

TABLE OF CONTENTS

ABSTRAKT.....	3
ABSTRACT.....	3
THEORETICAL BACKGROUND.....	6
Introduction.....	6
1. Synthetic biodegradable polymers.....	7
1.1. Degradation of biodegradable polymers.....	8
1.1.2. Biocompatibility.....	9
1.2. Polymers based on poly(lactic acid)	10
1.2.1. Synthesis of PLA - Polycondensation.....	10
1.2.2. Applications.....	13
1.3. Synthesis and modifications of polyanhydrides.....	13
AIMS OF WORK.....	16
2. Experimental part.....	17
2.1. Novel poly(lactic acid)-poly(ethylene oxide) chain-linked copolymer and its application in nano-encapsulation.....	17
2.2. Synthesis of poly(sebacic anhydride): effect of various catalysts.....	25
2.3. Characterization of biocompatible non-toxic polyester urethanes based on poly(lactic acid)-poly(ethylene glycol) and L-Lysine diisocyanate.....	29
SUMMARY OF WORK.....	35
CONTRIBUTIONS TO SCIENCE AND PRACTICE.....	36
LIST OF FIGURES.....	37
LIST OF TABLES.....	37
LIST OF ABBREVIATIONS.....	38
REFERENCES.....	39
CURRICULUM VITAE.....	48
LIST OF PUBLICATIONS.....	50
