Preface..... xix

Author Bio ..... xxiii

**1. Inferential Statistics and Test Selection ..... 1**

    1.1 Introduction ..... 1

    1.2 Inferential Statistics ..... 1

        1.2.1 Hypothesis Testing ..... 2

        1.2.2 Types of Hypotheses ..... 2

            1.2.2.1 Research Hypothesis ..... 2

            1.2.2.2 Null Hypothesis ..... 3

        1.2.3 Testing Hypotheses ..... 3

        1.2.4 Level of Significance ..... 4

        1.2.5 Type I and Type II Errors ..... 4

            1.2.5.1 Calculating Type I Error ..... 5

    1.3 Test Selection..... 6

        1.3.1 The Nature of Hypotheses: Test of Difference versus  
            Test of Relationship ..... 6

            1.3.1.1 Test of Difference ..... 6

            1.3.1.2 Test of Relationship ..... 7

        1.3.2 Levels of Measurement ..... 7

            1.3.2.1 Nominal Scale ..... 7

            1.3.2.2 Ordinal Scale ..... 8

            1.3.2.3 Interval Scale ..... 8

            1.3.2.4 Ratio Scale ..... 8

        1.3.3 Choice of Test ..... 9

**2. Introduction to SPSS..... 11**

    2.1 Introduction ..... 11

    2.2 Setting Up a Data File..... 12

        2.2.1 Preparing a Codebook ..... 13

        2.2.2 Data Set..... 13

        2.2.3 Creating an SPSS Data File ..... 13

        2.2.4 Data Entry ..... 16

        2.2.5 Saving and Editing the Data File ..... 16

    2.3 SPSS Analysis: Windows Method versus Syntax Method ..... 17

        2.3.1 SPSS Analysis: Windows Method ..... 18

        2.3.2 SPSS Analysis: Syntax Method ..... 19

        2.3.3 SPSS Output..... 21

        2.3.4 Results and Interpretation ..... 22

- 2.4 Missing Data ..... 23
  - 2.4.1 Patterns of Missing Data ..... 24
    - 2.4.1.1 Test for Patterns in Missing Data ..... 24
    - 2.4.1.2 Windows Method ..... 24
    - 2.4.1.3 SPSS Syntax Method ..... 27
    - 2.4.1.4 SPSS Output ..... 27
    - 2.4.1.5 Interpretation ..... 29
  - 2.4.2 Dealing with Missing Data ..... 29
  - 2.4.3 Example of the Expectation-Maximization Method  
for Handling Missing Data ..... 30
    - 2.4.3.1 Windows Method ..... 30
    - 2.4.3.2 SPSS Syntax Method ..... 32
    - 2.4.3.3 Imputed Data Set ..... 32
- 3. Multiple Response ..... 33
  - 3.1 Aim ..... 33
  - 3.2 Methods of MULT RESPONSE Procedures ..... 33
  - 3.3 Example of the Multiple-Dichotomy Method ..... 34
    - 3.3.1 Data Entry Format ..... 34
    - 3.3.2 Windows Method ..... 35
    - 3.3.3 SPSS Syntax Method ..... 37
    - 3.3.4 SPSS Output ..... 37
    - 3.3.5 Results and Interpretation ..... 37
  - 3.4 Example of the Multiple-Response Method ..... 38
    - 3.4.1 Windows Method ..... 39
    - 3.4.2 SPSS Syntax Method ..... 41
    - 3.4.3 SPSS Output ..... 41
    - 3.4.4 Results and Interpretation ..... 41
  - 3.5 Cross-Tabulations ..... 42
    - 3.5.1 Windows Method ..... 43
    - 3.5.2 SPSS Syntax Method ..... 47
    - 3.5.3 SPSS Output ..... 47
    - 3.5.4 Results and Interpretation ..... 47
- 4. *t* Test for Independent Groups ..... 51
  - 4.1 Aim ..... 51
  - 4.2 Checklist of Requirements ..... 51
  - 4.3 Assumptions ..... 51
  - 4.4 Example ..... 52
    - 4.4.1 Data Entry Format ..... 52
    - 4.4.2 Testing Assumptions ..... 52
      - 4.4.2.1 Independence ..... 52
      - 4.4.2.2 Normality ..... 52
      - 4.4.2.3 Homogeneity of Variance ..... 57

