List of Figures and Tables vii

Preface xi

List of Symbols xvii

1. Why Study Electoral Systems? 1

Description of Electoral Systems

2. General Features of Electoral Systems 9

3. Variables in Electoral Systems 19

4. New Zealand and Finland 38

5. History of the Study of Electoral Systems 47

Empirical Analysis of Electoral Systems

6. How to Study Electoral Systems 61

7. Proportionality Profiles of Electoral Systems 67

8. The Effective Number of Parties 77

9. Issue Dimensions and Inverse Square Law of Coalition
Durability 92

10. Deviation from Proportionality 104

11. Magnitude: The Decisive Factor 112

12. Adjustment Seats, Thresholds, and Effective Magnitude 126

- 13. Generalized Duverger's Rule 142
- 14. From the Cube Rule to the Seat–Vote Equations 156
- 15. The Cube Root Law of Assembly Sizes 173
- 16. The Law of Minority Attrition and Prediction of Proportionality
Profiles 184

Conclusions

- 17. Overview of Components and Relations in Electoral
Systems 201
- 18. Designing Electoral Systems 218
- 19. Implications for the Scientific Study of Politics 238

Appendixes

- A. Election Results in New Zealand and Finland 247
- B. On Methodology 252
- C. On Operationalization of Variables 258
- D. On Relations among Variables 270

Bibliography 279
