Preface xvi

Special Features of the Book xvii

About the Author xix

PART I: INTRODUCTION 1

Chapter 1. Fundamentals of Program Evaluation 3

The Nature of Intervention Programs and Evaluation: A Systems View 3

Classic Evaluation Concepts, Theories, and Methodologies: Contributions and Beyond 6

Evaluation Typologies 7

The Distinction Between Formative and Summative Evaluation 7

Analysis of the Formative and Summative Distinction 8

A Fundamental Evaluation Typology 10

Basic Evaluation Types 11

Hybrid Evaluation Types 13

Applications of the Fundamental Evaluation Typology 14

Internal Versus External Evaluators 14

Politics, Social Justice, Evaluation Standards, and Ethics 15

Evaluation Steps 17

Evaluation Design and Its Components 18

Major Challenges of Evaluation: Lessons Learned From Past Practice 20

Judge a Program Not Only by Its Results but Also by Its Context 21

Evaluations Must Address Both Scientific and Stakeholder Credibility 22

Evaluations Must Provide Information That Helps Stakeholders Do Better 23

Addressing the Challenges: Theory-Driven Evaluation and the Integrated Evaluation Perspective 25

Theory-Driven Evaluation Approach 25
Integrated Evaluation Perspective 26
Program Complexity and Evaluation Theories 30
Who Should Read This Book and How They Should Use It 31
Students 31
Evaluation Practitioners 32
Introducing the Rest of the Chapters 32
Questions for Reflection 33

Chapter 2. Understand Approaches to Evaluation and Select Ones That Work: The Comprehensive Evaluation Typology 35
The Comprehensive Evaluation Typology: Means and Ends 36
Stages in the Program Life Cycle 39
Dynamics of Transition Across Program Stages 41
Evaluation Approaches Associated With Each Stage 41
Planning Stage 42
Initial Implementation 42
Mature Implementation 43
Outcome Stage 43
Strategies Underlying Evaluation Approaches 44
Merit Assessment Strategies 46
Development Strategies 47
Applying the Typology: Steps to Take 51
Evaluation Ranging Across Several Program Stages 54
Dynamics of Evaluation Entries Into Program Stages 55
1. Single-Entry Evaluation 55
2. Multiple-Entry Evaluation 56
Questions for Reflection 57

Chapter 3. Logic Models and the Action Model/Change Model Schema (Program Theory) 58
Logic Models 58
Additional Examples of Applying Logic Models 61
Program Theory 65
The Action Model/Change Model Schema 66
Descriptive Assumptions 67
Prescriptive Assumptions 68
Components of the Change Model 70

Goals and Outcomes 71
Determinants 71
Intervention or Treatment 73
Components of the Action Model 74
Intervention and Service Delivery Protocols 74
Implementing Organizations: Assess, Enhance, and Ensure Their Capabilities 75
Program Implementers: Recruit, Train, and Maintain Both Competency and Commitment 76
Associate Organizations/Community Partners: Establish Collaborations 76
Ecological Context: Seek the Support of the Environment 77
Target Population: Identify, Recruit, Screen, Serve 78
Relationships Among Components of the Action Model/Change Model Schema 79
Applying the Action Model/Change Model Schema: An Example 82
Change Model 84
Action Model 84
Some Advantages of Using the Action Model/Change Model Schema 84
Facilitation of Holistic Assessment 84
Provision of Comprehensive Information Needed to Improve Programs 85
Delineation of a Strategy to Consider Stakeholders' Views and Interests 85
Flexible Application of Research Methods to Serve Evaluation Needs 86
Aid to Selecting the Most Suitable Approaches or Methods 86
Helping Stakeholders Gear Up (or Clear Up) Their Action Model/Change Model Schema 86
Reviewing Existing Documents and Materials 87
Clarifying Stakeholders' Theory 87
Participatory Modes for Development Facilitation 88
Theorizing Procedures for Development Facilitation 89
Preparing a Rough Draft That Facilitates Discussion 91
Applications of Logic Models and the Action Model/Change Model Schema 92
Questions for Reflection 92