- 4.4.3 Windows Method: Independent-Samples  $t$  Test ..... 58
  - 4.4.4 SPSS Syntax Method..... 59
  - 4.4.5 SPSS Output..... 59
  - 4.4.6 Results and Interpretation..... 61
- 5. Paired-Samples  $t$  Test ..... 63**
  - 5.1 Aim..... 63
  - 5.2 Checklist of Requirements..... 63
  - 5.3 Assumption..... 63
  - 5.4 Example ..... 63
    - 5.4.1 Data Entry Format ..... 64
    - 5.4.2 Testing Assumption ..... 64
      - 5.4.2.1 Normality ..... 64
      - 5.4.2.2 Windows Method..... 64
      - 5.4.2.3 SPSS Syntax Method ..... 66
      - 5.4.2.4 SPSS Output ..... 67
      - 5.4.2.5 Interpretation..... 69
    - 5.4.3 Windows Method: Paired-Samples  $t$  Test ..... 69
    - 5.4.4 SPSS Syntax Method..... 70
    - 5.4.5 SPSS Output..... 71
    - 5.4.6 Results and Interpretation..... 71
- 6. One-Way Analysis of Variance, with Post Hoc Comparisons ..... 73**
  - 6.1 Aim..... 73
  - 6.2 Checklist of Requirements..... 73
  - 6.3 Assumptions..... 73
  - 6.4 Example ..... 73
    - 6.4.1 Data Entry Format ..... 74
    - 6.4.2 Testing Assumptions..... 74
      - 6.4.2.1 Normality ..... 74
      - 6.4.2.2 Homogeneity of Variance..... 78
    - 6.4.3 Windows Method: One-Way ANOVA ..... 78
    - 6.4.4 SPSS Syntax Method..... 80
    - 6.4.5 SPSS Output..... 81
    - 6.4.6 Results and Interpretation..... 82
    - 6.4.7 Post Hoc Comparisons ..... 82
- 7. Factorial Analysis of Variance ..... 83**
  - 7.1 Aim..... 83
  - 7.2 Checklist of Requirements..... 83
  - 7.3 Assumptions..... 83
  - 7.4 Example 1: Two-Way Factorial ( $2 \times 2$  Factorial) ..... 84
    - 7.4.1 Data Entry Format ..... 84

- 7.4.2 Testing Assumptions..... 84
  - 7.4.2.1 Normality ..... 84
  - 7.4.2.2 Homogeneity of Variance..... 87
  - 7.4.2.3 Independence..... 87
- 7.4.3 Windows Method: Factorial ANOVA ..... 87
- 7.4.4 SPSS Syntax Method..... 89
- 7.4.5 SPSS Output..... 90
- 7.4.6 Results and Interpretation..... 91
  - 7.4.6.1 Main Effect..... 91
  - 7.4.6.2 Interaction Effect ..... 91
- 7.4.7 Post Hoc Test for Simple Effects ..... 92
- 7.4.8 Data Transformation ..... 93
  - 7.4.8.1 Windows Method..... 93
  - 7.4.8.2 Post Hoc Comparisons: Windows Method ..... 96
  - 7.4.8.3 Post Hoc Comparisons: SPSS Syntax Method..... 99
- 7.4.9 SPSS Output..... 99
- 7.4.10 Results and Interpretation..... 99
- 7.5 Example 2: Three-Way Factorial ( $2 \times 2 \times 2$  Factorial) ..... 100
  - 7.5.1 Data Entry Format ..... 101
  - 7.5.2 Windows Method ..... 101
  - 7.5.3 SPSS Syntax Method..... 104
  - 7.5.4 SPSS Output..... 104
  - 7.5.5 Results and Interpretation..... 107
    - 7.5.5.1 Main Effects ..... 107
    - 7.5.5.2 Two-Way Interactions ..... 107
  - 7.5.6 Strategy\*List\*Shock Interaction ..... 110
    - 7.5.6.1 Windows Method..... 111
    - 7.5.6.2 SPSS Syntax Method ..... 112
  - 7.5.7 SPSS Output..... 112
    - 7.5.7.1 Shock  $\times$  Group Interaction..... 114
- 8. General Linear Model (GLM) Multivariate Analysis ..... 115
  - 8.1 Aim..... 115
  - 8.2 Checklist of Requirements..... 115
  - 8.3 Assumptions..... 116
  - 8.4 Example 1: GLM Multivariate Analysis: One-Sample Test..... 116
    - 8.4.1 Data Entry Format ..... 117
    - 8.4.2 Testing Assumptions..... 117
      - 8.4.2.1 Independence of Observations..... 117
      - 8.4.2.2 Linearity ..... 119
      - 8.4.2.3 Homogeneity of Covariance Matrices..... 121
      - 8.4.2.4 Normality ..... 121
    - 8.4.3 Windows Method: GLM Multivariate Analysis..... 125

