Foreword	<i>xix</i>
-----------------	-------------------

Preface	<i>xxiii</i>
----------------	---------------------

1	Introduction and Motivation	1
1.1	The Fourth Age of Intelligence	1
1.1.1	An Era of Dynamic Change and Diverse Threats	3
1.1.2	The Convergence of Technology and the Dawn of Big Data	5
1.1.3	Multi-INT Tradecraft: Visualization, Statistics, and Spatiotemporal Analysis	7
1.1.4	The Need for a New Methodology	8
1.2	Introducing ABI	8
1.2.1	The Primacy of Location	10
1.2.2	From Target-Based to Activity-Based	10
1.2.3	Shifting the Focus to Discovery	12
1.2.4	Discovery Versus Search	14
1.2.5	Discovery: An Example	14
1.2.6	Summary: The Key Attributes of ABI	16
1.3	Organization of this Textbook	16
1.4	Disclaimer About Sources and Methods	19
1.5	A Focus on Geospatial Intelligence (GEOINT)	19

1.6	Suggested Readings	20
	References	21
2	<u>ABI History and Origins</u>	23
2.1	Wartime Beginnings	23
2.2	OUSD(I) Studies and the Origin of the Term ABI	24
2.3	Human Domain Analytics	26
2.4	ABI Research and Development	27
2.5	ABI-Enabling Technology Accelerates	29
2.6	Evolution of the Terminology	29
2.7	Summary	31
	References	31
3	<u>Discovering the Pillars of ABI</u>	33
3.1	The First Day of a Different War	33
3.2	Georeference to Discover: "Everything Happens Somewhere"	34
3.2.1	First-Degree Direct Georeference	35
3.2.2	First-Degree Indirect Georeference	36
3.2.3	Second-Degree Georeference	36
3.3	Discover to Georeference Versus Georeference to Discover	37
3.4	Data Neutrality: Seeding the Multi-INT Spatial Data Environment	38
3.5	Integration Before Exploitation: From Correlation to Discovery	41
3.6	Sequence Neutrality: Temporal Implications for Data Correlation	47
3.6.1	Sequence Neutrality's Focus on Metadata: Section 215 and the Bulk Telephony Metadata Program Under the USA Patriot Act	50

3.7	After Next: From Pillars, to Concepts, to Practical Applications	51
3.8	Summary	53
	References	53
4	The Lexicon of ABI	55
4.1	Ontology for ABI	55
4.2	Activity Data: “Things People Do”	56
4.2.1	“Activity” Versus “Activities”	57
4.2.2	Events and Transactions	58
4.2.3	Transactions: Temporal Registration	59
4.2.4	Event or Transaction? The Answer is (Sometimes) Yes	61
4.3	Contextual Data: Providing the Backdrop to Understand Activity	62
4.4	Biographical Data: Attributes of Entities	63
4.5	Relational Data: Networks of Entities	65
4.6	Analytical and Technological Implications	66
4.7	Summary	67
	References	67
5	Analytical Methods and ABI	69
5.1	Revisiting the Modern Intelligence Framework	69
5.2	The Case for Discovery	70
5.3	The Spectrum of “INTS” and Exploitation Versus Finished Intelligence	73
5.4	Decomposing an Intelligence Problem for ABI	75
5.5	The W3 Approaches: Locations Connected Through People and People Connected Through Locations	77
5.5.1	Relating Entities Through Common Locations	77
5.5.2	Relating Locations Through Common Entities	80
5.6	Assessments: What Is Known Versus What Is Believed	83

