

DETERIORATION, DEPENDABILITY, DIAGNOSTICS 2016

Contents

Contents	5
Preface	7
KEY NOTES	11
Implementation of diagnostic interface to the existing CAN-BUS.....	13
Development of combat tracked vehicle suspension mechanism	23
Continue the development of universal rotary module	39
I. DETERIORATION	47
Effect of irradiation with accelerated electrons on sliding features of some chosen materials	49
Vibration analysis of manual transmission using physical simulation	57
An issue of mathematical modelling of passive armor properties	69
Virtual turbocharger rotor – a tool for rotordynamics solution.....	75
Dependence of heat treatment of steel 42CrMo4 on corrosion and mechanical degradation.....	83
II. DEPENDABILITY	91
Effect of temperature on the change of static radial deformation of a road car wheel	93
Operation dependability of hydraulic circuit with synthetic oil.....	99
Effect of bio-component on the physical and mechanical properties diesel fuel.....	107
Design of model for the creation of operational stocks of the technical material of the Czech Republic army	117
Improve the quality of the production process through the monitoring of production	131
Comparison of vibrations models of small arms barrels.....	139
Hazard from electromagnetic radiation to ammunition containing electro-explosive devices.....	145
Smart-mechatronic systems for special vehicle suspension	153
Resilience at an information system at container terminal	161
Risk factors analysis of the software solution implementing process in large enterprise	169

III. DIAGNOSTICS	177
Utilisation of in-cylinder pressure analysis for combustion engine simulation model calibration	179
Vibration signal processing by wavelet transformations	189
Determination of the content of impurities in motor oils in the case of urban public transport buses	197
Using principles of bootstrapping for determination of inventory	207
Tribotechnical diagnostics as a tool for determining of a change interval of a motor oil.....	213
Options of FTIR in technical diagnostics of engine oils	223
List of authors	231
