| <i>Ewa Nowak</i> | |
| Study of socio-economic differences among the communes of Świętokrzyska Land using fuzzy cluster analysis | 189 |
| <i>Aleksander Szwichtenberg</i> | |
| Defects of research methods and statistical data used in tourist geography | 201 |
| <i>Eugeniusz Rydz, Iwona Jażewicz</i> | |
| Application of first-digit statistics to the typology of communes in northern Poland . | 207 |
| <i>Jolanta Grotowska-Leder</i> | |
| Urban space and social deprivation (the case of Łódź) | 215 |
| Part III | |
| Research methods of the space economy and their application | 229 |
| <i>Marek Dutkowski</i> | |
| Remarks on methods of building a region's development strategy | 231 |
| <i>Tomasz Bajerowski</i> | |
| Nonlinear dynamics of change in the land-use pattern | 241 |

Olga Turkowska, Tomasz Bajerowski

Predictability of property markets as a determinant of physical planning 255

Miroslaw Belej

Methodological aspects of research on cadastral systems 263

Jerzy Suchta, Teresa Łaguna, Dariusz Łaguna

Methods of space potential assessment in the designing of multi-functional
development of rural areas 273

Małgorzata Gerus-Gościewska, Tomasz Bajerowski

The four-colour problem and the theory and practice of the selection
of planning functions 283

Dariusz Ilnicki, Tomasz Siłka

Polish space in the context of the new administrative division. 293
