

## Contents

THE HISTORY OF MATHEMATICS.....	9
§1 Ancient Mathematics.....	9
§2 Medieval Mathematics.....	10
§3 Modern Mathematics.....	11
§4 Latest Advances.....	12
THE PHILOSOPHY OF MATHEMATICS.....	15
§1 Alternatives of Methodology.....	15
§2 Finitism.....	16
§3 Intuitionism.....	16
§4 Mathematical Formalism.....	17
§5 Speculative Symbolism.....	19
MATHEMATICAL SYSTEMATICS.....	21
§1 Branches of Mathematics.....	21
§2 Mathematical Hierarchies.....	24
§3 The Unification of Mathematical Theories.....	26
§4 Completeness of Mathematical Structures.....	30
§5 Constructive and Analytic Theories.....	31
§6 Intensional and Extensional Theories.....	33
METAMATHEMATICS.....	37
§1 Terms and Formulas.....	37
§2 Principles of Metamathematics.....	38
§3 Properties of Theories.....	40
§4 Corporeal Mathematics.....	42
§5 Constructive Mathematics.....	46
SET THEORY.....	50
§1 Sets and Elements.....	50
§2 Subsets.....	51
§3 Cardinality.....	51
§4 Union and Intersection.....	53
§5 Generalised Operations.....	54
RELATIONAL ALGEBRA.....	57
§1 Ordered $n$ -tuples.....	57
§2 Cartesian Product.....	58
§3 Relation.....	60
§4 Relational Algebras.....	63
§5 Mapping.....	64
SET-THEORETIC AXIOMATICS.....	66
§1 Cantor Set Theory.....	66
§2 Applications to Natural Numbers.....	67
§3 The Zermelo-Fraenkel Axioms for Set Theory.....	68

§4 Constructive Set Theory .....	69
THEORETICAL ARITHMETIC .....	72
§1 Addition.....	72
§2 Subtraction.....	73
§3 Multiplication .....	74
§4 Division .....	75
§5 Basic Arithmetic Laws .....	77
§6 Exponentiation.....	79
§7 Evolution or Root Extraction.....	81
§8 Logarithms.....	82
§9 Higher Arithmetic Operations .....	85
§10 Exponentiation Rules.....	89
SETS OF NUMBERS.....	94
§1 Natural numbers .....	94
§2 Rational Numbers.....	97
§3 Zero .....	99
§4 Algebraic Numbers.....	103
§5 Transcendental Numbers.....	105
§6 A Classification of Real Numbers .....	106
FUNCTIONAL ANALYSIS .....	111
§1 Introduction .....	111
§2 Sequences and Progressions .....	112
§3 Polynomials.....	114
§4 Function.....	115
§5 Types of Functions .....	118
§6 Inverse Functions.....	123
§7 Equations.....	124
§8 The Systematic Approach to Functions .....	127
LIMIT THEORY .....	129
§1 Intervals .....	129
§2 Infimum and Supremum.....	129
§3 Behaviour of a Function .....	130
§4 Limits .....	132
§5 Series .....	133
DIFFERENTIAL CALCULUS .....	136
§1 Derivatives.....	136
§2 Rules of Differentiation .....	137
§3 Gradients .....	139
§4 Differentials.....	140
§5 Higher Differentiation .....	142
§6 Partial Derivatives .....	143
§7 Total Derivative.....	144

INTEGRAL CALCULUS.....	146
§1 Indefinite Integral.....	146
§2 The Rules of Integration.....	147
§3 Definite Integral.....	149
§4 Differential Equations.....	150
§5 Non-Standard Analysis.....	151
LINEAR ALGEBRA.....	157
§1 Linear Algebra.....	157
§2 Coordinate Systems.....	157
§3 Vectors and Scalars.....	159
§4 Vector Sum.....	160
§5 Scalar Multiplication.....	162
§6 Vector Space over a Field.....	162
§7 Basis.....	163
§8 Dot Product and Inner Product.....	164
§9 Vector Product.....	166
§10 Direct Sum.....	167
§11 Non-Standard Vector Analysis.....	168
COMPLEX VECTOR SPACE.....	171
§1 Complex Numbers.....	171
§2 Imaginary Numbers.....	173
§3 Operations with Complex Numbers.....	174
§4 Operations in Polar Coordinates.....	176
MATRIX THEORY.....	178
§1 Origins of Matrices.....	178
§2 Basic Concepts.....	178
§3 Matrix Operations.....	180
§4 Determinants.....	181
§5 Minor.....	182
ALGEBRAIC STRUCTURES.....	184
§1 Groupoids.....	184
§2 Brandt Groupoid.....	186
§3 Quasigroup.....	186
§4 Moufang Loops.....	189
§5 Block Designs.....	190
§6 Alternative and Associative Systems.....	190
§7 Semigroups.....	191
GROUP AND FIELD THEORY.....	195
§1 Origins.....	195
§2 Types of Groups.....	195
§3 Subgroups.....	198
§4 Quotient Groups.....	200

