Preface	ix
1 Introduction	1
2 Empirical Success	15
1 Scientific Success	15
2 Empirical Success and Theoretical Success	16
3 Defining Empirical Success	21
3 Whig Realism	33
1 Introduction	33
2 Scientific Realists and Antirealists	34
3 Kitcher's Recent Defense of Realism	36
4 Discussion of Kitcher's Views	37
5 Whig Realism	38
6 Evidence for Whig Realism	42
7 Methodological Import of Whig Realism	48
4 Decision Vectors	51
1 Decision Vectors and Scientific Rationality	51
2 Survey of Decision Vectors	55
5 Dissent	65
1 Initial Reflections	65
2 Evolutionary Biology after Publication of <i>Origin</i> : An Example of Good Distribution of Research Effort	68
3 Genetics before the Discovery of DNA: An Example of Less Good Distribution of Research Effort	81
4 The Continental Drift Dispute, 1920–1950	86

5	Cancer Virus Research	92
6	The "Invisible Hand of Reason"	95
6	Consensus	97
1	Background	97
2	Initial Reflections	100
3	Consensus on Plate Tectonics	102
4	Consensus on the "Central Dogma"	109
5	Comments	114
7	Social Empiricism	117
1	Statement of <i>Social Empiricism</i>	117
2	Consensus on Plate Tectonics	120
3	Consensus on the "Central Dogma"	122
4	Consensus on the Variability Hypothesis	123
5	Consensus on a Surgical Practice	124
6	Consensus on the Ovulation Theory of Menstruation	126
7	Consensus on the Copenhagen Interpretation of Quantum Mechanics	127
8	Dissolution of Consensus: Cold Fusion	129
9	Dissolution of Consensus: Treatment of Peptic Ulcers	132
10	A More Social Epistemology	134
8	Epistemic Fairness	137
1	Social Empiricism and Naturalized Epistemology	137
2	Standpoint Epistemologies of Science	141
3	Longino's Epistemology of Science	143
4	Social Empiricism and Feminist Philosophy	145
5	Conclusions	148
	Notes	153
	References	163
	Index	171
