Glossary
Development jargon xii
Anthropological jargon xiv
Acronyms xvi

1. Anthropology, development and the crisis of modernity 1

Development in ruins 1
Development: history and meanings 3
Capitalism and colonialism: 1700–1949 3
The post-colonial era: 1949 onwards 6
The 'aid industry' 8
Theories of development 12
Modernisation 12
Dependency theory 16
The demise of development theory 20
The 1990s: the age of post-modernity? 20
Post-modernism and anthropology 22
Anthropology and post-development: moving on 24

2. Applying anthropology – an historical background 26

Anthropologists, social change and cultural relativism 27
The origins of applied anthropology in the UK 29
The origins of applied anthropology in the US 30
Anthropology, colonialism and asymmetrical power 32
Post-war applied anthropology 34
Applied development roles for anthropologists 41
Applied anthropologists and development projects 44
Applied anthropology and advocacy 46
Conclusion 48

3. The anthropology of development 50

Anthropologists, change and development 50
The social and cultural effects of economic change 53
Rural to urban migration and 'detribalisation' 53
Agricultural change: polarisation 54
Capitalism and the 'world system' 57
The gendered effects of economic change 60
The social and cultural effects of development projects (and why they fail) 62
The internal workings and discourses of the 'aid industry' 68
Conclusion 75

4. Subverting the discourse – knowledge and practice 77

Access 79
Case 1. Albania: differential access to rural resources in the post-communist era 80
Case 2. Mali Sud Rural Development Project: inequality between communities 81
Case 3. Land rights in Calcutta: inequality between households 83
Case 4. Women's credit groups in Bangladesh: inequality within households 84
Effects 87
Case 5. The Kariba Dam: the effects of resettlement 88
Case 6. The Maasai Housing Project: technological change 90
Control 93
Working with local groups and institutions 93
Case 7. Labour welfare in tea plantations: enabling control 95
Appropriate organisational structures 97
Appropriate communication 99
Conclusion 100

5. New directions – practice and change 103

Poverty focused aid and 'income generation' 104
'Target groups' 105
Non-governmental organisations (NGOs) 107
'Participation' 110
Participatory research methodologies 113
'Empowerment' 116
Farming systems research 119

Community development 121
Women in Development and Gender and Development 121
Conclusion 125

6. Anthropologists within development 128
Anthropologists as consultants 128
Working within agencies 130
The compromise between pure and applied 132
Achieving influence 133
The question of ethics 135
Case 1. Evaluating rural cooperative training 136
Points for discussion 140
Case 2. Disaster prevention – cyclone shelters, community participation and NGOs 141
Background 141
The cyclone shelter cum primary school project 143
Points for discussion 146
Case 3. The fish farm – 'the tail wagging the dog'? 147
Points for discussion 150
Conclusion 151

7. Beyond development? 153
Unpicking development 154
Anthropology and development: moving on 155
Working from within 158
How should anthropologists become involved? 160
The ethics of involvement 161
Cooption by developmental discourse 162
Breaking out of the discourse 164
Beyond 'anthropologists as experts' 165
Conclusion 167
