|                  |                                                                          |    |
|------------------|--------------------------------------------------------------------------|----|
| <b>Chapter 1</b> | Introduction .....                                                       | 1  |
| 1.1              | Digital Watermarking .....                                               | 1  |
| 1.2              | Digital Steganography.....                                               | 3  |
| 1.3              | Differences between Watermarking and Steganography.....                  | 5  |
| 1.4              | A Brief History.....                                                     | 5  |
|                  | References .....                                                         | 6  |
|                  | Appendix: Selected List of Books on Watermarking and Steganography ..... | 7  |
| <b>Chapter 2</b> | Classification in Digital Watermarking.....                              | 9  |
| 2.1              | Classification Based on Characteristics .....                            | 9  |
| 2.1.1            | Blind versus Nonblind .....                                              | 9  |
| 2.1.2            | Perceptible versus Imperceptible.....                                    | 10 |
| 2.1.3            | Private versus Public .....                                              | 10 |
| 2.1.4            | Robust versus Fragile .....                                              | 10 |
| 2.1.5            | Spatial Domain-Based versus Frequency Domain-Based.....                  | 11 |
| 2.2              | Classification Based on Applications.....                                | 11 |
| 2.2.1            | Copyright Protection Watermarks.....                                     | 12 |
| 2.2.2            | Data Authentication Watermarks .....                                     | 12 |
| 2.2.3            | Fingerprint Watermarks .....                                             | 12 |
| 2.2.4            | Copy Control Watermarks.....                                             | 13 |
| 2.2.5            | Device Control Watermarks .....                                          | 13 |
|                  | References .....                                                         | 14 |
| <b>Chapter 3</b> | Mathematical Preliminaries .....                                         | 15 |
| 3.1              | Least-Significant-Bit Substitution .....                                 | 15 |
| 3.2              | Discrete Fourier Transform (DFT) .....                                   | 15 |
| 3.3              | Discrete Cosine Transform .....                                          | 17 |
| 3.4              | Discrete Wavelet Transform.....                                          | 18 |
| 3.5              | Random Sequence Generation.....                                          | 21 |
| 3.6              | The Chaotic Map.....                                                     | 22 |
| 3.7              | Error Correction Code .....                                              | 25 |
| 3.8              | Set Partitioning in Hierarchical Tree .....                              | 28 |
|                  | References .....                                                         | 31 |
| <b>Chapter 4</b> | Digital Watermarking Fundamentals.....                                   | 33 |
| 4.1              | Spatial-Domain Watermarking .....                                        | 33 |
| 4.1.1            | Substitution Watermarking in the Spatial Domain .....                    | 33 |
| 4.1.2            | Additive Watermarking in the Spatial Domain.....                         | 35 |

|       |                                                           |    |
|-------|-----------------------------------------------------------|----|
| 4.2   | Frequency-Domain Watermarking .....                       | 37 |
| 4.2.1 | Substitution Watermarking in the Frequency Domain .....   | 37 |
| 4.2.2 | Multiplicative Watermarking in the Frequency Domain ..... | 39 |
| 4.2.3 | Watermarking Based on Vector Quantization .....           | 41 |
| 4.2.4 | The Rounding Error Problem .....                          | 41 |
| 4.3   | The Fragile Watermark .....                               | 44 |
| 4.3.1 | The Block-Based Fragile Watermark .....                   | 45 |
| 4.3.2 | Weaknesses of the Block-Based Fragile Watermark .....     | 46 |
| 4.3.3 | The Hierarchical Block-Based Fragile Watermark .....      | 47 |
| 4.4   | The Robust Watermark .....                                | 48 |
| 4.4.1 | The Redundant Embedding Approach .....                    | 49 |
| 4.4.2 | The Spread Spectrum Approach .....                        | 49 |
|       | References .....                                          | 49 |

## Chapter 5 Watermarking Attacks and Tools .....

|       |                                        |    |
|-------|----------------------------------------|----|
| 5.1   | Image Processing Attacks .....         | 51 |
| 5.1.1 | Attacks by Filtering .....             | 51 |
| 5.1.2 | Attack by Remodulation .....           | 53 |
| 5.1.3 | Attack by JPEG Coding Distortion ..... | 54 |
| 5.1.4 | Attack by JPEG 2000 Compression .....  | 54 |
| 5.2   | Geometric Transformation .....         | 55 |
| 5.2.1 | Attack by Image Scaling .....          | 55 |
| 5.2.2 | Attack by Rotation .....               | 56 |
| 5.2.3 | Attack by Image Clipping .....         | 57 |
| 5.2.4 | Attack by Linear Transformation .....  | 58 |
| 5.2.5 | Attack by Bending .....                | 59 |
| 5.2.6 | Attack by Warping .....                | 59 |
| 5.2.7 | Attack by Perspective Projection ..... | 59 |
| 5.2.8 | Attack by Collage .....                | 60 |
| 5.2.9 | Attack by Template .....               | 60 |
| 5.3   | Cryptographic Attack .....             | 61 |
| 5.4   | Protocol Attacks .....                 | 61 |
| 5.5   | Watermarking Tools .....               | 62 |
|       | References .....                       | 62 |

## Chapter 6 Combinational Digital Watermarking in the Spatial and Frequency Domains .....

|     |                                                        |    |
|-----|--------------------------------------------------------|----|
| 6.1 | An Overview of Combinational Watermarking .....        | 66 |
| 6.2 | Watermarking in the Spatial Domain .....               | 67 |
| 6.3 | Watermarking in the Frequency Domain .....             | 68 |
| 6.4 | Experimental Results .....                             | 69 |
| 6.5 | Further Encryption of Combinational Watermarking ..... | 73 |
|     | References .....                                       | 75 |

