

Contents

Contents for <i>Models</i>	ix
Contents for <i>Applications</i>	xiii
Preface	xvii
Contributors	xxi

Section I Basic Tools

1. Logit, Probit, and Other Response Functions	3
<i>James H. Albert</i>	
2. Discrete Distributions	23
<i>Jodi M. Casabianca and Brian W. Junker</i>	
3. Multivariate Normal Distribution	35
<i>Jodi M. Casabianca and Brian W. Junker</i>	
4. Exponential Family Distributions Relevant to IRT	47
<i>Shelby J. Haberman</i>	
5. Loglinear Models for Observed-Score Distributions	71
<i>Tim Moses</i>	
6. Distributions of Sums of Nonidentical Random Variables	87
<i>Wim J. van der Linden</i>	
7. Information Theory and Its Application to Testing	105
<i>Hua-Hua Chang, Chun Wang, and Zhiliang Ying</i>	

Section II Modeling Issues

8. Identification of Item Response Theory Models	127
<i>Ernesto San Martín</i>	
9. Models with Nuisance and Incidental Parameters	151
<i>Shelby J. Haberman</i>	
10. Missing Responses in Item Response Modeling	171
<i>Robert J. Mislevy</i>	

Section III Parameter Estimation

11. Maximum-Likelihood Estimation 197
Cees A. W. Glas
12. Expectation Maximization Algorithm and Extensions 217
Murray Aitkin
13. Bayesian Estimation 237
Matthew S. Johnson and Sandip Sinharay
14. Variational Approximation Methods 259
Frank Rijmen, Minjeong Jeon, and Sophia Rabe-Hesketh
15. Markov Chain Monte Carlo for Item Response Models 271
Brian W. Junker, Richard J. Patz, and Nathan M. VanHoudnos
16. Statistical Optimal Design Theory 313
Heinz Holling and Rainer Schwabe

Section IV Model Fit and Comparison

17. Frequentist Model-Fit Tests 343
Cees A. W. Glas
18. Information Criteria 363
Allan S. Cohen and Sun-Joo Cho
19. Bayesian Model Fit and Model Comparison 379
Sandip Sinharay
20. Model Fit with Residual Analyses 395
Craig S. Wells and Ronald K. Hambleton
- Index 415
