1	Security Challenges in Smart Grid Implementation	1
	Sanjay Goel and Yuan Hong	
1.1	Smart Grid Architecture.	1
1.1.1	Introduction	1
1.1.2	Communication Technologies.	3
1.1.3	Sensors and Devices	4
1.2	Smart Grid Security Concerns and Threats.	5
1.2.1	Reported Attacks on Electric Grids	6
1.2.2	Security Concerns.	7
1.2.3	Impact of Threats on Smart Grid	8
1.3	Ensuring Security in Smart Grids	9
1.3.1	Standards and Architectures	11
1.3.2	Sensors and Devices	11
1.3.3	Network Security Threats.	13
1.4	Mitigating Cyber-Physical Threats.	15
1.4.1	Risks at Cyber-Physical Interface	16
1.4.2	Mitigating Cyber-Physical Threats.	18
1.5	Mitigating Smart Meter Threats	19
1.5.1	Threats and Vulnerabilities in Meter Infrastructure . . .	19
1.5.2	Security Breach on Smart Meter.	21
1.6	Mitigating Data Manipulation Threats	22
1.6.1	Introduction	22
1.6.2	Resolving Data Integrity Violation in State Estimation	23
1.6.3	Resolving Other Data Manipulation Threats	26
1.7	Mitigating Privacy Threats	28
1.7.1	Introduction	28
1.7.2	Privacy Threats in Smart Grid Infrastructure.	29

1.7.3	Privacy Laws w.r.t. Smart Grid.	31
1.7.4	Embedding Privacy Protection into the Design and Implementation of “Smart Grid”.	32
	References.	36
2	Legal Protection of Personal Data in Smart Grid and Smart Metering Systems from the European Perspective	41
	Vagelis Papakonstantinou and Dariusz Kloza	
2.1	Introduction	41
2.2	The Rationale and <i>Modus Operandi</i> for the EU Action Concerning Smart Grid and Smart Metering Systems	43
2.3	The EU Regulatory Framework for Smart Grid and Smart Metering Systems	46
2.3.1	The Legally Binding Framework	46
2.3.2	The Non-binding Framework	53
2.4	Actors in the Field of Energy Regulation in the EU	58
2.4.1	European Commission—Directorate-General for Energy (DG ENER).	58
2.4.2	Smart Grids Task Force (SGTF).	59
2.4.3	Agency for the Cooperation of Energy Regulators (ACER).	59
2.4.4	National Regulatory Authorities in the EU/EEA	60
2.4.5	Selected European Organizations and Associations of Industry.	62
2.4.6	Selected European Standardization Bodies	63
2.5	Legal Framework for Personal Data Protection in the EU	63
2.5.1	Context and Background of the Data Protection Law in Europe	63
2.5.2	Basic Data Protection Terminology	67
2.5.3	Data Protection Principles	67
2.5.4	The Rights of the Individuals with Regard to Processing Their Personal Data.	70
2.5.5	The Reform of the EU Data Protection Framework.	71
2.6	The Interaction of Smart Grid and Smart Metering Systems with Data Protection Law	73
2.6.1	Application of the Data Protection Law for Smart Grid and Smart Metering Systems	73
2.6.2	Distinction Between Data Processors and Data Controllers.	74
2.6.3	The Purpose Limitation Principle	76
2.6.4	Data Storage	77
2.6.5	Fair and Lawful Processing of Personal Information	77

2.6.6	The Principle of Proportionality	77
2.6.7	Data Quality.	78
2.6.8	Monitoring and Oversight of Smart Grid Data Controllers	78
2.6.9	The Scope and Exercise of the Data Subject's Rights	79
2.6.10	Legal Basis for Processing—Subscribers' Consent . . .	83
2.6.11	Security and Confidentiality of Data Processing	84
2.7	The Non-binding EU Regulatory Framework for Personal Data Protection in Smart Grid and Smart Metering Systems . . .	86
2.7.1	Opinions and Recommendations	86
2.7.2	Data Protection Impact Assessment Template for Smart Grid and Smart Metering Systems	101
2.8	Tools for the Protection of Privacy and Personal Data	107
2.8.1	Privacy by Default	107
2.8.2	Privacy by Design (PbD).	108
2.8.3	Privacy Enhancing Technologies (PET).	110
2.8.4	Transparency Enhancing Tools (TET)	111
2.8.5	Privacy Impact Assessment (PIA).	112
2.8.6	Legal Protection by Design (LPbD).	114
2.8.7	Privacy Certification	114
2.8.8	Overview of Applicable Privacy-Friendly Algorithms for Smart Metering.	116
2.8.9	Going Beyond Mere Privacy: Technology Assessment (TA)	121
2.9	Consumer Empowerment.	122
2.10	Case Studies	124
2.10.1	The Netherlands	124
2.10.2	The United Kingdom	126
2.11	Observations: Key Points.	126
