# Contents

Introduction	5
How to use this book	6
Locations of case studies used in the book	7

<b>1: Hydrology and fluvial geomorphology</b>	<b>8–37</b>
The drainage basin system	10–15
Discharge relationships within drainage basins	15–20
River channel processes and landforms	20–29
The human impact	29–37

<b>2: Atmosphere and weather</b>	<b>38–59</b>
Diurnal energy budgets	40–41
The global energy budget	41–48
Weather processes and phenomena	48–52
The human impact	52–59

<b>3: Rocks and weathering</b>	<b>60–85</b>
Plate tectonics	62–68
Weathering	68–74
Slope processes	74–79
The human impact	79–85

<b>4: Population</b>	<b>86–107</b>
Natural increase as a component of population change	88–96
Demographic transition	96–98
Population-resource relationships	98–106
The management of natural increase	106–107

<b>5: Migration</b>	<b>108–129</b>
Migration as a component of population change	110–119
Internal migration (within a country)	119–124
International migration	124–129
The management of international migration	114–115

<b>6: Settlement dynamics</b>	<b>130–155</b>
Changes in rural settlements	132–137
Urban trends and issues of urbanisation	137–147
The changing structure of urban settlements	147–153
The management of urban settlements	153–155

<b>7: Tropical environments</b>	<b>156–177</b>
Tropical climates	158–162
Landforms of tropical environments	162–166
Humid tropical ecosystems and seasonally humid tropical ecosystems	166–173
Sustainable management of tropical environments	173–177

<b>8: Coastal environments</b>	<b>178–205</b>
Coastal processes	180–187
Characteristics and formation of coastal landforms	187–197

# Contents

Coral reefs	197–201
Sustainable management of coasts	201–205
<b>9: Hazardous environments</b>	<b>206–231</b>
Hazards resulting from tectonic processes	208–215
Hazards resulting from mass movements	215–219
Hazards resulting from atmospheric disturbances	219–225
Sustainable management in hazardous environments	225–231
<b>10: Hot arid and semi-arid environments</b>	<b>232–255</b>
Hot arid and semi-arid climates	235–242
Landforms of hot arid and semi-arid environments	242–250
Soils and vegetation	250–254
Sustainable management of hot arid and semi-arid environments	254–255
<b>11: Production, location and change</b>	<b>256–281</b>
Agricultural systems and food production	258–268
The management of agricultural change	268–271
Manufacturing and related service industry	271–278
The management of change in manufacturing industry	278–281
<b>12: Environmental management</b>	<b>282–307</b>
Sustainable energy supplies	284–291
The management of energy supply	291–295
Environmental degradation	295–302
The management of a degraded environment	302–307
<b>13: Global interdependence</b>	<b>308–337</b>
Trade flows and trading patterns	310–318
International debt and international aid	318–324
The development of international tourism	324–334
The management of a tourist destination	334–337
<b>14: Economic transition</b>	<b>338–367</b>
National development	340–351
The globalisation of economic activity	351–359
Regional development within countries	359–362
The management of regional development	362–367
<b>15: Geographical skills</b>	<b>368–384</b>
Diagrams and graphs	370–373
Maps	373–380
Satellite images and aerial photographs	380–380
Data types	380–384
<b>Glossary</b>	<b>385–399</b>
<b>Index</b>	<b>400–416</b>
<b>Acknowledgements</b>	<b>417–418</b>
<b>Key concepts</b>	<b>419</b>