8.4.4	SPSS Syntax Method.....	128
8.4.5	SPSS Output.....	128
8.4.6	Results and Interpretation.....	130
8.5	Example 2: GLM Multivariate Analysis: Two-Sample Test.....	130
8.5.1	Data Entry Format .....	131
8.5.2	Testing Assumptions.....	131
8.5.3	Windows Method: GLM Multivariate Analysis: Two-Sample Test .....	131
8.5.4	SPSS Syntax Method.....	133
8.5.5	SPSS Output.....	133
8.5.6	Results and Interpretation.....	136
8.6	Example 3: GLM: $2 \times 2 \times 4$ Factorial Design .....	136
8.6.1	Data Entry Format .....	137
8.6.2	Testing Assumptions.....	138
8.6.3	Windows Method: GLM: $2 \times 2 \times 4$ Factorial Design .....	138
8.6.4	SPSS Syntax Method.....	140
8.6.5	SPSS Output.....	140
8.6.6	Results and Interpretation.....	144
8.6.7	Windows Method (Profile Plot) .....	145
8.6.8	SPSS Syntax Method (Profile Plot).....	148
8.6.9	Results and Interpretation.....	148
8.6.10	Windows Method (Data Transformation) .....	148
	8.6.10.1 Data Transformation.....	148
	8.6.10.2 Post Hoc Comparisons .....	150
8.6.11	SPSS Output.....	152
8.6.12	Results and Interpretation.....	153
9.	<b>General Linear Model: Repeated Measures Analysis .....</b>	<b>155</b>
9.1	Aim.....	155
9.2	Assumption.....	155
9.3	Example 1: GLM: One-Way Repeated Measures .....	156
9.3.1	Data Entry Format .....	156
9.3.2	Windows Method .....	156
9.3.3	SPSS Syntax Method.....	160
9.3.4	SPSS Output.....	160
9.3.5	Choosing Tests of Significance.....	163
9.3.6	Results and Interpretation.....	164
9.4	Example 2: GLM: Two-Way Repeated Measures (Doubly Multivariate Repeated Measures) .....	165
9.4.1	Data Entry Format .....	165
9.4.2	Windows Method .....	166
9.4.3	SPSS Syntax Method.....	170
9.4.4	SPSS Output.....	170
9.4.5	Results and Interpretation.....	175

9.5	Example 3: GLM: Two-Factor Mixed Design (One Between-Groups Variable and One Within-Subjects Variable).....	177
9.5.1	Data Entry Format .....	178
9.5.2	Windows Method .....	179
9.5.3	SPSS Syntax Method.....	184
9.5.4	SPSS Output.....	184
9.5.5	Results and Interpretation.....	188
	9.5.5.1 Within-Subjects Effects.....	188
	9.5.5.2 Between-Groups Effects.....	190
9.6	Example 4: GLM: Three-Factor Mixed Design (Two Between-Groups Variables and One Within-Subjects Variable).....	191
9.6.1	Data Entry Format .....	192
9.6.2	Windows Method .....	192
9.6.3	SPSS Syntax Method.....	200
9.6.4	SPSS Output.....	201
9.6.5	Results and Interpretation.....	211
	9.6.5.1 Within-Subjects Effects.....	211
	9.6.5.2 Between-Groups Effects.....	217
10.	Correlation .....	219
10.1	Aim.....	219
10.2	Requirements.....	220
10.3	Assumptions.....	220
10.4	Example 1: Pearson Product Moment Correlation Coefficient ..	220
10.4.1	Data Entry Format .....	221
10.4.2	Testing Assumptions.....	221
	10.4.2.1 Windows Method.....	221
	10.4.2.2 SPSS Syntax Method .....	224
	10.4.2.3 Scatterplot.....	224
	10.4.2.4 Interpretation .....	224
10.4.3	Windows Method: Pearson Product Moment Correlation .....	224
10.4.4	SPSS Syntax Method: Pearson Product Moment Correlation .....	227
10.4.5	SPSS Output.....	227
10.4.6	Results and Interpretation.....	227
10.5	Testing Statistical Significance between Two Correlation Coefficients Obtained from Two Samples .....	227
10.6	Example 2: Spearman Rank Order Correlation Coefficient.....	229
10.6.1	Windows Method .....	230
10.6.2	SPSS Syntax Method.....	231
10.6.3	SPSS Output.....	232
10.6.4	Results and Interpretation.....	232