5.7	Facts: What Is Known	84
5.8	Assessments: What Is Believed or “Thought”	85
5.9	Gaps: What Is Unknown	85
5.10	Unfinished Threads	85
5.11	Leaving Room for Art And Intuition	87
	References	89
6	<u>Disambiguation and Entity Resolution</u>	91
6.1	A World of Proxies	91
6.2	Disambiguation	93
6.3	Unique Identifiers—“Better” Proxies	94
6.4	Resolving the Entity	97
6.5	Two Basic Types of Entity Resolution	97
6.5.1	Proxy-to-Proxy Resolution	98
6.5.2	Proxy-to-Entity Resolution: Indexing	100
6.6	Iterative Resolution and Limitations on Entity Resolution	101
	References	102
7	<u>Discreteness and Durability in the Analytical Process</u>	103
7.1	Real World Limits of Disambiguation and Entity Resolution	103
7.2	Applying Discreteness to Space-Time	104
7.3	A Spectrum for Describing Locational Discreteness	105
7.4	Discreteness and Temporal Sensitivity	109
7.5	Durability of Proxy-Entity Associations	111
7.6	Summary	114
	References	114

8	<u>Patterns of Life and Activity Patterns</u>	115
8.1	Entities and Patterns of Life	115
8.2	Pattern-of-Life Elements	118
8.3	The Importance of Activity Patterns	119
8.4	Normalcy and Intelligence	120
8.5	Representing Patterns of Life While Resolving Entities	122
8.5.1	Graph Representation	122
8.5.2	Quantitative and Temporal Representation	123
8.6	Enabling Action Through Patterns of Life	124
	References	125
9	<u>Incidental Collection</u>	127
9.1	A Legacy of Targets	127
9.2	Bonus Collection from Known Targets	128
9.3	Defining Incidental Collection	129
9.4	Dumpster Diving and Spatial Archive and Retrieval	130
9.5	Rethinking the Balance Between Tasking and Exploitation	132
9.6	Collecting to Maximize Incidental Gain	133
9.7	Incidental Collection and Privacy	135
9.8	Summary	136
	References	136
10	<u>Data, Big Data, and Datafication</u>	139
10.1	Data	139
10.1.1	Classifying Data: Structured, Unstructured, and Semistructured	140
10.1.2	Metadata	143
10.1.3	Taxonomies, Ontologies, and Folksonomies	144
10.2	Big Data	145

10.2.1	Volume, Velocity, and Variety...	146
10.2.2	Big Data Architecture	147
10.2.3	Big Data in the Intelligence Community	149
10.3	The Datafication of Intelligence	151
10.3.1	Collecting It "All"	152
10.3.2	Object-Based Production (OBP)	153
10.3.3	Relationship Between OBP and ABI	155
10.4	The Future of Data and Big Data	157
10.5	Summary	158
	References	158
11	Collection	161
11.1	Introduction to Collection	161
11.2	MOVINT with Motion Imagery	164
11.2.1	FMV	165
11.2.2	WAMI	167
11.3	MOVINT from Radar	170
11.3.1	Basic Principles of GMTI	171
11.3.2	Evolution of GMTI Collection Systems	172
11.4	Additional Sources of Activities and Transactions	173
11.5	Collection to Enable ABI	174
11.6	Persistence: The All-Seeing Eye (?)	175
11.7	The Persistence "Master Equation"	176
11.8	Space-Based Persistent Surveillance	180
11.8.1	Space-Based GMTI	182
11.8.2	Commercial Space Radar Applications	183
11.8.3	Space-Based Persistent EO Imagery	187
11.9	Summary	190
	References	191
12	Automated Activity Extraction	195
12.1	The Need for Automation	195

