		Chapter Summary	95
	5.	3D Animation	. 97
		Driving Animation with requestAnimationFrame()	99

	Using requestAnimationFrame() in Your Application requestAnimationFrame() and Performance	100 101
	Frame-Based Versus Time-Based Animation	102
	Animating by Programmatically Updating Properties	102
	Animating Transitions Using Tweens	102
	19 - No. 19	
	Interpolation The Trycon is Library	105
	The Tween.js Library	106
	Easing Using Way France for Complex Animations	108
	Using Key Frames for Complex Animations	110
	Keyframe.js—A Simple Key Frame Animation Utility	110
	Articulated Animation with Key Frames	113
	Using Curves and Path Following to Create Smooth, Natural Motion	116
	Using Morph Targets for Character and Facial Animation	119
	Animating Characters with Skinning	121
	Animating Using Shaders	125
	Chapter Summary	130
5.	CSS3: Advanced Page Effects	131
	CSS Transforms	133
	Using 3D Transforms	134
	Applying Perspective	137
	Creating a Transform Hierarchy	
	Controlling Backface Rendering	
	A Summary of CSS Transform Properties	145
	CSS Transitions	146
	CSS Animations	151
	Pushing the Envelope of CSS	155
	사람이 얼마나 아내는	
	Tendering 3D Objects	100
	Tendering 3D Environments	137
	Using C55 Custom I file is for Navaneed Shader Effects	139
	Tendering Coo 3D Coning Timee.jo	100
	Chapter Summary	100
7.	Canvas: Universal 2D Drawing	163
	Canvas Basics	164
	The Canvas Element and 2D Drawing Context	164
	Canvas API Features	
	Rendering 3D with the Canvas API	
	Canvas-Based 3D Libraries	
	K3D	175
	The Three.js Canvas Renderer	176
	The Three, 5 Canvas Renderer	1/0

Chapter	Summary
---------	---------

Part II. Application Development Techniques

8.	The 3D Content Pipeline	187
	The 3D Creation Process	187
	Modeling	188
	Texture Mapping	189
	Animation	100
	Technical Art	100
	3D Modeling and Animation Tools	101
	Traditional 3D Software Packages	100
	Browser-Based Integrated Environments	100
	3D Repositories and Stock Art	200
	3D File Formats	201
	Model Formats	201
	Animation Formats	204
	Full-Featured Scene Formats	20=
	Loading Content into WebGL Applications	214
	The Three.js JSON Format	015
	The Three.js Binary Format	001
	Loading a COLLADA Scene with Three.js	222
	Loading a glTF Scene with Three.js	225
	Chapter Summary	227
	L Name Graphs in Three is snothmin A	
9.	3D Engines and Frameworks	229
	3D Framework Concepts	
	What Is a Framework?	
	WebGL Framework Requirements	
	A Survey of WebGL Frameworks	
	Game Engines	
	Presentation Frameworks	236
	Vizi: A Component-Based Framework for Visual Web Applications	240
	Background and Design Philosophy	240
	The Vizi Architecture	
	Getting Started with Vizi	
	A Simple Vizi Application	
	Chapter Summary	251
10	Dovoloning a Simple 2D Application	252
10.	Designing the Application	253
	Designing the Addition	(,))

	Creating the 3D Content	256
	Exporting the Maya Scene to COLLADA	257
	Converting the COLLADA File to glTF	259
	Previewing and Testing the 3D Content	259
	A Vizi-Based Previewer Tool	260
	The Vizi Viewer Class	261
	The Vizi Loader Class	263
	Integrating the 3D into the Application	
	Developing 3D Behaviors and Interactions	270
	Vizi Scene Graph API Methods: findNode() and map()	270
	Animating Transparency with Vizi.FadeBehavior	272
	Auto-Rotating the Content with Vizi.RotateBehavior	274
	Implementing Rollovers Using Vizi.Picker	274
	Controlling Animations from the User Interface	276
	Changing Colors Using the Color Picker	277
	Chapter Summary	280
11.	Developing a 3D Environment	281
	Creating the Environment Art	283
	Previewing and Testing the Environment	283
	Previewing the Scene in First-Person Mode	285
	Inspecting the Scene Graph	286
	Inspecting Object Properties	290
	Displaying Bounding Boxes	292
	Previewing Multiple Objects	294
	Using the Previewer to Find Other Scene Issues	296
	Creating a 3D Background Using a Skybox	297
	3D Skyboxes	298
	The Vizi Skybox Object	298
	Integrating the 3D Content into the Application	301
	Loading and Initializing the Environment	301
	Loading and Initializing the Car Model	304
	Implementing First-Person Navigation	307
	Camera Controllers	308
	First-Person Controller: The Math	308
	Mouse Look	310
	Simple Collision Detection	311
	Working with Multiple Cameras	313
	Creating Timed and Animated Transitions	314
	Scripting Object Behaviors	317
	Implementing Custom Components Based on Vizi.Script	317
	A Controller Script to Drive the Car	317

	Adding Sound to the Environment	324
	Rendering Dynamic Textures	326
	Chapter Summary	331
12.	Developing Mobile 3D Applications	333
	Mobile 3D Platforms	334
	Developing for Mobile Browsers	335
	Adding Touch Support	336
	Debugging Mobile Functionality in Desktop Chrome	341
	Creating Web Apps	344
	Web App Development and Testing Tools	344
	Packaging Web Apps for Distribution	344
	Developing Native/HTML5 "Hybrid" Applications	346
	CocoonJS: A Technology to Make HTML Games and Applications for	
	Mobile Devices	348
	Assembling an Application with CocoonJS	350
	Hybrid WebGL Development: The Bottom Line	357
	Mobile 3D Performance	357
	Chapter Summary	360
