

List of presentations

Use of the Chemcatcher for detecting sources of metaldehyde in river catchments	15
Calibration and deployment of POCIS and Chemcatcher for the monitoring of explosives on lake-bottom sediments	16
A passive sampling tool for the time integrative monitoring of perfluoroalkyl substances in aqueous environments	17
Diffusive characteristics of microporous polyethylene tubes and its application for the passive sampling of glyphosate and AMPA	18
Is the divinylbenzene passive sampler a useful tool for measuring hydrophilic endocrine disrupting compounds in the marine environment?	19
Measuring the external organic chemical exposome using non-selective passive sampling devices and high-resolution chemical analysis	20
Non targeted screening in POCIS extracts using high resolution full scan combined with data independent high resolution product scan	21
Influence of fouling on trace elements quantification by DGT exposure in rivers.	22
Use of polymeric passive sampling devices to evaluate removal of household and personal care ingredients through a lake system	23
Transport of urban-derived organic contaminants into boreal lake	24
Investigating methods for in fish tissue equilibrium passive sampling of POPs	25
An investigation on the influence of fouling on the uptake and release process in partition passive sampling	26
Combined impacts of experimental conditions on the accumulation kinetics of pesticides in PDMS-coated stir bars used as passive samplers in freshwaters	27
Modification of passive samplers for narrow drill – holes for control pesticides on agriculture	28
Mobile passive sampling with SPMDs for the measurement of organic micropollutants in seawater	29
Using a mobile passive sampling device for chemical and toxicological screening of the Danube River	30

Continuous Flow Integrative Sampler (CFIS): integrative sampling of a wide range of organic contaminants in surface and drinking waters	31
Molecular Modelling of the Interaction of Environmental Contaminants with Solid Phase Extraction Sorbent Materials	32
Development of a passive sampler for polar organic compounds in water based on diffusive gradient in agarose hydrogel	33
Calibration and laboratory test of different passive sampling approaches for the determination of 20 priority and emerging compounds in seawater and the use of performance reference compounds	34
Atrazine sampling by POCIS: a case study	35
2001-2016: SBSE dedicated to the characterization and the analysis of environmental matrices	36
In-situ POCIS calibration in different seasonal conditions	37
Development of a Polar Organic Integrative Sampler for the analysis of poly- and perfluoroalkyl substances (PFASs) in surface waters	38
Integration of contamination peaks with variable intensity and duration by the Polar Organic Chemical Integrative Sampler	39
The application of passive sampling to monitoring of plant protection substances and pharmaceuticals in ground water	40
Active versus passive sampling: are passive samplers a viable alternative to monitor flood events and estimate mass loads of pesticides?	41
Small streams exposure conditions effect on accumulation of pesticides and pharmaceuticals: POCIS quantitative results reliability	42
Pore water and accesible concentrations of hydrophobic contaminants in Danube river sediments estimated by multi-ratio equilibrium passive sampling	43
Time-integrative properties of passive sampling for chemical monitoring and application in bioassays	44
Contamination hotspots in rivers identified by silicone-based passive sampling	45
Can suspended particulate matter traps be coupled with passive sampling in the North Sea?	46
Occurence of flame retardants in Czech Rivers	47

Comparison of river water monitoring using spot water sampling and continuous monthly exposed passive sampling utilising SPMD and POCIS samplers	48
Implementation of a simulated controlled flux for the calibration of POCIS in the detection of selected pesticides	49
Rs calibrations for polar samplers: do it under controlled Kw conditions	50
Calibration of stir bar sorptive extraction (SBSE) passive sampler for the monitoring of hydrophobic organic pollutants in water	51
Chemcatcherpassive sampler for monitoring acidic herbicides in a river catchment in South West England	52
Pollution problems in the Slovakia	53
The Surface Water Pollution Study in Kakheti Region	54
Development of a passive sampler to trace polar organic pollutants at low flow velocities along hyporheic flow paths	55
Modified POCIS and Chemcatcher versions for time-integrated monitoring of perfluorinated compounds in surface water and wastewater effluent	56
Comparative application of polyethersulfone- and silicone-based passive samplers to monitor persistent organic pollutants in a tropical river	57
Comparison of the POCIS and Horizon Atlantic Chemcatcher passive samplers for the uptake of pharmaceutical compounds	58
Development of a DGT device for measuring organotin compounds in sediment pore-waters	59
Silicone prostheses for the assessment of human exposure to selected Stockholm Convention POPs	60
PAH accessibility in urban particulate matter assessed with passive samplers	61
Targeted screening of polar emerging pollutants in Czech rivers	62
QUASIMEME Laboratory Performance Study for passive sampling of nonpolar chemicals in water	63
Applicability of polydimethylsiloxane and polyethersulfone as passive sampler of non-polar compounds in intertidal estuarine environments	64
