

# PROGRAMME

**Thursday, April 19, 2001**

<b>9.30-10.30</b>	<b>Opening session</b>	<b>(room 1)</b>
	Word of welcome	
	<i>Rhind D, United Kingdom:</i>	
	Global and national Geographic Information policies, practice and education in a g-business world	15
<b>11.00-12.30</b>	<b>Plenary session 1, GI policies</b>	<b>(room 1)</b>
	<i>Craglia M, Annoni A (United Kingdom/Italy):</i>	
	Towards the development of a Geographic Information Policy for the European Commission	28
	<i>Craglia M, Dallemand J-F, Masser I (United Kingdom/Italy/The Netherlands):</i>	
	The role of geographic information in facilitating accession into the European Union	38
	<i>Konecny M, Stanek K (Czech Republic):</i>	
	SDI in Czech Republic: Portal age	51
	<i>Valpreda E, Cremona G, Venditti A, Milillo A (Italy):</i>	
	A Shared GIS for the Hydrological Risk Management at National Level	57
<b>13.30-14.30</b>	<b>Working group meeting, Environmental modelling</b>	<b>(room 1)</b>
<b>13.30-14.30</b>	<b>Working group meeting, Education</b>	<b>(room 2)</b>
	<i>Toppen F (The Netherlands):</i>	
	Towards an AGILE Working Group on GI Education	67
	<i>Johnson A (USA):</i>	
	Pedagogical Approaches to Teaching GIS: "Hook Them or Sink Them"	68
	<i>Johnson A (USA):</i>	
	GIS and Distant Education - Using the Virtual Campus to Expand University GIS Programs	72
	<i>Salvemini M, Toppen F (Italy/The Netherlands):</i>	
	Certification of the GI professional, an issue (again) or not (yet)?	73
<b>14.30-16.00</b>	<b>Plenary session 2, Environmental modelling</b>	<b>(room 1)</b>
	<i>Bogner D, Dabernig M, Koren G (Austria):</i>	
	Assessment of Agricultural Landuse in Urban Regions as a Decision Support System Using Web-GIS	74
	<i>Suarez J, Evans S, Randle T, Henshall P, Houston T, Gardiner B, Dunham R (United Kingdom)</i>	
	The development of a generic framework for model integration in forest management.	
	The UK Forestry Commission CoreModel programme	79
	<i>Clare J, Ray D (United Kingdom):</i>	
	A Spatial Model of Ecological Site Classification for forest management in Britain	93
	<i>Haase m, Beuerle R, Barnikel G, Moser M, Stegmaier A (Germany):</i>	
	Evaluation of the Ecomorphological Quality of Running Waters using a GIS	112
	<i>Laube P (Switzerland):</i>	
	A Classification of Analysis Methods for Dynamic Point Objects in Environmental GIS	121
<b>16.30-18.00</b>	<b>Parallel session 1, Socio-economic modelling</b>	<b>(room 1)</b>
	<i>Benenson I, Omer I, Hatna E (Israel):</i>	
	Agents in GIS environment – Modeling Urban Population Distribution	135

<i>Bittner S (Austria):</i> An agent-based architecture for the simulation of social reality in a cadastre	145
<i>Staunstrup J K (Denmark):</i> Generalization of Cadastral CHanges	156
<i>Morojele N, Krygsman S, de Jong T (South Africa/The Netherlands):</i> An evaluation of retail potential using GIS-based Decision Support functionality; a case study of Cape Town, South Africa.	165
<i>de Jong T, Maritz J, van Eck J R (The Netherlands/South Africa):</i> Using optimisation techniques for comparison of the accessibility criteria of facility siting scenarios; a case study of siting police stations in South Africa's Bushbuckridge area.	177
<b>16.30-18.00 Parallel session 2, Location based and mobile services</b>	<b>(room 2)</b>
<i>Corona B, Winter S (Austria):</i> Navigation information for pedestrians from city maps	189
<i>Reinhardt W, Joos G (Germany):</i> Concept of a GIS and location based services for mountaineers	198
<i>Timpf S (Switzerland):</i> The Information Broker: Problem-solving knowledge for location-based services	203
<i>Maula H (Finland):</i> Mobile GIS and Multimedia as Fieldwork Support in Helsinki Water	205
<i>Lehto L, Kahkonen J (Finland):</i> Multi-purpose Publishing of Geodata in the Web	209

