P r e f a c e	1
Introductory lecture	
LYNCH J.M.: Development and interaction between microbial communities on the root surface	5
I. SYMBIOTIC MICROORGANISMS AND PLANTS	13
<u>a. R h i z o b i a</u>	
MISHUSTIN E.N., BONARTSEVA, G.A., MYSHKINA V.L.: Criteria of root-nodule bacteria activity	15
ANTIPCHUK A.F., KANTSELYARUK R.M., RANGELOVA V.N., SKOCHINSKAYA N.N., TANTSYURENKO E.V.: New additional criteria for estimation of grain legume-rhizobial symbiosis effectivity	23
BONARTSEVA G.A., MYSHKINA V.L.: Nitrogen-fixation in pure cultures of root-nodule bacteria	29
VOLKOVA T.N., CHERNOVA N.I.: Effects of rhizobia, host plant and environmental factors on the efficiency of the legume-Rhizobium symbiosis	37
SIMAROV B.V., NOVIKOVA N.N., SHARYPOVA L.A., PROVOROV N.A., ARONSHTAM A.A., KUCHKO V.V.: Molecular-genetic basis for Rhizobium selection	45
NAŠINEC V., CHLOUPEK O.: Preliminary results of a breeding program for improving symbiotic nitrogen fixation in alfalfa	51
COOPER J.E.: Nodulation of legumes by rhizobia in acid soils	57
NOVÁK K.: Induction of phytoalexin in pea roots by rhizobia	63
<u>b. M y c o r r h i z a l f u n g i</u>	67
GIANINAZZI-PEARSON V.: Vesicular-arbuscular endomycorrhizae as determinants for plant growth and survival	69
CUDLÍN P., MEJSTŘÍK V.: Ecological prospects of utilization of ectomycorrhizal symbiosis in forestry	77
SCHÖNBECK F., DEHNE H.-W.: VA-mycorrhiza and plant health	83
GIANINAZZI S.: Cellular relationships between plants and VA endomycorrhizal fungi	93
SUNG S.S., XU D.P., MUSTARDY L., KORMANIK P.P., BLACK C.C.: Pyrophosphate dependent sugar metabolism in mycorrhizal tree roots	99
HRŠELOVÁ H., VEJSADOVÁ H., PŘIKRYL Z., VÁCHOVÁ J., VANČURA V., VÍT A.: Effect of inoculation with vesicular-arbuscular mycorrhizal fungi on growth of strawberries	109

VEJSADOVÁ H., HRŠELOVÁ H., PŘIKRYL Z., VANČURA V.: Inter-relationships between vesicular-arbuscular mycorrhizal fungi, <u>Bradyrhizobium japonicum</u> and soybean plants	115
SCHENCK N.C., SIQUEIRA J.O., OLIVEIRA E.: Changes in the incidence of VA mycorrhizal fungi with changes in eco-systems	125
LIPPMANN G., KEGLER G., WITTER B.: Relationship between phosphorus fertility of arable soils and VAM infection in different crop plants	131
OTTO G.: The appearance of endotrophic mycorrhiza in apple seedlings from soils previously cropped with fruit trees	137
FERRER R.L., PŘIKRYL Z., GRYNDLER M., VANČURA V.: Natural occurrence of vesicular-arbuscular fungi in grape vine and apple trees	141
VOSÁTKA M.: VA mycorrhiza in stands of two hardwood species on sites disturbed by SO ₂ emissions and on strip-mine spoil banks in Northern Bohemia	149
KORMANIK P.P.: Importance of first-order lateral roots in the early development of forest tree seedlings	157
PÉREZ Y., SCHENCK N.C.: The international culture collection of VA mycorrhizal fungi (INVAM)	171
KROPÁČEK K., CUDLÍN P.: Preparation of granulated mycorrhizal inoculum and its use in forest nurseries	177
II. ASSOCIATIVE MICROORGANISMS OF THE ROOT SYSTEM	183
VANČURA V.: Inoculation of plants with <u>Pseudomonas putida</u>	185
BURNS R.G., ALSTRÖM S., BURTON C.C., DARTNALL A.M.: Cyano-genic microbes and phosphatase enzymes in the rhizosphere: properties and prospects for manipulation	191
SOBIESZCZAŃSKI J., STEPNIEWICZ R., KRZYŠKO T.: <u>Pseudomonas</u> sp. as producer of plant growth regulators	201
