	Planning and control within manufacturing	208
6.1.2	Managing inventory in the supply chain	214
6.1.3	Planning and control in retailing	219
6.1.4	Inter-firm planning and control	221
6.2	Just-in-time (JIT) scheduling	224
6.2.1	The just-in-time system	225
6.2.2	JIT and material requirements planning	230
6.3	Overcoming poor coordination in retail supply chains	233
6.3.1	Efficient consumer response (ECR)	233
6.3.2	Collaborative planning, forecasting and replenishment (CPFR)	240
6.3.3	Vendor-managed inventory (VMI)	245
6.3.4	Quick response (QR)	247
	Summary	249
	Discussion questions	250
	References	251
	Suggested further reading	252

<b>7</b>	<b>Lean thinking and agile supply chains</b>	<b>253</b>
	Introduction	253
7.1	Lean thinking	255
7.1.1	Types of waste	255
7.1.2	The principles of lean thinking	256
7.1.3	Application of lean thinking to business processes	260
7.1.4	Lean manufacturing practices	261
7.2	The concept of agility	262
7.2.1	Sales and operations planning for agility	270
7.2.2	Product design for agility	274
7.2.3	Manufacturing for agility	277
7.2.4	Supply chain partnerships for agility	282
7.2.5	Preconditions for successful agile practice	287
7.3	Combining lean and agile	290
	Summary	293
	Discussion questions	294
	References	295
	Suggested further reading	298

## Part Three WORKING TOGETHER

<b>8</b>	<b>Integrating the supply chain</b>	<b>301</b>
	Introduction	301
8.1	Integration in the supply chain	303
8.1.1	Internal integration: function to function	304
8.1.2	Inter-company integration	311
8.1.3	Electronic integration	314
8.2	Choosing the right supply relationships	317
8.3	Strategic partnerships in the supply chain	324
8.3.1	Economic justification for partnerships	324
8.3.2	Advantages of partnerships	325
8.3.3	Disadvantages of partnerships	325
8.4	Implementing strategic partnerships	326
8.4.1	Lambert's partnership model	329
8.4.2	Barriers to developing strategic partnerships	331
8.5	Managing supply chain relationships	333
8.5.1	Creating closer relationships	333
8.5.2	Factors in forming supply chain relationships	334
8.6	Supplier networks	336
8.6.1	Supplier associations	336
8.6.2	Japanese <i>keiretsu</i>	339
8.6.3	Italian districts	341
8.6.4	Chinese industrial areas	343

Summary	347
Discussion questions	349
References	350
Suggested further reading	351
<b>9 Sourcing and procurement</b>	<b>353</b>
Introduction	353
9.1 What does procurement do?	355
9.2 Key drivers of procurement effectiveness	358
9.2.1 Operating Principle I: Business alignment	360
9.2.2 Operating Principle II: Developing strategies for procurement categories	363
9.2.3 Operating Principle III: Total cost of ownership, not just price	365
9.2.4 Operating Principle IV: Supplier relationship management (SRM)	368
9.3 Managing the supply base	369
9.3.1 Segmenting the supply base	371
9.3.2 Establishing policies per supplier segment	376
9.3.3 Vendor rating	377
9.3.4 Executive ownership of supply relationships	380
9.3.5 Migrating towards customer of choice status	381
9.4 Procurement technology	383
9.5 Markers of boardroom value	383
9.6 What does top procurement talent look like?	384
Summary	385
Discussion questions	386
References	386
Suggested further reading	387

## Part Four CHANGING THE FUTURE

<b>10 Logistics future challenges and opportunities</b>	<b>391</b>
Introduction	391
10.1 Changing economics?	392
10.2 Internal alignment triad	394
10.3 Corporate social responsibility: same trade-offs	396
10.4 Humanitarian logistics	398
10.4.1 Preparedness phase	399
10.4.2 Immediate response phase	399
10.4.3 Reconstruction phase	400

10.5	Selecting collaborative opportunities to accelerate time to market	404
10.5.1	Selecting upstream collaboration opportunities	404
10.5.2	Selecting downstream opportunities: which customers to give the keys to our car	406
10.6	The supply chain manager of the future	407
10.7	Changing chains	409
10.8	A great function to be in	412
	Summary	413
	Discussion questions	413
	References	413
	Index	415

## Lecturer Resources