## Friday, April 20, 2001

<b>09.00-10.30 Parallel session 3, Spatial data infrastructure</b>	<b>(room 1)</b>
<i>Reicken J (Germany):</i> The improvement of the access to public geospatial data of cadastral and surveying and mapping as a part of the development of a NSDI in Northrhine-Westfalia, Germany	215
<i>Karnavou E, Gritzas G (Greece):</i> Assessing achievements and prospects of GI and GIS in Greece: Towards a generic conceptual framework	222
<i>Bernabe M A, Gould M, Muro-Medrano P R, Nogueras J, Zarazaga F J (Spain):</i> Effective steps toward the Spain National Geographic Information Infrastructure.	236
<i>Ionita A (Romania):</i> The premises for the building of Geographical Information Infrastructure in Romanian's Society of the 21st Century	244
<i>Gouveia C, Henriques P, Nicolau R, Rocha J, Santos M (Portugal):</i> Moving from CEN TC 287 to ISO/TC 211 - The approach of the Portuguese National Geographic Information Infrastructure	260
<i>Bielecka E (Poland):</i> Potential Users of the Polish Information System and Their Needs in the Field of Spatial Information	270
<b>09.00-10.30 Parallel session 4, Young researcher's forum</b>	<b>(room 2)</b>
<i>Kolodziej K (USA):</i> Using the Unified Modeling Language (UML) to Model Distributed GIS Components for Improving Interoperability	274

<i>Bucher B (France):</i> A Model to Store and Reuse Geographic Application Patterns	289
<i>Campagna M, De Montis A (Italy):</i> Geographic Spaces / Digital Places: Towards a Communicative Approach for Urban and Regional Planning	296
<i>Ostlaender N (Germany):</i> Evaluating the suitability of digital datasets for cause studies on nutrient contents of a specific region - Focused on satellite imagery (IRS –1D) and ATKIS data	314
<i>Fahller M (Sweden):</i> Geostatistics for marine geological mapping	318
<i>Schroeder L (Denmark):</i> Data Quality Declarations concerning Building Objects in Maps and Registers	320
<i>Tikunov A V (Russia):</i> Cartographic Evaluation of Innovation Potential	322
<i>Trnka J (Sweden):</i> HAZMAT Transportation Routing, Monitoring and Incident Solving in GIS Environment	327
<b>11.00-12.30 Plenary session 3, Interoperability I</b>	<b>(room 1)</b>
<i>Dessard V, Margoulies S (Belgium):</i> Interoperability on the Web ! (Using OpenGIS Interfaces)	345
<i>Cantan O, Casanovas M, Gutierrez J, Nogueraz J Zarazaga F J (Spain):</i> Joining Geographic Catalog Services and Map Servers with GIS applications	347
<i>Bernard L, Einspanier U, Streit U (Germany):</i> Developing OpenGIS Catalog Services for a GDI - Lessons learned	355
<i>Friis-Christensen A (Denmark):</i> Modeling Geographic Data Using UML	361
<i>Wei S, Joos G, Reinhardt W (Germany):</i> Management of spatial features with GML	370
<b>13.30-14.30 Working group meeting, Interoperability</b>	<b>(room 1)</b>
<b>13.30-14.30 Working group meeting, GI policy</b>	<b>(room 2)</b>
<b>14.30-16.00 Parallel session 5, Interoperability II</b>	<b>(room 1)</b>
<i>Wirtz D (Switzerland):</i> Pluggable Terrain Module - An implementation architecture for distributed digital terrain modeling	376
<i>Hakimpour F, Timpf S (Switzerland):</i> Using Ontologies for resolution of Semantic Heterogeneity in GIS	385
<i>Bernard L, Wytzisk A, Streit U (Germany):</i> Dynamic Interoperable GeoProcessing and Geosimulation - Scenarios, FRameworks, AND prototypes	396
<b>14.30-16.00 parallel session 6, Planning</b>	<b>(room 2)</b>
<i>Geertman S (The Netherlands):</i> An Internet-based inventory of Planning Support Systems: some tentative results	400
<i>Jiang B, Huang B, Vasek V (Sweden/Czech republic):</i> Geovisualisation for Planning Support Systems	404

