List of Tables, Figures, and Concordances xi
Acknowledgements xiii

Introduction 1

1 Corpus Stylistics 5
Introduction 5
1.1 Shared ground and innovation 7
1.1.1 Foregrounding theory and corpus norms 8
1.1.2 The philological and the corpus stylistic circle 11
1.1.3 The stylistician's toolkit and units of description 14
1.2 Examples of corpus stylistic work 18
1.3 Entering the corpus stylistic circle for the study of Dickens's fiction 23
Conclusions 24

2 Textual Building Blocks of Fictional Worlds 26
Introduction 26
2.1 Memorable characters in the Dickensian world 27
2.2 Characterisation and text worlds 31
2.3 Induction and abstraction in the corpus stylistic circle 36
2.4 A text-driven approach to textual building blocks of fictional worlds 39
Conclusions 41

3 Starting with the Texts: Corpora, Clusters, and Lexical Bundles 42
Introduction 42
3.1 Texts and corpora 42

3.2 Defining and retrieving clusters—Initial examples 44
3.3 Approaches to clusters and functional interpretations 48
3.4 Lexical bundles or clusters for the study of Dickens's fiction? 51
3.4.1 Lexical bundles in fiction 51
3.4.2 Increasing the length of clusters 56
Conclusions 60

4 Groups of Clusters for the Identification of Local Textual Functions 62
Introduction 62
4.1 Quantifying, comparing, and classifying clusters 62
4.2 Key clusters and the distribution of clusters across texts 64
4.3 An operational definition of cluster groups 66
4.4 Distributions of cluster groups 67
4.4.1 Cluster categories in DCorp 68
4.4.2 Cluster categories in 19C 71
4.5 'Key groups' of clusters 73
Conclusions 74

5 Character Speech 75
Introduction 75
5.1 Functions of Speech clusters 76
5.1.1 Negotiating information 77
5.1.2 Turn-taking 78
5.1.3 Politeness formulae 80
5.1.4 First-person narration 81
5.1.5 Contextualising and highlighting functions 82
5.2 Phrasal impoliteness and confrontation 83
5.3 Functions in context: Pickwickian clashes and confrontation in *Oliver Twist* 90
5.4 Vague language and other examples of interpersonal meanings 95
Conclusions 99

6 Body Language 100
Introduction 100
6.1 Korte's (1997) framework for the analysis of body language 101

6.2 Body language and characterisation 103
6.3 From Body Part clusters to body language 105
6.4 The body language cline 110
6.4.1 The 'fireplace pose' 111
6.4.2 Gaze behaviour: *eyes* 114
6.4.3 Touch behaviour and authentication: *his hand upon his shoulder* 117
6.4.4 Empty body language? 118
6.4.5 Body language functioning as labels and thematic cues 119
Conclusions 126

7 *As If* and the Narrator Comment 128
Introduction 128
7.1 Clusters and fanciful meanings 128
7.2 Collocates and patterns of narrator comments 131
7.2.1 Action verbs, body part nouns, and settings 134
7.2.2 Manner 137
7.2.3 LOOK 141
7.2.4 SPEAK 143
7.2.5 Significant collocates—Extending the meaning groups 145
7.3 Lexically driven descriptions of body language 148
Conclusions 151

8 Labels: Contextualising and Highlighting Functions 152
Introduction 152
8.1 Groups of Labels and their functions 152
8.1.1 Reporting Speech Labels 153
8.1.2 Speech Labels 155
8.1.3 Body Language Labels 155
8.1.4 Attributes 155
8.1.5 Long clusters 156
8.1.6 Names of people and places 157
8.1.7 Labels and the highlighting and contextualising continuum 158
8.2 Labels in context: The example of Rigaud 159
Conclusions 163

9 Conclusions and Outlook 164
9.1 Characters in the text-driven fictional world 164
9.2 The cluster and beyond 166
9.3 Suspensions 168
9.3.1 Suspensions and the *as if* cline 168
9.3.2 Concordancing suspensions 172
9.4 Towards a mixed methods approach 175

Appendices
1 Texts in 19C 179
2 Texts in 36N 180
3 Cluster groups for shared key clusters (19C and 36N) 181
4 432 L clusters (occurring at least 5 times in one DCorp text) in alphabetical order 183
5 108 S clusters (occurring at least 5 times in one DCorp text) in alphabetical order 193
6 19 BP clusters (occurring at least 5 times in one DCorp text) in alphabetical order 196
7 14 AI clusters (occurring at least 5 times in one DCorp text) in alphabetical order 197
8 59 TP clusters (occurring at least 5 times in one DCorp text) in alphabetical order 198
9 84 d clusters (occurring at least 5 times in one DCorp text) in alphabetical order 200