PART II: PROGRAM EVALUATION TO HELP STAKEHOLDERS DEVELOP A PROGRAM PLAN 95

Chapter 4. Helping Stakeholders Clarify a Program Plan: Program Scope 97

The Program Plan, Program Scope, and Action Plan 97

Conceptual Framework of the Program Scope 98

Why Develop a Program Scope? 100

Strategies for Articulating the Program Scope 100

Background Information Provision Strategy and Approaches 101

Needs Assessment 101

Formative Research 102

The Conceptualization Facilitation Approach: A Part of the Development Facilitation Strategy 103

Working Group or Intensive Interview Format? 103

Theorizing Methods 104

Determinants and Types of Action Model/Change Model Schemas 109

Choosing Interventions/Treatments That Affect the Determinant 110

The Relevancy Testing Approach: A Part of the Troubleshooting Strategy 112

Research Example of Relevancy Testing 113

Moving From Program Scope to Action Plan 115

Questions for Reflection 116

Chapter 5. Helping Stakeholders Clarify a Program Plan: Action Plan 117

The Action Model Framework and the Action Plan 117

Strategies for Developing Action Plans 120

The Formative Research Approach (Under Background Information Provision Strategy) 120

Example of Formative Research 121

The Conceptualization Facilitation Approach (Under Development Facilitation Strategy) 122

1. Implementing Organization: Assess, Enhance, and Ensure Its Capacity 123

2. Intervention and Service Delivery Protocols: Delineate Service Content and Delivery Procedures 124

3. Program Implementers: Recruit, Train, and Maintain for Competency and Commitment 126

4. Associate Organizations/Community Partners: Establish Collaborative Relationships 127

5. Ecological Context: Seek the Support of the Environment 128
6. Target Population: Identify, Recruit, Screen, and Serve 130
Application of the Conceptualization Facilitation Strategy 133
Example 1: A Garbage Reduction Program 133
Example 2: An HIV-Prevention Program 136
The Pilot-Testing Approach 141
Defining Pilot Testing 141
Conducting Pilot Testing 142
Designing Pilot Testing 143
The Commentary or Advisory Approach 146
Questions to Inform the Evaluator's Commentary on a Program Scope 146
Questions to Inform the Evaluator's Commentary on an Action Plan 147
Summary 148
Questions for Reflection 149

PART III: EVALUATING IMPLEMENTATION 151

Chapter 6. Constructive Process Evaluation Tailored for the Initial Implementation 153
The Formative Evaluation Approach (Under the Troubleshooting Strategy) 154
Timeliness and Relevancy 155
Research Methods 155
Steps in Applying Formative Evaluation 156
Four Types of Formative Evaluation 158
Formative Evaluation Results: Use With Caution 164
The Program Review/Development Meeting (Under the Troubleshooting Strategy) 165
Program Review/Development Meeting Principles and Procedures 166
Program Review/Development Meeting Advantages and Disadvantages 167
Example of a Program Review/Development Meeting 169
Bilateral Empowerment Evaluation (Under the Development Partnership Strategy) 171
Evaluation Process 172
Example of Bilateral Empowerment Evaluation 172
The Evaluator's Role 173
Pros and Cons of Bilateral Empowerment Evaluation 174
Questions for Reflection 174

Chapter 7. Assessing Implementation in the Mature Implementation Stage 176
Constructive Process Evaluation and Its Application 177
Modifying or Clarifying a Program Scope and Action Plan 177
Troubleshooting Implementation Problems 179
Conclusive Process Evaluation and Its Applications 180
How to Design a Conclusive Process Evaluation That Fits Stakeholders' Needs 181
Approaches of Conclusive Process Evaluation 182
Intervention Fidelity Evaluation 183
Referral Fidelity Evaluation 184
Service Delivery Fidelity Evaluation 185
Target Population Fidelity Evaluation 186
Fidelity Versus "Reinvention" in Conclusive Process Evaluation 189
Hybrid Process Evaluation: Theory-Driven Process Evaluation 190
Examples of Theory-Driven Process Evaluation 191
Theory-Driven Process Evaluation and Unintended Effects 198
Questions for Reflection 199