- 11. Linear Regression ..... 233
  - 11.1 Aim..... 233
  - 11.2 Requirements..... 233
  - 11.3 Assumptions..... 234
  - 11.4 Example: Linear Regression ..... 234
    - 11.4.1 Windows Method ..... 234
    - 11.4.2 SPSS Syntax Method..... 236
    - 11.4.3 SPSS Output..... 237
    - 11.4.4 Results and Interpretation..... 237
      - 11.4.4.1 Prediction Equation ..... 237
      - 11.4.4.2 Evaluating the Strength of the Prediction Equation..... 238
      - 11.4.4.3 Identifying an Independent Relationship ..... 238
- 12. Factor Analysis ..... 239
  - 12.1 Aim..... 239
    - 12.1.1 Computation of the Correlation Matrix..... 240
    - 12.1.2 Extraction of Initial Factors ..... 240
      - 12.1.2.1 Method of Extraction ..... 240
      - 12.1.2.2 Determining the Number of Factors to Be Extracted ..... 240
    - 12.1.3 Rotation of Extracted Factors ..... 242
    - 12.1.4 Rotation Methods..... 242
    - 12.1.5 Orthogonal (Varimax) versus Nonorthogonal (Oblique) Rotation..... 243
    - 12.1.6 Number of Factor Analysis Runs ..... 243
    - 12.1.7 Interpreting Factors ..... 244
  - 12.2 Checklist of Requirements..... 244
  - 12.3 Assumptions..... 244
    - 12.3.1 Key Statistical Assumptions ..... 244
    - 12.3.2 Key Conceptual Assumptions ..... 245
  - 12.4 Factor Analysis: Example 1 ..... 245
    - 12.4.1 Data Entry Format ..... 246
    - 12.4.2 Testing Assumptions..... 246
      - 12.4.2.1 Normality ..... 246
      - 12.4.2.2 Sufficient Significant Correlations in Data Matrix..... 247
    - 12.4.3 Windows Method: Factor Analysis (First Run) ..... 247
    - 12.4.4 SPSS Syntax Method: Factor Analysis (First Run) ..... 250
    - 12.4.5 SPSS Output..... 251
    - 12.4.6 Results and Interpretation..... 254
      - 12.4.6.1 Correlation Matrix..... 254
      - 12.4.6.2 Factor Analysis Output ..... 255

12.4.6.3	Determining the Number of Factors Using Velicer's Minimum Average Partial (MAP) Test and Parallel Analysis .....	255
12.4.6.4	Velicer's Minimum Average Partial (MAP) Test ...	256
12.4.6.5	Parallel Analysis .....	259
12.4.7	Windows Method (Second Run) .....	262
12.4.8	SPSS Syntax Method (Second Run) .....	264
12.4.9	SPSS Output .....	264
12.4.10	Results and Interpretation .....	265
12.5	Factor Analysis: Example 2 .....	266
12.5.1	Data Entry Format .....	267
12.5.2	Windows Method: Factor Analysis (First Run) .....	267
12.5.3	SPSS Syntax Method: Factor Analysis (First Run) .....	270
12.5.4	SPSS Output .....	271
12.5.5	Results and Interpretation .....	274
12.5.5.1	Correlation Matrix .....	274
12.5.5.2	Factor Analysis Output .....	275
12.5.5.3	Determining the Number of Factors Using Velicer's Minimum Average Partial (MAP) Test and Parallel Analysis .....	275
12.5.5.4	Velicer's Minimum Average Partial (MAP) Test .....	275
12.5.5.5	Parallel Analysis .....	278
12.5.6	Windows Method (Second Run) .....	281
12.5.7	SPSS Syntax Method (Second Run) .....	283
12.5.8	SPSS Output .....	283
12.5.9	Results and Interpretation .....	286
13.	Reliability .....	287
13.1	Aim .....	287
13.1.1	External Consistency Procedures .....	287
13.1.2	Internal Consistency Procedures .....	287
13.2	Example: Reliability .....	288
13.2.1	Windows Method .....	288
13.2.2	SPSS Syntax Method .....	290
13.2.3	SPSS Output .....	291
13.2.4	Results and Interpretation .....	291
14.	Multiple Regression .....	293
14.1	Aim .....	293
14.2	Multiple Regression Techniques .....	293
14.2.1	Standard Multiple Regression .....	293
14.2.2	Hierarchical Multiple Regression .....	294
14.2.3	Statistical (Stepwise) Regression .....	294

