PREFACE	5
I. NOMENCLATURE OF OLIGOSACCHARIDES	13
II. DERIVATION OF OLIGOSACCHARIDE FORMULAS	23
III. CONSTITUTION OF OLIGOSACCHARIDES	26
1. Methylation Analysis	29
2. Degradation of Oligosaccharides with Periodic Acid	34
3. Degradation of Oligosaccharides by Lead Tetra-acetate	44
IV. CONFORMATION OF OLIGOSACCHARIDES	50
V. NUMERICAL RELATIONS OF THE VALUES OF ROTATIONS IN THE OLIGOSACCHARIDE SERIES	51
VI. SYNTHESIS OF OLIGOSACCHARIDES	60
1. Synthesis of Oligosaccharides from Lower Constituents (Usually from Monosaccharides)	60
A. Synthesis of Disaccharides by Elimination of a Water Molecule from Two Monosaccharide Molecules	60
a) Synthesis of non-reducing disaccharides	60
Trehalose	60
Sucrose	62
b) Synthesis of reducing disaccharides	62
B. Synthesis of Disaccharides by Elimination of a Hydrogen Halide Molecule from the Acylated Halogenose and the Second Mono- saccharide Molecule with a Free Hydroxyl Group	64
a) The Koenigs-Knorr synthesis	67
Synthesis of non-reducing disaccharides	74
Synthesis of reducing disaccharides	76
Synthesis of trisaccharides and higher oligosaccharides	84
C. Synthesis by the Action of Monosaccharide Anhydro Derivatives upon Monosaccharides or Their Derivatives	88
2. Oligosaccharide Synthesis by Lengthening or Shortening the Carbon Chain	95
A. Lengthening of the Carbon Chain	95
B. Shortening of the Carbon Chain	95
a) The Ruff method	95
b) The Wohl degradation	97
c) Degradation of glycals by oxidation	99
d) Other degradation methods	100
3. Synthesis by Structural Change of One Monosaccharide Unit in the Oli- gosaccharide Molecule	101
A. Anomerization of the Glycosidic Linkage in the Disaccharide Mole- cule	101
B. Epimerization in One of the Monosaccharide Units	102

C. Twofold Inversion of the Configuration at C-2 and C-3 in the Reducing Part of the Disaccharide Molecule	103
D. Hydroxylation of Glycals	103
E. Isomerization of the Reducing Aldose into a Ketose in the Disaccharide Molecule	104
F. Reduction of Uronic Acids	107
G. Reduction of Oligosaccharide Keto Derivatives	107
4. Synthesis of Oligosaccharides by the Action of Mineral Acids; Reversion	108
5. Enzymic Synthesis and Resynthesis of Oligosaccharides	115
A. Synthesis of Oligosaccharides by the Action of Enzymes on Monosaccharides	115
B. Transglycosylation	122
a) Enzymic transfers of a monosaccharide molecule from an oligosaccharide to a monosaccharide or its derivative	124
Transglucosylation	124
Transfructosylation	126
Other transglycosylations	126
b) Enzymic changes of disaccharides	127
Transglycosylation of maltose	127
Transglycosylation of isomaltose	128
Transglycosylation of cellobiose	128
Transglycosylation of nigerose	129
Transglycosylation of lactose	129
Transglycosylation of <i>allo</i> -lactose	130
Transglycosylation of sucrose	130
c) Transglycosylation between two oligosaccharide molecules	133
Sucrose and lactose	133
Sucrose and cellobiose	134
Sucrose and maltose	134
Sucrose and other disaccharides	134
Sucrose and trisaccharides	135
Other disaccharides as a source of transglycosylation	135
