Contents

1 • Introduction 1

Uses of Confirmatory Factor Analysis / 1
Psychometric Evaluation of Test Instruments / 1
Construct Validation / 2
Method Effects / 3
Measurement Invariance Evaluation / 4
Why a Book on CFA? / 5
Coverage of the Book / 6
Other Considerations / 8
Summary / 11

2 • The Common Factor Model and Exploratory Factor Analysis 12

Overview of the Common Factor Model / 12
Procedures of EFA / 20
Factor Extraction / 21
Factor Selection / 23
Factor Rotation / 30
Factor Scores / 36
Summary / 37

3 • Introduction to CFA 40

Similarities and Differences of EFA and CFA / 40
Common Factor Model / 40
Standardized and Unstandardized Solutions / 41
Indicator Cross-Loadings/Model Parsimony / 42
Unique Variances / 46
Model Comparison / 47

Purposes and Advantages of CFA / 49
Parameters of a CFA Model / 53
Fundamental Equations of a CFA Model / 59
CFA Model Identification / 62
Scaling the Latent Variable / 62
Statistical Identification / 63
Guidelines for Model Identification / 71
Estimation of CFA Model Parameters / 72
Illustration / 76
Descriptive Goodness-of-Fit Indices / 81
Absolute Fit / 82
Parsimony Correction / 83
Comparative Fit / 84
Guidelines for Interpreting Goodness-of-Fit Indices / 86
Summary / 88
Appendix 3.1. Communalities, Model-Implied Correlations, and Factor Correlations in EFA and CFA / 90
Appendix 3.2. Obtaining a Solution for a Just-Identified Factor Model / 93
Appendix 3.3. Hand Calculation of F_{ML} for the Figure 3.8 Path Model / 96

4 • Specification and Interpretation of CFA Models 103

An Applied Example of a CFA Measurement Model / 103
Model Specification / 106
Substantive Justification / 106
Defining the Metric of Latent Variables / 106
Data Screening and Selection of the Fitting Function / 107
Running the CFA Analysis / 108
Model Evaluation / 113
Overall Goodness of Fit / 113
Localized Areas of Strain / 114
Residuals / 115
Modification Indices / 119
Unnecessary Parameters / 124
Interpretability, Size, and Statistical Significance of the Parameter Estimates / 126
Interpretation and Calculation of CFA Model Parameter Estimates / 132
CFA Models with Single Indicators / 138
Reporting a CFA Study / 144
Summary / 148
Appendix 4.1. Model Identification Affects the Standard Errors of the Parameter Estimates / 150
Appendix 4.2. Goodness of Model Fit Does Not Ensure Meaningful Parameter Estimates / 153
Appendix 4.3. Example Report of the Two-Factor CFA Model of Neuroticism and Extraversion / 155

5 • CFA Model Revision and Comparison 157

Goals of Model Respecification / 157
Sources of Poor-Fitting CFA Solutions / 159
Number of Factors / 159
Indicators and Factor Loadings / 167
Correlated Errors / 181
Improper Solutions and Nonpositive Definite Matrices / 187
EFA in the CFA Framework / 193
Model Identification Revisited / 202
Equivalent CFA Solutions / 203
Summary / 209

6 • CFA of Multitrait–Multimethod Matrices 212

Correlated versus Random Measurement Error Revisited / 212
The Multitrait–Multimethod Matrix / 213
CFA Approaches to Analyzing the MTMM Matrix / 217
Correlated Methods Models / 218
Correlated Uniqueness Models / 220
Advantages and Disadvantages of Correlated Methods and Correlated Uniqueness Models / 227
Other CFA Parameterizations of MTMM Data / 229
Consequences of Not Modeling Method Variance and Measurement Error / 231
Summary / 233

7 • CFA with Equality Constraints, Multiple Groups, and Mean Structures 236

Overview of Equality Constraints / 237
Equality Constraints within a Single Group / 238
Congeneric, Tau-Equivalent, and Parallel Indicators / 238
Longitudinal Measurement Invariance / 252
CFA in Multiple Groups / 266
Overview of Multiple-Groups Solutions / 266
Multiple-Groups CFA / 268
Selected Issues in Single- and Multiple-Groups CFA Invariance Evaluation / 299
MIMIC Models (CFA with Covariates) / 304
Summary / 316
Appendix 7.1. Reproduction of the Observed Variance–Covariance Matrix with Tau-Equivalent Indicators of Auditory Memory / 318

8 • Other Types of CFA Models: Higher-Order Factor Analysis, Scale Reliability Evaluation, and Formative Indicators 320

Higher-Order Factor Analysis / 320
Second-Order Factor Analysis / 322
Schmid–Leiman Transformation / 334
Scale Reliability Estimation / 337
Point Estimation of Scale Reliability / 337
Standard Error and Interval Estimation of Scale Reliability / 345
Models with Formative Indicators / 351
Summary / 362

9 • Data Issues in CFA: Missing, Non-Normal, and Categorical Data 363

CFA with Missing Data / 363
Mechanisms of Missing Data / 364
Conventional Approaches to Missing Data / 365
Recommended Missing Data Strategies / 367
CFA with Non-Normal or Categorical Data / 378
Non-Normal, Continuous Data / 379
Categorical Data / 387
Other Potential Remedies for Indicator Non-Normality / 404
Summary / 410

10 • Statistical Power and Sample Size 412

Overview / 412
Satorra–Saris Method / 413
Monte Carlo Approach / 420
Summary and Future Directions in CFA / 429
Appendix 10.1. Monte Carlo Simulation in Greater Depth: Data Generation / 434