- 14.3 Checklist of Requirements..... 295
- 14.4 Assumptions..... 296
- 14.5 Multicollinearity..... 296
  - 14.5.1 Checking for Multicollinearity ..... 297
- 14.6 Example 1: Prediction Equation and Identification of Independent Relationships (Forward Entry of Predictor Variables) ..... 297
  - 14.6.1 Data Entry Format ..... 298
  - 14.6.2 Windows Method: Computation of Factors ..... 298
  - 14.6.3 Testing Assumptions..... 300
  - 14.6.4 Windows Method: Multiple Regression—Predicting the Level of Responsibility from the Three Defense Strategies of PROVOKE, SELFDEF, and INSANITY ..... 300
  - 14.6.5 SPSS Syntax Method..... 304
  - 14.6.6 SPSS Output..... 304
  - 14.6.7 Results and Interpretation..... 307
    - 14.6.7.1 Testing Assumptions ..... 307
    - 14.6.7.2 Prediction Equation (Predicting the Level Responsibility from the Three Defense Strategies PROVOKE, SELFDEF, and INSANITY)..... 307
    - 14.6.7.3 Evaluating the Strength of the Prediction Equation..... 308
    - 14.6.7.4 Identifying Multicollinearity..... 308
    - 14.6.7.5 Identifying Independent Relationships ..... 308
- 14.7 Example 2: Hierarchical Regression..... 310
  - 14.7.1 Windows Method ..... 311
  - 14.7.2 SPSS Syntax Method..... 313
  - 14.7.3 SPSS Output..... 314
  - 14.7.4 Results and Interpretation..... 315
- 14.8 Example 3: Path Analysis..... 317
  - 14.8.1 Windows Method ..... 318
  - 14.8.2 SPSS Syntax Method..... 321
  - 14.8.3 SPSS Output..... 322
  - 14.8.4 Results and Interpretation..... 325
- 14.9 Example 4: Path Analysis—Test of Significance of the Mediation Hypothesis..... 327
  - 14.9.1 Bootstrapping ..... 328
  - 14.9.2 Steps in Testing the Mediation Hypothesis ..... 329
  - 14.9.3 SPSS Output..... 332
  - 14.9.4 Results and Interpretation..... 332
    - 14.9.4.1 Total Indirect Effect..... 332
    - 14.9.4.2 Specific Indirect Effects ..... 332
    - 14.9.4.3 Pairwise Contrast of Indirect Effects ..... 333