Transglycosylation of trisaccharides, higher oligosaccharides and polysaccharides	135
VII. REACTIONS OF OLIGOSACCHARIDES IN A STRONGLY ALKALINE MEDIUM	141
VIII. INFLUENCE OF RADIATION ON OLIGOSACCHARIDES	152
IX. ISOLATION OF OLIGOSACCHARIDES FROM NATURAL MATERIAL	154
X. PREPARATION OF OLIGOSACCHARIDES BY HYDROLYSIS OF HIGHER OLIGOSACCHARIDES OR POLYSACCHARIDES	188
XI. ISOLATION OF OLIGOSACCHARIDES FROM HETEROSIDES	213
XII. DESCRIPTION AND PROPERTIES OF OLIGOSACCHARIDES	216
1. Disaccharides	219
A. Non-reducing Disaccharides	219
B. Reducing Disaccharides with a Linkage 1 → Primary Alcoholic Group	229
C. Reducing Disaccharides with a 1 → 2 Linkage	238
D. Reducing Disaccharides with a 1 → 3 Linkage	240

E. Reducing Disaccharides with a 1→4 Linkage	245
F. Reducing Disaccharides with a 1→5 Linkage	256
G. Disaccharides of Unknown Constitution	257
2. Trisaccharides	258
A. Non-reducing Trisaccharides	258
B. Reducing Trisaccharides	263
C. Branched Reducing Trisaccharides	276
3. Tetrasaccharides	278
A. Non-reducing Tetrasaccharides	278
B. Reducing Tetrasaccharides	281
C. Branched Tetrasaccharides	286
4. Pentasaccharides, Hexasaccharides, etc.	288
A. Homologous Series of Oligosaccharides	288
a) Homogeneous oligosaccharides	288
Substances containing D-glucose only	288
Homologous series of maltose	288
Homologous series of cellobiose	289
Homologous series of laminaribiose	289
Substances containing D-galactose only	290
Substances containing D-xylose only	290
b) Heterogeneous oligosaccharides	291
D-Galactosyl derivatives of D-glucose	291
D-Galactosyl derivatives of sucrose	291
Genetic series of raffinose	291
Genetic series of lychnose and isolychnose	293
Genetic series of D-fructosyl derivatives of sucrose	293
5. Higher Oligosaccharides of Unknown Structure	294
XIII. ESTERS OF OLIGOSACCHARIDES AND ORGANIC ACIDS	296
1. Acetyl Derivatives of Oligosaccharides	296
A. Per-O-Acetyl Derivatives	296
B. Partially Acetylated Oligosaccharide Derivatives	299
2. Other Esters of Carboxylic Acids and Oligosaccharides	302
3. Esters of Oligosaccharides and Sulphonic Acids	303
4. Re-arrangements of Acyl Groups in Partially Acylated Oligosaccharide Derivatives	304
XIV. ACYLATED HALOGENOSES OF OLIGOSACCHARIDES	321
XV. ESTERS OF OLIGOSACCHARIDES AND INORGANIC ACIDS	329
1. Phosphate Esters	329
2. Esters with Hydrogen Halides	330
3. Esters of Nitric Acid	330
4. Esters Formed by the Action of Sulphuryl Chloride on Oligosaccharides	331
XVI. GLYCOSIDES OF REDUCING OLIGOSACCHARIDES	333
XVII. OLIGOSACCHARIDE ORTHOESTERS	344
XVIII. ETHERS OF OLIGOSACCHARIDES	347
1. Methyl Ethers	347
2. Trityl Ethers	352
3. Other Oligosaccharide Ethers	353
XIX. ANHYDRO DERIVATIVES OF OLIGOSACCHARIDES	355
1. Natural Substances	355
2. Synthetic Derivatives	357

A. Anhydro Derivatives of Oligosaccharides of the Glycosan Type ...	357
B. Other Anhydro Derivatives	358
C. Anhydro Derivatives with Doubled Monosaccharide Molecules ...	360
XX. CONDENSATION PRODUCTS OF OLIGOSACCHARIDES WITH OXO COMPOUNDS.....	372
XXI. UNSATURATED DERIVATIVES OF OLIGOSACCHARIDES	376
1. Glycals	376
2. 2-Hydroxyglycals	378
3. Other Glycoseens.....	379