Pundt H, Moltgen J (Germany): GI-Components to Support Participation in Environmental Planning Processes	415
<b>16.30-18.00 Parallel session 7, Environmental modelling and remote sensing</b>	<b>(room 1)</b>
Shanker G H (India): Terrain Evaluation for Eco-Restoration using Remote Sensing and GIS	424
Mostaccio C, Laurini R (Argentina/France): Structuring and Indexing Field-oriented Databases	435
Sobchuk R (Russia): Geological hazards at coastal zones modelling based on Remote Sensing Data for Intelligent Environmental Emergency & Risk Management Systems Toolbox	449
Luoto M, Toivonen T, Heikkinen R K (Finland): Prediction of total and rare plant species richness from satellite images and GIS data in agricultural landscapes	456
Markov N, Napryushkin A (Russia): Self-organizing GIS for solving problems of ecology and landscape studying	462
<b>16.30-18.00 Parallel session 8, GI in the new economy</b>	<b>(room 2)</b>
Senkler K, Remke A (Germany): Requirements of interoperable e-commerce services within an infrastructure for distributed GI-Services	468.
Gabriel P, Wagner R (Germany): GIS meets E-Commerce: First Steps towards a General Architecture for Geodata Markets	476
Brox C, Kuhn W (Germany): Marketplaces for Geographic Information	487
Banares J A, Alvarez P, Cantan O, Fernandez P, Casanovas M, Muro-Medrano P R (Spain): Integration of location-based services for Field support in CRM	501
Frank A U, Martinez-Asenjo B (Austria): The Transformation of NMAs from Government Departments to Independent Organizations: An Economic Overview	509
<b>Saturday, April 21, 2001</b>	
<b>9.00-10.30 Parallel session, GI processing and usability</b>	<b>(room 1)</b>
Castelloe D, Mooney P, Winstanley A (Ireland): Multi-Objective Optimisation on Transportation Networks	523
Brindley P, Fryers P, Maheswyrn R, Wise S (United Kingdom): An empirical study to assess the accuracy of simple aerial interpolation methods	531
Podobnikar T, Ostir K, Stancic Z, Veljanovski T (Slovenia): Archaeological Predictive Modelling in Cultural Resource Management	535
de Bruin S (The Netherlands): The value of spatial information – Decision-analytical assessment of a quality component	545
O'Donoghue D, Winstanley A (Ireland): Finding Analogous Structures in Cartographic Data	553
<b>9.00-10.30 Parallel session 10, Visualisation</b>	<b>(room 2)</b>
Quingwen Q P R (China): Application of GeoObject-Graphic-Pattern (TUPU) in Cartographic Generalization	561