- 15. Multiple Discriminant Analysis ..... 335
  - 15.1 Aim..... 335
  - 15.2 Checklist of Requirements..... 335
  - 15.3 Assumptions..... 336
  - 15.4 Example 1: Two-Group Discriminant Analysis..... 337
    - 15.4.1 Data Entry Format ..... 338
    - 15.4.2 Testing Assumptions..... 338
      - 15.4.2.1 Multivariate Normality ..... 338
      - 15.4.2.2 Linearity ..... 343
      - 15.4.2.3 Univariate Outliers..... 346
      - 15.4.2.4 Multivariate Outliers ..... 350
      - 15.4.2.5 Multicollinearity..... 352
      - 15.4.2.6 Homogeneity of Variance-Covariance Matrices ..... 357
    - 15.4.3 Two-Group Discriminant Analysis..... 357
      - 15.4.3.1 Windows Method..... 357
      - 15.4.3.2 SPSS Syntax Method ..... 359
      - 15.4.3.3 SPSS Output ..... 359
      - 15.4.3.4 Results and Interpretation ..... 362
  - 15.5 Example 2: Three-Group Discriminant Analysis..... 366
    - 15.5.1 Three-Group Discriminant Analysis..... 366
      - 15.5.1.1 Windows Method..... 366
      - 15.5.1.2 SPSS Syntax Method ..... 369
      - 15.5.1.3 SPSS Output ..... 369
      - 15.5.1.4 Results and Interpretation ..... 374
      - 15.5.1.5 Evaluating Group Differences..... 375
      - 15.5.1.6 Windows Method..... 375
      - 15.5.1.7 SPSS Syntax Method ..... 377
- 16. Logistic Regression ..... 383
  - 16.1 Aim..... 383
  - 16.2 Checklist of Requirements..... 384
  - 16.3 Assumptions..... 384
  - 16.4 Example: Two-Group Logistic Regression ..... 384
    - 16.4.1 Windows Method ..... 385
    - 16.4.2 SPSS Syntax Method..... 387
    - 16.4.3 SPSS Output..... 387
    - 16.4.4 Results and Interpretation..... 389
      - 16.4.4.1 Model Estimation ..... 389
      - 16.4.4.2 Assessing Overall Model Fit..... 390
      - 16.4.4.3 Classification Matrix ..... 391
      - 16.4.4.4 Test of Relationships and Strengths among the Variables..... 391
      - 16.4.4.5 Interpreting Odds Ratios ..... 391

16.4.4.6	Predictions on the Basis of Probabilities from Logistic Regression Coefficients.....	392
16.4.4.7	Summary of Probability Findings .....	393
<b>17.</b>	<b>Canonical Correlation Analysis .....</b>	<b>395</b>
17.1	Aim.....	395
17.2	Checklist of Requirements.....	396
17.3	Assumptions.....	396
17.4	Key Terms in Canonical Correlation Analysis .....	397
17.5	An Example of Canonical Correlation Analysis .....	398
17.5.1	Data Entry Format .....	399
17.5.2	Testing Assumptions.....	400
17.5.2.1	Linearity .....	400
17.5.2.2	Multivariate Normality .....	402
17.5.2.3	Homoscedasticity .....	406
17.5.3	Example of Canonical Correlation Analysis.....	413
17.5.3.1	Windows Method.....	413
17.5.3.2	SPSS Syntax Method .....	413
17.5.3.3	SPSS Output.....	414
17.5.3.4	Results and Interpretation .....	416
<b>18.</b>	<b>Structural Equation Modeling.....</b>	<b>421</b>
18.1	What Is Structural Equation Modeling (SEM)? .....	421
18.2	The Role of Theory in SEM.....	423
18.3	The Structural Equation Model .....	423
18.4	Goodness-of-Fit Criteria.....	424
18.4.1	Absolute Fit Measures.....	424
18.4.2	Incremental Fit Measures .....	426
18.4.3	Parsimonious Fit Measures .....	426
18.4.4	Note of Caution in the Use of Incremental Fit Indices as “Rules of Thumb” .....	427
18.5	Model Assessment .....	428
18.6	Improving Model Fit.....	429
18.6.1	Modification Indices.....	429
18.6.2	Correlated Errors .....	429
18.7	Problems with Estimation .....	430
18.8	Checklist of Requirements.....	431
18.8.1	Item Parcels.....	432
18.9	Assumptions.....	433
18.10	Examples of Structural Equation Modeling.....	433
18.11	Example 1: Linear Regression with Observed Variables.....	434
18.11.1	Data Entry Format .....	435
18.11.2	Modeling in AMOS Graphics.....	435
18.11.3	Results and Interpretation .....	437

