

# REVIEWS AND PRAISE FOR TRANSITION ECONOMIES...

The authors have managed to include the entire, very diverse region of Eastern Europe and the CIS [Commonwealth of Independent States] in their analysis. They have done it by using pre-defined categories, but also coming up with their own way of classifying and ranking these countries... The timeliness of their analysis, attempting to classify the transition economies also in terms of how they are coping with the [2008-09 financial] crisis, gives the book extra value.

*Carolyn Ann Kadas, University of Bologna*

The text... combines theory-led reasoning with empirical data in an excellent way. The authors highlight the limits of the Varieties of Capitalism approach in explaining the development trajectories in Eastern Europe and the CIS countries and provide convincing alternative explanations. Their critique of the Washington Consensus policies is well argued and supported by empirical data.

*Joachim Becker, University of Vienna*

The book's strongest feature lies in its political economy approach to transformation in the countries of Central East Europe and the former USSR... Given the highly up-to-date information and statistics that this book provides, I find it to be an equally useful resource for researchers, graduate students and libraries.

*Anca M. Voicu, Rollins College*

Instead of focusing on the 1990s where most of transition took place intensively, the authors take a much longer horizon by linking the transition experience in the 1990s with the most recent developments such as the world financial crisis of 2008. In doing so, the authors provide a highly updated text on economic transition.

*Julan Du, City University of Hong Kong*

## ABOUT THE AUTHORS:

**Martin Myant** is Professor at the University of the West of Scotland, UK. He has written or edited ten books and numerous journal articles on economic and political development in Eastern Europe and other transition countries.

**Jan Drahokoupil** is senior research fellow at the Mannheim Centre for European Social Research (MZES), University of Mannheim. His publications include *Globalization and the State in Central and Eastern Europe* and a number of journal articles on political economy in Eastern Europe, Russia, and Central Asia.