PART IV: PROGRAM MONITORING AND OUTCOME EVALUATION 201

Chapter 8. Program Monitoring and the Development of a Monitoring System 203
What Is Program Monitoring? 203
Process Monitoring 204
Uses of Process-Monitoring Data 205
Process Monitoring Versus Process Evaluation 205
Outcome Monitoring 206
Identification of Goals 206
Outcome Measures and Data Collection 207
Outcome Monitoring Versus Outcome Evaluation 207
Program-Monitoring Systems Within Organizations 208
Program-Monitoring System Elements 209
Developing a Program-Monitoring System 210
An Example of Developing a Program Monitoring/Evaluation System 211
Questions for Reflection 229

Chapter 9. Constructive Outcome Evaluations 230
Constructive Outcome Evaluation 230
SMART Goals 231
Specific 232
Measurable 232
Attainable 232
Relevant 232
Time-Bound 233
Putting SMART Characteristics Together in Goals 233
Evaluability Assessment 234
Step 1: Involve the Intended Users of Evaluation Information 235
Step 2: Clarify the Intended Program 235
Step 3: Explore the Program's Reality 236
Step 4: Reach Agreement on Any Needed Program Changes 236
Step 5: Explore Alternative Evaluation Designs 236
Step 6: Agree on the Evaluation's Priority and How Information From the Evaluation Will Be Used 236
Plausibility Assessment/Consensus-Building Approach 237
Potential Problems of Evaluation That Are Based Mainly on Official Goals 237
Plausibility Assessment/Consensus-Building Approach 239
A Preview of Conclusive Outcome Evaluation: Selecting an Appropriate Approach 245
Questions for Reflection 246

Chapter 10. The Experimentation Evaluation Approach to Outcome Evaluation 247
The Foundation of the Experimentation Approach to Outcome Evaluation 247
The Distinction Between Internal Validity and External Validity in the Campbellian Validity Typology 248
Threats to Internal Validity 249
Research Designs for Ruling Out Threats to Internal Validity 250
Experimental Designs 251
Pre-Experimental Designs 253
Quasi-Experimental Designs 256
Questions for Reflection 258

Chapter 11. The Holistic Effectuality Evaluation Approach to Outcome Evaluation 260
Ongoing Debates Over the Experimentation Evaluation Approach 260
Efficacy Evaluation Versus Effectiveness Evaluation 263
Relationships Among the Experimentation Evaluation Approach and the Campbellian Validity Typology 264
The Holistic Effectuality Evaluation Approach 266
The Experimentation Evaluation Approach's Conceptualization of Outcome Evaluation 267
The Holistic Effectuality Approach's Conceptualization of Outcome Evaluation 267
Constructive Assessment and Conclusive Assessment: Theory and Methodology 269
Constructive Assessment 270
Conclusive Assessment 275
The Zumba Weight Loss Project 275
Why Adjuvants Are Needed for Real-World Programs 281
Types of Adjuvants and Threats to Internal Validity 282
Methodology for Real-World Outcome Evaluation 284
Assessing the Joint Effects of an Intervention and Its Adjuvants 284
Eliminating Potential Biases 285
Research Steps for Assessing Real-World Effects 286
Inquiring Into the Process of Contextualizing an Intervention in the Real-World Setting 286
Using a Relatively Unobtrusive Quantitative Design to Address Biases and Assess Change 288
Using an Auxiliary Design to Triangulate Evidence 289
Replication of the Mesological Intervention (Optional) 291
Example of a Real-World Outcome Evaluation 291
Checklist for Ranking Real-World Evaluations 296
Usefulness of the Holistic Effectuality Evaluation Approach 298
Providing Theory and Methodology for Real-World Outcome Evaluation 298
Providing Insight Into the Relationship Between Adjuvants and Internal Validity 298
Inspiring Evaluators to Develop Indigenous Evaluation Theories and Methodologies 299
The Experimentation Evaluation Approach Versus the Holistic Effectuality Evaluation Approach 299

Pure Independent Effects 300
Real-World Joint Effects 300
Building Evidence From the Ground Up 301
Questions for Reflection 302