- 18.11.3.1 Regression Weights, Standardized Regression Weights, and Squared Multiple Correlations..... 438
- 18.12 Example 2: Regression with Unobserved (Latent) Variables ..... 440
  - 18.12.1 Results and Interpretation..... 442
    - 18.12.1.1 Regression Weights, Standardized Regression Weights, and Squared Multiple Correlations..... 443
    - 18.12.1.2 Comparing the Latent-Construct Model (Example 2) with the Observed-Measurement Model (Example 1)..... 445
- 18.13 Example 3: Multi-Model Path Analysis with Latent Variables... 446
  - 18.13.1 Evaluation of the Measurement Model: Confirmatory Factor Analysis (CFA)..... 446
  - 18.13.2 Results and Interpretation..... 448
    - 18.13.2.1 Regression Weights and Standardized Regression Weights..... 449
    - 18.13.2.2 Explained Variances and Residual Variances ..... 450
    - 18.13.2.3 Modification Indices ..... 450
  - 18.13.3 The Modified Model..... 452
  - 18.13.4 Comparing the Original (Default) Model against the Modified Model..... 452
  - 18.13.5 Multi-Model Analysis: Evaluation of the Direct Path Model versus the Indirect Path Model ..... 453
    - 18.13.5.1 Defining the Direct and Indirect Models ..... 456
    - 18.13.5.2 Results and Interpretation..... 458
- 18.14 Example 4: Multi-Group Analysis ..... 463
  - 18.14.1 Multi-Group Confirmatory Factor Analysis ..... 463
    - 18.14.1.1 Conducting Multi-Group Modeling for Males and Females: The Measurement Model ..... 464
    - 18.14.1.2 Results and Interpretation ..... 472
  - 18.14.2 Multi-Group Path Analysis ..... 478
    - 18.14.2.1 Conducting Multi-Group Modeling for Males and Females: The Path Model..... 479
    - 18.14.2.2 Results and Interpretation ..... 490
- 18.15 Example 5: Second-Order Confirmatory Factor (CFA) Analysis..... 499
  - 18.15.1 Results and Interpretation..... 500
    - 18.15.1.1 Regression Weights and Standardized Regression Weights..... 500
    - 18.15.1.2 Explained Variances and Residual Variances ..... 502
    - 18.15.1.3 Modification Indices ..... 502

19. Nonparametric Tests ..... 507

19.1 Aim..... 507

19.2 Chi-Square ( $\chi^2$ ) Test for Single Variable Experiments ..... 508

19.2.1 Assumptions..... 508

19.2.2 Example 1: Equal Expected Frequencies ..... 508

19.2.2.1 Data Entry Format..... 508

19.2.2.2 Windows Method..... 509

19.2.2.3 SPSS Syntax Method ..... 510

19.2.2.4 SPSS Output ..... 510

19.2.2.5 Results and Interpretation ..... 510

19.2.3 Example 2: Unequal Expected Frequencies ..... 510

19.2.3.1 Windows Method..... 511

19.2.3.2 SPSS Syntax Method ..... 512

19.2.3.3 SPSS Output ..... 513

19.2.3.4 Results and Interpretation ..... 513

19.3 Chi-Square ( $\chi^2$ ) Test of Independence between Two Variables .. 513

19.3.1 Assumptions..... 514

19.3.2 Windows Method ..... 514

19.3.3 SPSS Syntax Method..... 516

19.3.4 SPSS Output..... 516

19.3.5 Results and Interpretation..... 517

19.4 Mann-Whitney *U* Test for Two Independent Samples ..... 518

19.4.1 Assumptions..... 518

19.4.2 Data Entry Format ..... 518

19.4.3 Windows Method ..... 519

19.4.4 SPSS Syntax Method..... 520

19.4.5 SPSS Output..... 521

19.4.6 Results and Interpretation..... 521

19.5 Kruskal-Wallis Test for Several Independent Samples..... 521

19.5.1 Assumptions..... 522

19.5.2 Data Entry Format ..... 522

19.5.3 Windows Method ..... 522

19.5.4 SPSS Syntax Method..... 524

19.5.5 SPSS Output..... 524

19.5.6 Results and Interpretation..... 525

19.6 Wilcoxon Signed Rank Test for Two Related Samples..... 525

19.6.1 Assumptions..... 525

19.6.2 Data Entry Format ..... 526

19.6.3 Windows Method ..... 526

19.6.4 SPSS Syntax Method..... 527

19.6.5 SPSS Output..... 527

19.6.6 Results and Interpretation..... 527

19.7 Friedman Test for Several Related Samples ..... 527

19.7.1 Assumption ..... 528

19.7.2 Data Entry Format ..... 528

19.7.3 Windows Method ..... 528

19.7.4 SPSS Syntax Method..... 529

19.7.5 SPSS Output..... 530

19.7.6 Results and Interpretation..... 530

  

**Appendix: Summary of SPSS Syntax Files ..... 531**

**Bibliography..... 543**

**Index ..... 547**