XXII. DEOXY SUGARS	381
1. Natural Deoxy Sugars	381
A. Products of Direct Isolation	381
B. Products Obtained by Hydrolysis of Higher Oligosaccharides or Polysaccharides	383
C. Products Obtained by Hydrolysis of Heterosides	383
2. Synthetic Deoxy Sugars	384
XXIII. GLYCOSYLAMINES FROM THE SERIES OF REDUCING OLIGOSACCHARIDES	394
XXIV. AMINO SUGARS	402
1. Substances Obtained by Hydrolysis of Nitrogen-containing Polysaccharides	402
A. Hydrolytic Products of Chitin	402
B. Substances Obtained from Chondroitin and Similar Substrates	403
C. Substances Obtained from Micro-organisms	404
2. Substances Obtained from Antibiotics	405
3. Substances Obtained from Mucopolysaccharides	407
A. Blood-group Polysaccharides	407
B. Hog Gastric Mucins	408
4. Nitrogen-containing Oligosaccharides from Human Milk	408
5. Bound Form of Lactaminic Acid	417
6. Chemical Syntheses of Amino Sugars from the Oligosaccharide Series.	418
7. Enzymic Syntheses of Amino Sugars of the Oligosaccharide Series ...	421
XXV. OXIMES OF REDUCING OLIGOSACCHARIDES	428
XXVI. PHENYLHYDRAZONES AND PHENYLOSAZONES OF REDUCING OLIGOSACCHARIDES AND THEIR DERIVATIVES	430
1. Phenylisotriazoles of Reducing Oligosaccharides	432
2. Anhydro Derivatives of Phenyllosazones of Reducing Oligosaccharides	433
XXVII. AZIDO SUGARS OF THE OLIGOSACCHARIDE SERIES AND CONDENSATION PRODUCTS OF OLIGOSACCHARIDES AND SUBSTANCES OF THE UREA GROUP	442
XXVIII. OSONES OF OLIGOSACCHARIDES AND THEIR DERIVATIVES EXCEPT OSAZONES	444
XXIX. OLIGOSACCHARIDE DERIVATIVES WITH AN ACYCLIC REDUCING PART OF THE MOLECULE.....	448
1. Oligosaccharide Thioacetals	448
2. Acylated and Alkylated Derivatives of the Oxo Forms of Oligosaccharides and Their Acetals	450
XXX. REDUCTION PRODUCTS OF REDUCING OLIGOSACCHARIDES	452
1. Anhydro Derivatives of Glycosylalditols	462
2. Aminodeoxy Derivatives of Glycosylalditols	465

XXXI. ALDONIC ACIDS FROM THE SERIES OF REDUCING OLIGOSACCHARIDES	467
XXXII. ACYLATED DERIVATIVES OF ALDOBIONIC ACID NITRILES ...	473
XXXIII. SACCHARINIC ACIDS OF THE OLIGOSACCHARIDE SERIES	475
XXXIV. OLIGOURONIC ACIDS	476
1. Oligouronic Acids Proper	477
2. Pseudoaldobiouronic Acids	492
3. Polyuronic Acids	493
4. Nitrogen-containing Oligouronic Acids	497
XXXV. GLYCOSYL DERIVATIVES OF INOSITOLS.....	502
XXXVI. ANALYSIS OF OLIGOSACCHARIDES.....	508
1. Qualitative Analysis	508
2. Quantitative Analysis	512
A. Reducing Oligosaccharides	512
B. Non-reducing Oligosaccharides	513
3. Chromatographic Analysis	516
A. Paper Chromatography	517
a) Preparation of the sample	517
b) Developing technique	518
c) Developing solvent systems.....	518
d) Detecting reagents	518
e) R_F value and structure	519
f) Quantitative determination	519
g) Examples of application	520
B. Electrophoresis on Paper	524
C. Column Chromatography	526
a) Activated carbon.....	526
b) Siliceous earths (Fuller's earths)	528
c) Cellulose	528
d) Ion exchangers	529
e) Chromatography of acylated derivatives	529
D. Thin-layer Chromatography	532
E. Gas-liquid Partition Chromatography	533
INDEX OF AUTHORS CITED IN THE TEXT	535
BIOLOGICAL SUBJECT INDEX	540
SUBJECT INDEX	547