Chapter 12. The Theory-Driven Approach to Outcome Evaluation 304
Clarifying Stakeholders' Implicit Theory 306
Making Stakeholder Theory Explicit 306
Building Consensus Among Stakeholders Regarding Program Theory 309
Guidelines for Conducting Theory-Driven Outcome Evaluation 309
Types of Theory-Driven Outcome Evaluation 310
The Intervening Mechanism Evaluation Approach 312
Two Models of the Intervening Mechanism Evaluation Approach 313
Some Theoretical Bases of the Intervening Mechanism Evaluation 318
When to Use an Intervening Mechanism Evaluation Approach 319
The Moderating Mechanism Evaluation Approach 321
Constructing Moderating Mechanism Evaluation Models 322
Examples of Moderating Mechanism Evaluation 323
Advanced Moderating Mechanism Models 324
When to Use a Moderating Mechanism Evaluation Approach 327
The Integrative Process/Outcome Evaluation Approach 327
Research Methods and Strategies Associated With Integrative Process/Outcome Evaluation 329
Examples of Integrative Process/Outcome Evaluation 329
Theory-Driven Outcome Evaluation and Unintended Effects 333
Formal Specification of Possible Unintended Effects 334
Field Study Detection of Unintended Effects of Implementation 335
A Reply to Criticisms of Theory-Driven Outcome Evaluation 336
Questions for Reflection 338

PART V: ADVANCED ISSUES IN PROGRAM EVALUATION 341

Chapter 13. What to Do if Your Logic Model Does Not Work as Well as Expected 343
A Diversity Enhancement Project 344
Description of the Project 344

Applying the Logic Model 345
Applying the Action Model/Change Model Schema 345
A Community Health Initiative 350
Description of the Project 350
Applying the Logic Model 352
Applying the Action Model/Change Model Schema 355
A Guide to Productively Applying the Logic Model and the Action Model/Change Model Schema 361
System Change and Evaluation in the Future 362
Questions for Reflection 363

Chapter 14. Formal Theories Versus Stakeholder Theories in Interventions: Relative Strengths and Limitations 365
Formal Theory Versus Stakeholder-Implicit Theory as a Basis for Intervention Programs 365
Intervention Programs Based on Formal Theory 365
Programs Based on Stakeholder Theory 366
Views on the Relative Value of Formal Theory-Based Interventions and Stakeholder Theory-Based Interventions 369
Formal Theory Versus Stakeholder Theory: A Case Study 371
Program Theory Underlying the Anti–Secondhand Smoking Program 371
Action Model 373
Outcome Evaluation Design and Change Model 376
Process Evaluation Design 377
Evaluation Findings 377
Results of Process Evaluation 377
Outcome Evaluation Results 378
Relative Strengths and Limitations of Formal Theory-Based Intervention and Stakeholder Theory-Based Intervention 379
Theoretical Sophistication and Prior Evidence 379
Efforts to Clarify the Change Model and Action Model in Program Theory 380
Efficacious Evidence Versus Real-World Effectiveness 380
Viability 381
Action Theory Success and Conceptual Theory Success 382
Lessons Learned From the Case Study 383
Questions for Reflection 387

Chapter 15. Evaluation and Dissemination: Top-Down Approach Versus Bottom-Up Approach 388
The Top-Down Approach to Transitioning From Evaluation to Dissemination 388
Lessons Learned From Applying the Top-Down Approach to Program Evaluation 389
Integrative Cogency Model: The Integrated Evaluation Perspective 394
Effectual Cogency 395
Viable Cogency 396
Transferable Cogency 398
Evaluation Approaches Related to the Integrative Cogency Model 398
Effectuality Evaluation 398
Viability Evaluation 399
Transferability Evaluation 399
The Bottom-Up Approach to Transitioning From Evaluation to Dissemination 400
The Bottom-Up Approach 400
The Bottom-Up Approach and Social Betterment/Health Promotion Programs 401
Types of Intervention for the Bottom-Up Approach 403
The Current Version of Evidence-Based Interventions: Limitations and Strategies to Address Them 403
The Integrated Evaluation Perspective on Concurrent Cogency Approaches 406
Focusing on Effectual Cogency 407
Focusing on Viable Cogency 407
Optimizing Approach 408
The Usefulness of the Bottom-Up Approach and the Integrative Cogency Model 408
Questions for Reflection 410

References 412
