ESERA	5
ESERA Summer Schools	6
ESERA Summer School 2016	7
The venue – České Budějovice	7
University of South Bohemia.....	9
Venue – map of campus.....	11
Travel information.....	12
Organizing Committee of ESERA 2016	14
Schedule of ESERA Summer School 2016	16
List of reviewers	17
List of participants.....	18
List of staff.....	24
Synopsis.....	27
Session A: Assessment and Evaluation	28
Explaining Difficulties in Large-Scale Science Assessments (<i>Stephan Daus</i>).....	29
Challenges and prospects in teachers' use of formative assessment for lower secondary school students' modeling competence in Biology (<i>Sanne Schnell Nielsen</i>).....	33
Session B: Biology Education.....	37
Looking at Models of and for Evolution: Visual Perception Processes and Representational Competence with Phylogenetic Trees (<i>Inga Ubben</i>).....	38
Interactions between Argumentation and Modelling in Genetics' Instruction about Human Diseases (<i>Noa Ageitos Prego</i>).....	42
Pupils' Conceptions of Biological Evolution throughout Secondary School in France (<i>Magali Coupaud</i>).....	46
What type of prior knowledge makes students successful? – Prior knowledge as a predictor for academic success in biology and physics (<i>Torsten Binder</i>)	50
Using Incorrect Representations to Enhance the Understanding of Energy in Biology (<i>Ulrike Wernecke</i>).....	54

Using Digital Storytelling in Biology teaching (<i>Dokopoulou Maria</i>)	58
Teaching about the nature of science and scientific practices through laboratory work (<i>Mari Sjoberg</i>).....	62
Incorporating nature of science into pre-service science teacher education (<i>Alison Cullinane</i>).....	68
Session C: Chemistry Education	73
Research Project: Context Characteristics and their Influence on Students' Situational Interest and Understanding in Chemistry Education (<i>Sebastian Habig</i>)	74
Transfer of knowledge in situated learning environments in the chemistry classroom (<i>Franziska Kehne</i>)	78
Visual model comprehension as a predictor for academic success in chemistry and engineering (<i>Thomas Dickmann</i>).....	82
Mathematization in chemistry questions (<i>Lennart Kimpel</i>).....	87
How do chemistry teachers implement inquiry-based learning in their classes? (<i>Elisabeth Hofer</i>)	91
The Relationship between Prior Knowledge, Aim Orientation and Course Achievement in the Undergraduate Chemistry Lab (<i>Thomas Elert</i>).....	95
Primary Education Pupils' Scientific Literacy Development with a Focus on Chemistry (<i>Iva Metelková</i>).....	99
Session D: Educational Technology.....	103
Video Hooks in the Science Classroom (<i>Martin McHugh</i>).....	104
Teacher-learner-simulation interaction in primary-level science instruction (<i>Antti Lehtinen</i>)	108
Do dynamic visualizations of threshold concepts affect understanding of evolution? (<i>Andreas Göransson</i>).....	112
Session G: Cultural, Social, and Gender Issues.....	116
Multilingual Science Classrooms (<i>Annika Karlsson</i>)	117
White British Working-Class exclusion from science: Using Bourdieu's concepts of capital, habitus and field to explore why the white British working-class are underrepresented in science (<i>Lucy Yeomans</i>)	121
African American Females' Discourse Use and Identity Development in After School and School Science (<i>Katherine Wade</i>).....	124
Session H: History, Philosophy, and Sociology of Science	128
Enhancing Pre-service Science Teachers' Entrepreneurial Skills and Attitudes in Nature of Science and Science Education (<i>Sila Kaya</i>)	129

Session I: Science Learning in Informal Contexts.....	135
Investigating and Evaluating Outreach and Public Engagement Programmes, to Establish whether they can Improve/Enhance Scientific Literacy (<i>Laurie Ryan</i>)	136
Understanding the Learning Processes in Science Museums – A Longitudinal Study of Elementary School Students (<i>Neta Shaby</i>)	141
Science Identity Development through Supplemental Science Experiences (<i>Kathleen Hayes</i>)	145
Session L: Science Learning	149
Analyzing and promoting the explicit integration of values and evidence in students' decisions about diet election: the vegetarianism dilemma (<i>Pablo Brocos</i>).....	150
Fostering Concepts about the Nature of Science (NOS) in Inclusive Chemistry Classes using Universal Design for Learning (UDL) Principles (<i>Malte Walkowiak</i>)	154
The contribution of visualizations to construct scientific explanations about chemical reactions: a study with 8 th grade students (<i>Vanessa Andrade</i>)	159
Pupils' multimodal meaning making around speciation (<i>Johanna Frejd</i>)	164
The Impact of Science Career-focused Learning Materials on Students' Awareness of and Aspirations towards Science-related Careers (<i>Tormi Kotkas</i>).....	168
Investigation of the Effect of Simulation-Integrated Argumentation-Based Science Learning on Pre-Service Science Teachers' Conceptual Understanding about Force and Motion in Terms of Task Value (<i>Emine Gök</i>)	172
Session O: Other.....	176
How to Enhance the Striving for Knowledge and Self-Reliance of Highly Abled and Gifted Primary School Children in a Scientific Out-of-School Learning-Context? (<i>Marcus Bohn</i>).....	177
Elementary Teachers' Implementation of Novel Engineering Teaching Materials in Science Classrooms: Beliefs and Practices (<i>Ibrahim Yeter</i>)	181
Session P: Physics Education	186
Development of a computer-based assessment of physics teachers' explaining skills (<i>Hauke Bartels</i>).....	187
Learning about energy with worked-out examples and feedback (<i>Matylda Dudzinska</i>)	191
Science Teacher Students' and Physics Teachers' Views on Professional Knowledge (<i>Thomas Frågåt</i>)	196
Dialogic argumentation and physics learning in lower secondary classrooms (<i>Kaisa Jokiranta</i>) ...	200
Systemizing and Empathizing: Research on Early Years Science Education and Brain Types (<i>Nina Skorsetz</i>).....	205

Development and Validation of a Learning Progression of Basic Astronomy Phenomena (<i>Silvia Galano</i>)	209
Investigating Italian Science Teachers while Implementing Teaching Learning Sequences (<i>Alessandro Zappia</i>)	213
Development and Evaluation of the Hands-on Particle Physics Learning Laboratory S'COOL LAB at CERN: Role of Student and Laboratory Characteristics in Conceptual Learning and Satisfaction (<i>Julia Woithe</i>)	216
Physical and Mathematical Modelling Competence as Predictor for Success in Physics Degree Courses (<i>Joachim Müller</i>)	221
Analysis of motion in one or two dimensions – the impact of simulations and feedback (<i>Ingmar Klappauf</i>).....	226
Modern Physics in Secondary Education – Creating a Need for Theoretical Explanation (<i>Floor Kamphorst</i>)	230
Session S: Science Teacher Education	234
Teacher Training on Implementing a Module on RRI and Nanotechnology (<i>Emily Michailidi</i>)	235
Session T: Science Teaching	239
The Impact of Professional Development on the Practice of Experienced Physical Science Teachers Topic-Specific PCK in Stoichiometry (<i>Stephen Malcolm</i>).....	240
A comparative study of primary and secondary teachers' understanding of, and practice in, inquiry based science education (<i>Sally Howard</i>)	244
Exploring Teachers' Inquiry Practices and Students' Science Achievement in Philippine classrooms (<i>Dennis Danipog</i>)	248
A case study of the use of “on the fly” interactions between the teacher and the students as a means of formative assessment (<i>Michalis Livitziis</i>)	252
Acknowledgement	257
