1 Economic Evaluation, Cost Effectiveness Analysis and Health Care Resource Allocation	1
1.1 Introduction	1
1.2 Scarcity, Choice and Opportunity Cost	2
1.3 Types of Economic Evaluation	2
1.3.1 Cost Benefit Analysis (CBA)	3
1.3.2 Cost Effectiveness Analysis (CEA)	3
1.3.3 Cost Utility Analysis (CUA)	5
1.4 Incremental Cost Effectiveness Ratios (ICERs)	6
1.4.1 Simple and Extended Dominance	9
1.4.2 The Net Benefit Approach	11
1.5 Summary	12
References	13
2 Finding the Evidence for Decision Analytic Cost Effectiveness Models	15
2.1 Introduction	15
2.2 Choosing Resources to Search for Evidence	17
2.3 Designing Search Strategies	18
2.4 Searching for Existing Cost Effectiveness Models	19
2.4.1 Where to Look	20
2.4.2 Search Strategy, Concepts, Terms and Combinations	21
2.4.3 Search Filters, Database Limits and Clinical Queries	22
2.5 Searching for Clinical Evidence	23
2.5.1 Finding the Evidence on Incidence, Prevalence and Natural History of a Disease	23
2.5.2 Finding the Evidence on the Clinical Effectiveness of Health Interventions	24
2.5.3 Database Limits and Clinical Queries	28

2.6	Finding the Evidence on Health-Related Quality of Life and Health State Preferences	30
2.6.1	Where to Look	30
2.6.2	Search Strategy, Concepts, Terms and Combinations	31
2.6.3	Search Filters, Database Limits and Clinical Queries	32
2.7	Finding Evidence on Resource Use and Costs	32
2.7.1	Where to Look	34
2.7.2	Search Strategy, Concepts, Terms and Combinations	34
2.7.3	Search Filters, Database Limits and Clinical Queries	36
2.8	Tracking and Reporting Search Activities	36
2.9	Quality Assessment Tools	37
2.10	Summary	38
	References	38
3	Building a Decision Tree Cost Effectiveness Model	41
3.1	Introduction	41
3.2	What Is a Decision Model?	42
3.3	Key Elements of a Decision Tree	44
3.4	Costs, Benefits and Complexity	49
3.5	Exercise Building a Decision Tree	51
3.6	Summary	56
	References	57
4	Uncertainty, Probabilistic Analysis and Outputs from Cost Effectiveness Analyses	59
4.1	Introduction	59
4.2	Sources of Uncertainty in Cost Effectiveness Models	60
4.2.1	Sampling Variation	60
4.2.2	Extrapolation	61
4.2.3	Generalisability	62
4.2.4	Model Structure	62
4.2.5	Methodological Uncertainty	63
4.3	Analytic Responses to Uncertainty in CEA	64
4.3.1	One-Way Sensitivity Analysis	65
4.3.2	Multiway Sensitivity Analysis	66
4.3.3	Threshold Analysis	67
4.3.4	Analysis of Extremes	67
4.4	Probabilistic Sensitivity Analysis (PSA)	68
4.5	Outputs from Probabilistic Analysis	71
4.6	Some Problems with ICERs	72
4.7	Summary	75
	References	76
5	Introduction to Markov Cost Effectiveness Models	77
5.1	Introduction	77
5.2	Why Use Markov Models?	78
5.3	Health States	79

- 5.4 Transition Probabilities..... 80
- 5.5 Markov Trace 81
- 5.6 Cycle Length, Time Horizon and Discounting..... 83