§5 Rings.....	201
§6 Ideals .....	202
§7 Fields .....	203
§8 The Systematics of Algebraic Structures.....	204
LATTICE THEORY .....	208
§1 Partial Ordering.....	208
§2 Isotone Correspondences.....	209
§3 Join and Meet .....	210
§4 Semilattices and Lattices .....	211
§5 Complements.....	212
§6 Distributive Lattices .....	213
§7 Algebra of Sets .....	214
§8 Implicative and Involutive Lattices .....	216
§9 Differential Lattices.....	217
§10 Boolean Groups and Rings.....	218
§11 Boolean Applications .....	222
§12 The Boolean Corpoid .....	223
UNIVERSAL ALGEBRA.....	228
§1 The Scope of Universal Algebras.....	228
§2 Polyadic Groups and $n$ -ary Algebras.....	229
§3 Polygenous Grammoids and $n$ -valued Algebras.....	230
§4 Multialgebras.....	232
§5 The $n$ -Carrier Algebra .....	233
COMBINATORICS .....	235
§1 Introduction .....	235
§2 Elementary Combinatorics .....	235
§3 Factorials .....	237
§4 Permutations.....	238
§5 Variations .....	239
§6 Combinations.....	240
§7 Combinatorics of Mappings .....	241
§8 Systems and Societies.....	242
§10 Systematic Cardinal Algebra.....	243
GRAPH THEORY .....	247
§1 Beginnings of Graphs Theory.....	247
§2 Elementary Terms .....	247
§3 Varieties of Graphs.....	249
§4 Directed Graphs.....	250
§5 Paths .....	251
§6 Subgraphs .....	252
§7 Trees.....	252
§8 Colourability.....	254

§9 Ramsey Theory .....	255
GEOMETRY .....	258
§1 Euclidean Geometry .....	258
§2 Euclidean Postulates .....	260
§3 Angle .....	262
§4 Trigonometric functions .....	264
§5 Trigonometric Identities .....	267
§6 Triangular Figures .....	267
§7 Systematic Trigonometry .....	270
§8 Systematic Cyclometry .....	272
NON-EUCLIDEAN GEOMETRIES .....	276
§1 Projective and Affine Geometries .....	276
§2 Projective Geometry .....	277
§4 Nets .....	279
§3 Projective Space .....	279
§5 Affine Geometry .....	280
§6 Affine Planes .....	281
§7 Hyperbolic and Elliptic Geometries .....	282
TOPOLOGY .....	286
§1 Introduction .....	286
§2 Metric Spaces .....	287
§3 Open and Closed Subsets .....	288
§4 Topological Spaces .....	291
§5 Compact Spaces .....	292
§6 Separable Spaces .....	294
§7 Regular Spaces .....	294
§8 Connected and Disconnected Spaces .....	296
§9 Separation Properties .....	297
§10 Higher Types of Topological Spaces .....	298
STATISTICS .....	302
§1 Statistics as a Mathematical Discipline .....	302
§2 The Scope of Study .....	303
§3 The Graphic Representation of Data .....	305
§4 Populations .....	307
§5 Mean .....	308
§6 Standard Deviation .....	312
§7 Variance .....	314
§8 Systematic Axiomatics .....	315
PROBABILITY THEORY .....	319
§1 Probability .....	319
§2 Probability Rates .....	320
§3 Events .....	321

§4 Probability Functions.....	322
§5 Distribution Function.....	323
§6 Normal Distribution.....	325
§7 Binomial Distribution.....	326
§8 Skewness.....	327
§9 Goals of Theoretical Integration.....	329
MEASURE THEORY.....	331
§1 Origins.....	331
§2 Borel Sets.....	331
§3 Sigma-Additivity.....	332
§4 Sigma-algebras.....	334
§5 Borel and Lebesgue Measure.....	336
§6 Lebesgue Integral.....	337
PROGRAMMING LANGUAGES.....	340
§1 Programming.....	340
§2 Early Programming Languages.....	341
§3 From FORTRAN to JAVA.....	342
§4 LISP.....	344
§5 Extensions of LISP.....	345
§6 PROLOG.....	346
FORMAL LANGUAGES.....	348
§1 Basic Terms.....	348
§2 Formal Grammars.....	349
§3 Productions.....	350
§4 Normal and Post Systems.....	351
§5 Linear and Regular Grammars.....	352
§6 Thue Systems.....	353
§7 Phrase-Structure Grammars.....	355
§8 Dependency Grammars.....	356
§9 Decision Grammars.....	357
§10 The Semantic Component.....	359
§11 Formal Inaccuracies.....	360
§12 Formal Grammars as Grammoids.....	362
CYBERNETICS.....	366
§1 Turing Machines.....	366
§2 Finite State Machines.....	367
§3 Types of automata.....	368
§4 Cellular Automata.....	369
§5 Theory of Games.....	370
A List of Tables.....	372
Index.....	374
