

CONTENTS

Section One:

BACKGROUND, DEVELOPMENT AND IMPLEMENTATION OF CZECH DIETARY GUIDELINES

Zuzana Brázdová

1. INTRODUCTION	11
BACKGROUND	12
2. FOOD SUPPLY	16
2.1. Methodology: Determining the desired food supply	16
2.2. Results: Desired food supply	17
2.3. Comments on the desired food supply	20
3. FOOD GROUPS	21
3.1. Methodology: Defining food groups	21
3.2. Results: Food groups	22
3.3. Comments on the food groups	23
4. UNIT SERVINGS	24
4.1. Methodology: Determining unit servings within food groups	24
4.1.1. Methodology: Determining average serving sizes	24
4.1.2. Methodology: Determining typical serving sizes	24
4.1.3. Methodology: Establishing the concept of serving sizes and units	24
4.2. Results: Unit servings within food groups	24
4.2.1. Results: Average serving sizes established by weighing	24
4.2.2. Results: Typical serving sizes according to FFQ-ZuBr 95-D1	25
4.2.3. Results: Concepts of serving sizes and units	25
4.3. Comments on the unit servings	28
5. FOOD FREQUENCY	29
5.1. Methodology: Determining the usual frequency of food groups (dietary habits)	29
5.1.1. Methodology: Qualitative frequency method	29
5.1.2. Methodology: Semiquantitative frequency method	29
5.2. Results: Results of the studies examining the usual food group frequency (dietary habits)	30
5.2.1. Results of the qualitative food frequency study	30
5.2.2. Results of the semiquantitative food frequency method	47
5.3. Comments on food frequency	62
6. NUTRITIONAL PROFILES	62
6.1. Methodology: Calculation of nutritional profiles within food groups	62
6.1.1. Methodology: Calculation of simple nutritional profiles	62
6.1.2. Methodology: Calculation of nutritional profiles from typical servings	62
6.1.3. Methodology: Calculation of nutritional profiles from the food basket	63
6.2. Results: Nutritional profiles within food groups	63
6.2.1. Results: Simple nutritional profiles	63
6.2.2. Results: Nutritional profiles by typical servings	77
6.2.3. Results: Nutritional profiles from the food basket	83
6.3. Comments on the nutritional profiles	86

7. NUMBER OF UNIT SERVINGS	89
7.1. Methodology: Determining the number of unit servings of the different food groups within the whole day	89
7.2. Results: The number of unit servings of the different food groups and nutritive values of graded guidelines	89
7.3. Comments on the unit servings	102
8. VERBAL FORMULATION	102
9. GRAPHIC FORM OF GUIDELINES	104
9.1. Methodology of the study of preferences regarding the graphic form and the shape of guidelines	104
9.2. Results of the study of preferences regarding the graphic form and the shape of guidelines	104
9.3. Comments on the graphic form of the guidelines	107
10. EXAMPLE OF IMPLEMENTATION OF DIETARY GUIDELINES IN DEFINED POPULATION GROUPS	107
10.1. The „5-a-day“ project	107
10.1.1. Methodology of the „5-a-day“ project	107
10.1.2. Results of the „5-a-day“ project	108
10.1.3. Conclusion of the „5-a-day“ project	108
10.2. The „Elixir M“ project	108
10.2.1. Methodology of the „Elixir M“ project	109
10.2.2. Results of the „Elixir M“ project	109
10.2.3. Conclusion of the „Elixir M“ project	110
10.3. The „Food Guide Pyramid“ project	110
10.3.1. Methodology of the „Food Guide Pyramid“ project	110
10.3.2. Results of the „Food Guide Pyramid“ project	111
10.3.3. Conclusion of the „Food Guide Pyramid“ project	111
11. COMMENTS AND CONCLUSION	112
11.1. Dietary guidelines and the Czech population at the beginning of the 21st century	112
11.2. Methods of practical implementation of the dietary guidelines	115
11.3. Strategy of dietary guidelines implementation	115

APPENDIX	124

Section Two:

THE METHOD OF INFORMING AND MOTIVATING PREVENTIVE EXAMINATION

Jindřich Fiala

12. PRICIPLE OF THE METHOD OF INFORMING AND MOTIVATING PREVENTIVE EXAMINATION	139
13. PROCEDURAL SCHEME OF EXAMINATION METHODS AND COMPUTERISED RISK ASSESSMENT	142
13.1. Questionnaire part	142
13.1.1. Dietary habits	142
13.1.2. Alcohol consumption	157
13.1.3. Smoking	160

13.1.4. Physical activity	162
13.1.5. Psychosocial stress	168
13.1.6. Family history - hereditary predispositions	177
13.1.7. Breast cancer risk score	179
13.2. Clinical part	183
13.2.1. Nutritional anthropometry	183
13.2.2. Blood pressure	197
13.2.3. Biochemical blood examination	201
13.2.4. Fitness testing - bicycle ergometry	205
13.2.5. Respiratory functions - basic spirometry	208
14. RESULTS OF INTERVENTION PROJECTS	211
14.1. Know and improve your health - symbiosis of preventive project and preventive medicine education at the medical faculty	211
14.1.2. Results	213
14.1.3. Discussion and conclusions	220
14.2. Preventive examination and advice on healthy lifestyle for future teachers	222
14.2.1. Target population group and methods	222
14.2.2. Results	225
14.2.3. Discussion and conclusions	238
15. CONCLUSIONS	239