12.2	Data Conditioning	196
12.3	Georeferenced Entity and Activity Extraction	198
12.4	Object and Activity Extraction from Still Imagery	201
12.5	Object and Activity Extraction from Motion Imagery	205
12.5.1	Activity Extraction from Video	206
12.5.2	Activity and Event Extraction from WAMI	210
12.6	Tracking and Track Extraction	212
12.6.1	The Role of Sampling Rate and Resolution	213
12.6.2	Terminology: Tracks and Tracklets	213
12.6.3	The Kalman Filter	215
12.6.4	Probabilistic Tracking Frameworks	218
12.6.5	Clustering, Track Association, and Multihypothesis Tracking (MHT)	219
12.6.6	Detecting Anomalous Tracks	221
12.7	Metrics for Automated Algorithms	223
12.8	The Need for Multiple, Complimentary Sources	223
12.9	Summary	225
12.10	Acknowledgments	227
	References	227
13	<u>Analysis and Visualization</u>	231
13.1	Introduction to Analysis and Visualization	231
13.1.1	The Sexiest Job of the 21st Century...	232
13.1.2	Asking Questions and Getting Answers	234
13.2	Statistical Visualization	235
13.2.1	Scatterplots	236
13.2.2	Pareto Charts	237
13.2.3	Factor Profiling	238
13.3	Visual Analytics	239
13.4	Spatial Statistics and Visualization	241
13.4.1	Spatial Data Aggregation	242
13.4.2	Tree Maps	244
13.4.3	Three-Dimensional Scatterplot Matrix	246

13.4.4	Spatial Storytelling	248
13.5	The Way Ahead	251
	References	252
14	Correlation and Fusion	255
14.1	Correlation	255
14.1.1	Correlation Versus Causality	256
14.2	Fusion	257
14.2.1	A Taxonomy for Fusion Techniques	258
14.2.2	Architectures for Data Fusion	261
14.2.3	Upstream Versus Downstream Fusion	262
14.3	Mathematical Correlation and Fusion Techniques	264
14.3.1	Bayesian Probability and Application of Bayes's Theorem	264
14.3.2	Dempster-Shafer Theory	269
14.3.3	Belief Networks	274
14.4	Multi-INT Fusion For ABI	274
14.5	Examples of Multi-INT Fusion Programs	276
14.5.1	Example: A Multi-INT Fusion Architecture	276
14.5.2	Example: The DARPA Insight Program	278
14.6	Summary	279
	References	280
15	Knowledge Management	283
15.1	The Need for Knowledge Management	283
15.1.1	Types of Knowledge	284
15.2	Discovery of What We Know	286
15.2.1	Recommendation Engines	286
15.2.2	Data Finds Data	287
15.2.3	Queries as Data	289
15.3	The Semantic Web	290
15.3.1	XML	290
15.3.2	Resource Description Framework (RDF)	291

15.4	Graphs for Knowledge and Discovery	292
15.4.1	Graphs and Linked Data	294
15.4.2	Provenance	295
15.4.3	Using Graphs for Multianalyst Collaboration	295
15.5	Information and Knowledge Sharing	296
15.6	Wikis, Blogs, Chat, and Sharing	297
15.7	Crowdsourcing	298
15.8	Summary	300
	References	300
16	<u>Anticipatory Intelligence</u>	303
16.1	Introduction to Anticipatory Intelligence	303
16.1.1	Prediction, Forecasting, and Anticipation	304
16.2	Modeling for Anticipatory Intelligence	305
16.2.1	Models and Modeling	305
16.2.2	Descriptive Versus Anticipatory/Predictive Models	306
16.3	Machine Learning, Data Mining, and Statistical Models	308
16.3.1	Rule-Based Learning	308
16.3.2	Case-Based Learning	309
16.3.3	Unsupervised Learning	309
16.3.4	Sensemaking	311
16.4	Rule Sets and Event-Driven Architectures	313
16.4.1	Event Processing Engines	313
16.4.2	Simple Event Processing: Geofencing, Watchboxes, and Tripwires	314
16.4.3	CEP	314
16.4.4	Tipping and Cueing	317
16.5	Exploratory Models	318
16.5.1	Basic Exploratory Modeling Techniques	318
16.5.2	Advanced Exploratory Modeling Techniques	320
16.5.3	ABM	320
16.5.4	System Dynamics Model	321
16.6	Model Aggregation	323