## Chapter 7 Genetic Algorithm-Based Digital Watermarking .....

|         |                                                                                   |     |
|---------|-----------------------------------------------------------------------------------|-----|
| 7.1     | Introduction to the Genetic Algorithm .....                                       | 77  |
| 7.1.1   | The Chromosome .....                                                              | 78  |
| 7.1.2   | Basic Operations of the Genetic Algorithm .....                                   | 80  |
| 7.1.2.1 | Reproduction .....                                                                | 80  |
| 7.1.2.2 | Crossover .....                                                                   | 80  |
| 7.1.2.3 | Mutation .....                                                                    | 80  |
| 7.1.3   | The Fitness Function .....                                                        | 81  |
| 7.2     | The Concept of Genetic Algorithm-Based Watermarking .....                         | 82  |
| 7.3     | Genetic Algorithm-Based Rounding-Error Correction Watermarking .....              | 83  |
| 7.3.1   | Definitions: Chromosome, Fitness Function, and Genetic Algorithm Operations ..... | 85  |
| 7.3.1.1 | Chromosome .....                                                                  | 85  |
| 7.3.1.2 | Fitness Function .....                                                            | 86  |
| 7.3.1.3 | Reproduction .....                                                                | 87  |
| 7.3.1.4 | Crossover .....                                                                   | 87  |
| 7.3.1.5 | Mutation .....                                                                    | 87  |
| 7.3.2   | The Genetic Algorithm-Based Rounding-Error Correction Algorithm .....             | 88  |
| 7.3.3   | An Advanced Strategy for Initializing the First Population .....                  | 90  |
| 7.4     | An Application for Medical Image Watermarking .....                               | 93  |
| 7.4.1   | An Overview of the Proposed Technique .....                                       | 94  |
| 7.4.1.1 | The Signature Image .....                                                         | 94  |
| 7.4.1.2 | Textual Data .....                                                                | 95  |
| 7.4.2   | The Improved Scheme Based on Genetic Algorithms .....                             | 98  |
| 7.4.3   | Experimental Results .....                                                        | 101 |
|         | References .....                                                                  | 103 |

## Chapter 8 Adjusted-Purpose Digital Watermarking .....

|     |                                                                                          |     |
|-----|------------------------------------------------------------------------------------------|-----|
| 8.1 | An Overview of Adjusted-Purpose Digital Watermarking .....                               | 105 |
| 8.2 | The Morphological Approach for Extracting Pixel-Based Features .....                     | 107 |
| 8.3 | The Strategies for Adjusting the Varying-Sized Transform Window and Quality Factor ..... | 110 |
| 8.4 | Experimental Results .....                                                               | 113 |
| 8.5 | The Collecting Approach for Generating the VSTW .....                                    | 115 |
|     | References .....                                                                         | 119 |

## Chapter 9 Robust High-Capacity Digital Watermarking .....

|       |                                                   |     |
|-------|---------------------------------------------------|-----|
| 9.1   | The Weakness of Current Robust Watermarking ..... | 121 |
| 9.2   | The Concept of Robust Watermarking .....          | 122 |
| 9.3   | Enlargement of Significant Coefficients .....     | 122 |
| 9.3.1 | Breaking the Local Spatial Similarity .....       | 122 |
| 9.3.2 | The Block-Based Chaotic Map .....                 | 122 |

|            |                                                |     |
|------------|------------------------------------------------|-----|
| 9.4        | The Determination of Embedding Locations ..... | 125 |
| 9.4.1      | Intersection-Based Pixels Collection .....     | 125 |
| 9.4.2      | The Reference Register and Container .....     | 125 |
| 9.5        | The RHC Watermarking Algorithm .....           | 127 |
| 9.5.1      | The Embedding Procedure .....                  | 127 |
| 9.5.2      | The Extracting Procedure .....                 | 128 |
| 9.5.3      | The Embedding and Extracting Strategies .....  | 129 |
| 9.5.3.1    | The Embedding Strategy .....                   | 129 |
| 9.5.3.2    | The Extracting Strategy .....                  | 129 |
| 9.6        | Experimental Results .....                     | 130 |
| 9.6.1      | Capacity Enlargement .....                     | 130 |
| 9.6.2      | Robust Experiments .....                       | 130 |
| 9.6.3      | Performance Comparisons .....                  | 134 |
| References | .....                                          | 136 |

## Chapter 10 Introduction to Digital Steganography .....

|            |                                               |     |
|------------|-----------------------------------------------|-----|
| 10.1       | Types of Steganography .....                  | 138 |
| 10.1.1     | Technical Steganography .....                 | 138 |
| 10.1.2     | Linguistic Steganography .....                | 139 |
| 10.1.3     | Digital Steganography .....                   | 139 |
| 10.2       | Applications of Steganography .....           | 140 |
| 10.2.1     | Covert Communication .....                    | 140 |
| 10.2.2     | One-Time Pad Communication .....              | 140 |
| 10.3       | Embedding Security and Imperceptibility ..... | 141 |
| 10.4       | Examples of Steganographic Software .....     | 142 |
| 10.4.1     | S-Tools .....                                 | 142 |
| 10.4.2     | StegoDos .....                                | 142 |
| 10.4.3     | EzStego .....                                 | 142 |
| 10.4.4     | Jsteg-Jpeg .....                              | 143 |
| References | .....                                         | 143 |

## Chapter 11 Steganalysis .....

|            |                                                  |     |
|------------|--------------------------------------------------|-----|
| 11.1       | An Overview .....                                | 145 |
| 11.2       | The Statistical Properties of Images .....       | 146 |
| 11.3       | The Visual Steganalytic System .....             | 147 |