<i>van Oosterom P, Tijssen T, Alkemade I, de Vries M (The Netherlands):</i> Multi-source Cartography in Internet GIS	562
<i>Gadal S, Nicolas G (France/Switzerland):</i> Locus-Object Semantic in Digital Cartography.	574
<i>Emmer N (The Netherlands):</i> Determining the effectiveness of animations to represent geo-spatial temporal data: a first approach	585
<b>11.00-12.00 Plenary session 4, Strategic questions</b>	<b>(room 1)</b>
<i>Annoni A (Italy):</i> European Projections Interoperability	590
<i>Moellering H (USA):</i> Analytical Cartography: Past, Present, and Future	599
<i>Gould M, Herring J (Spain/USA):</i> Redefining GIS	615
<b>12.00-13.00 AGILE business meeting (chair: Mauro Salvemini)</b>	
<b>Poster session</b>	
<i>Wegner H (Germany):</i> Developing a GIS-based Cadastral Map for Compensatory Landuses	621
<i>Tikunov V, Berdnikov K (Russia):</i> Experimental determination of semantic space in Geographic Information Sciences	628
<i>Bortone N, Virgilio G (Italy):</i> GIS Platform Oriented Towards the Building Restoration and Regeneration Processes of the Historical and Architectural Heritage Protection	634
<i>Kolodziej K (USA):</i> Intelligent Agents in a Distributed GIS for Improving Interoperability	641
<i>Ali D, Angryk R, Bjursell J, Cobb M, Gibutowski M, Kolodziej K, Paprzycki M, Rahimi S (USA/Poland):</i> Comparison of Mobile Agent Frameworks for Distributed Geospatial Data Integration	643
<i>Charvat K, Krivanek Z, Holy S, Gnip P, Fryml J (Czech Republic):</i> Wireless supporting of agricultural and forestry information systems – WirelessInfo	656
<i>Dominiguez J, Navarro J, Marti I, Garcia C (Spain):</i> Environmental Modeling for wind farm location using desktop GIS	667
<i>Alvares P, Banares J A, Bejar R, Blasco S, Latre M A (Spain):</i> Integration of MapServer capabilities in an Automatic Vehicle Monitoring System to extend access through the Internet	676
<i>Blat J, Navarrete T (Spain):</i> The CD-ROM ATLES DE LES ILLES BALEARS: Methodological, Usability and Programming Issues when Using Web-based Multimedia for Exploring and Teaching Geographical Information	683
<i>Bejar R, Fernandez P, Latre M A, Muro-Medrano P R, Rioja R, Zarazaga J (Spain):</i> Interoperation of distributed GIS components in a Hydrological Data Inventory System	685
<i>Keyes L, Winstanley A (Ireland):</i> A Comparison of Methods used for Cartographic Object Classification	693

Klenov V I (Russia): Information demands for multi-scale river basin simulation for flood monitoring and forecasting	695
Oinonen K (Finland): The Planner's TOOLBOX	699
Stanek K (Czech Republic): Cartographic Generalisation as a Interoperability Issue	707
<i>Friedmannova L, Konecny M, Stanek K, Vasek V, Vesely M (Czech Republic):</i> CASTOR – System for Automated Cartographic Analysis and Visualization	711
<i>Zgarba V (Czech Republic):</i> PUKNI project – easy and efficient work with data of the land and property register	712
<i>Zgarba V (Czech Republic):</i> LHK SSL – GI systém for the state administration in forestry	712
<i>Zgarba V (Czech Republic):</i> Echo Local – SW provides monitoring and managing of the safety system	712
<i>Hoffman G, Hoffman F (Germany):</i> From ADAPT via INTERREG to GI2001	713
<i>Deplano G, Campagna M, De Montis A (Italy):</i> Regional and local planning system monitoring. The GIS as support in spatial development management.	715
<i>Zakharova A A, Kovin R V, Markov N G, Spitsyn V G (Russia):</i> Geoinformation system for modeling processes of surface waters infiltration into geological medium	720
<i>Friedmannova L (Czech Republic):</i> Multiconditional Visualization of Geographic Data	726
<i>Bonini E S, Eremitaggio A M, Maggi T, Moretti C (Italy):</i> Hydrogeological Hazard Map in a District of Rome Area: an Overview	733
<i>Rothova H (Czech Republic):</i> Comparison of Digital Terrain Models from Hydrological Point of View	739
<i>Wysocka E (Poland):</i> Concept of the Polish Spatial Information System	742
<i>Sen S (India):</i> Interoperability Factor in Natural Language Interfaces to GIS	753
<i>Alexeenko N (Russia):</i> Landscape planning and its cartographical support	758
<i>Slaboch V, Hnojil J (Czech Republic):</i> Activities of VUGTK in the Field of National Administrative Boundaries Policy	759
<i>Hajek M, Chalachanova J, Cernansky J (Slovakia):</i> Integration of Sources Spatial Data for Agricultural Database	760
<i>Mitasova I, Fencik R, Kozuch M (Slovakia):</i> Updating of position the objects in the agricultural geoinformation system	768