16.7	The Wisdom of Crowds	326
16.8	Shortcomings of Model-Based Anticipatory Analytics	327
16.9	Modeling in ABI	328
16.10	Summary	329
	References	329
17	<u>ABI in Policing</u>	333
17.1	The Future of Policing	333
17.2	Intelligence-Led Policing: An Introduction	334
17.2.1	Statistical Analysis and CompStat	335
17.2.2	Routine Activities Theory	335
17.3	Crime Mapping	336
17.3.1	Standardized Reporting Enables Crime Mapping	336
17.3.2	Spatial and Temporal Analysis of Patterns	336
17.4	Unraveling the Network	341
17.5	Predictive Policing	343
17.6	Summary	345
17.7	Further Reading	345
17.8	Chapter Author Biography	345
	References	346
18	<u>ABI and the D.C. Beltway Sniper</u>	349
18.1	Introduction	349
18.2	Georeference to Discover	351
18.3	Integration Before Exploitation	352
18.4	Sequence Neutrality	353
18.5	Data Neutrality	355
18.6	Summary	356

18.7	Chapter Author Biography	356
	References	357
19	Analyzing Transactions in a Network	359
19.1	Analyzing Transactions with Graph Analytics	359
19.2	Discerning the Anomalous	361
19.3	Becoming Familiar with the Data Set	362
19.4	Analyzing Activity Patterns	363
19.4.1	Method: Location Classification	365
19.4.2	Method: Average Time Distance	367
19.4.3	Method: Activity Volume	368
19.4.4	Activity Tracing	368
19.5	Analyzing High-Priority Locations with a Graph	369
19.6	Validation	370
19.7	Summary	370
19.8	Chapter Author Biography	371
	References	371
20	ABI and the Search for Malaysian Airlines Flight 370	373
20.1	Introduction	373
20.2	Data Sparsity, Suppositions, and Misdirections	374
20.3	The Next Days: Fixating on the Wrong Entity	375
20.4	Wide Area Search and Commercial Satellite Imagery	377
20.4.1	A Tradecraft Breakthrough: Crowdsourced Imagery Exploitation	377
20.4.2	Lessons Learned in Crowdsourced Imagery Search	379
20.5	A Breakthrough: Sequence and Data Neutral Analysis of Incidentally Collected Data	380
20.6	Summary: The Search Continues	382

20.7	Chapter Author Biography	383
	References	383
21	Visual Analytics for Pattern-of-Life Analysis	385
21.1	Applying Visual Analytics to Pattern-of-Life Analysis	385
21.1.1	Overview of the Data Set	385
21.1.2	Exploring the Activities and Transactions of Two Randomly Selected Users	386
21.1.3	Identification of Cotravelers/Pairs in Social Network Data	388
21.2	Discovering Paired Entities in a Large Data Set	391
21.3	Summary	393
21.4	Acknowledgements	395
	References	395
22	Multi-INT Spatiotemporal Analysis	397
22.1	Overview	397
22.2	Human Interface Basics	398
22.2.1	Map View	398
22.2.2	Timeline View	399
22.2.3	Relational View	399
22.3	Analytic Concepts of Operations	400
22.3.1	Discovery and Filtering	400
22.3.2	Forensic Backtracking	401
22.3.3	Watchboxes and Alerts	402
22.3.4	Track Linking	403
22.4	Advanced Analytics	403
22.5	Information Sharing and Data Export	405
22.6	Summary	405
	References	406
23	Pattern Analysis of Ubiquitous Sensors	409
23.1	Entity Resolution Through Activity Patterns	409

23.2	Temporal Pattern of Life	412
23.3	Integrating Multiple Data Sources from Ubiquitous Sensors	414
23.4	Summary	416
	References	416
24	ABI Now and Into the Future	417
24.1	An Era of Increasing Change	417
24.2	ABI and a Revolution in Geospatial Intelligence	419
24.3	ABI and Object-Based Production	422
24.4	ABI Applied to Overhead Reconnaissance	423
24.5	The Future of ABI in the Intelligence Community	424
24.6	Conclusion	427
24.7	Chapter Author Biography	427
	References	428
25	Conclusion	431
	About the Authors	435
	Index	437