CHRISTENSEN H.: Specific growth rate determination of rhizosphere bacteria: evaluation of root-colonizing ability based on the tritiated-thymidine method	207
STRZELCZYK E., POKOJSKA A., KAMPERT M., MICHALSKI L., KOWALSKI S.: Production of plant growth regulators by non-mycorrhizal fungi associated with the roots of forest trees	213
PEREBITYUK A.N., PUCHKO V.N.: Survival and distribution of bacterial population in the rhizosphere of inoculated plants	223
DÖBEREINER J.: Recent advances in associations of diazotrophs with plant roots	229
HÖFLICH G.: The use of rhizosphere microorganisms for stimulating N ₂ fixation and plant growth	243
RUPPEL S.: Isolation and characterization of dinitrogen-fixing bacteria from the rhizosphere of <u>Triticum aestivum</u> and <u>Ammophila arenaria</u>	253
REDKINA T.V., MISHUSTIN E.N.: Nitrogen-fixing microorganisms of the genus <u>Azospirillum</u> and their relations with higher plants	263
KALININSKAYA T.A., KRAVCHENKO I.K., MILLER Y.M.: Assimilation of nitrogen fixed by soil diazotrophs by rice plants	269

KOZHEMYAKOV A.P.: Quantitative estimation of nitrogen fixation by barley associative bacteria using tracer technique	273
KRAVCHENKO L.V., MAKAROVA N.M.: Use of root exometabolites by associative nitrogen-fixing microorganisms	277
KALININSKAYA T.A.: The influence of different forms of combined nitrogen on nitrogen-fixing activity of azo-spirilla in the rhizosphere of rice plants	283
JANDERA A., HANZLÍKOVÁ A., ŠOTOLOVÁ I.: Ecological function of enzymes in the rhizosphere	287
HANZLÍKOVÁ A., ŠOTOLOVÁ I., JANDERA A.: Chitinase in the rhizosphere and on plant roots	293
ŠOTOLOVÁ I., JANDERA A., HANZLÍKOVÁ A.: β -1,3-glucanase in the rhizosphere and on plant roots	301
TESAŘOVÁ M., ŠIMEK M.: Rhizosphere microflora of managed grasslands	307
LASÍK J., VANČURA V., HANZLÍKOVÁ A., WURST M.: Polysaccharide compounds in the rhizosphere	315
ANDREYUK E.I., IUTINSKAYA G.A.: Soil microorganisms and transformation of bacterial polysaccharides in soil	323
KUNC F., RYBÁŘOVÁ J.: Degradation of 1- ¹⁴ C-2,4-dichlorophenoxyacetic acid in artificial rhizosphere soil	329
SATO K.: Effect of the herbicide, Benthocarb (Thiobencarb) on seasonal changes in microbial populations in paddy soil and yield of rice plants	335
BALICKA N., TEICHERT E., WEGRZYN T.: Effect of industrial pollution on the microorganisms from barley and field pea rhizosphere	343
SIDORENKO O.D.: Role of sulphate-reducing bacteria in rhizosphere of rice and flooded soil in rice fields	349
III. SOIL-BORNE PHYTOPATHOGENIC MICROORGANISMS	355
BOCHOW H.: Possibilities of protecting plant roots against phytopathogens by biological means (biological control)	357
RUTHERFORD E., EPTON H.A.S., BENTON R.A.: Improvement of propagation by use of fungicides	371
ČATSKÁ V., SMRŽ J.: Relationships between soil mites and microorganisms in apple seedling rhizosphere	377
VESELÝ D.: The effectiveness <u>in vitro</u> of <u>Pythium oligandrum</u> Drechsler mycoparasite against <u>Phoma exigua</u> Desm. var. <u>foveata</u> inciting the gangrene in potato tubers	383
STEINBRENNER K.: Detrimental effects of <u>Gaeumannomyces graminis</u>	389
THINGGAARD K.: Biological control of root pathogenic fungi by <u>Trichoderma</u>	395
DUŠKOVÁ E., PROKINOVÁ E.: Interaction between growing substrate composition and <u>Fusarium</u> wilt of carnation	403
PIETR S.J., KEMPA R.: Cucumber rhizosphere pseudomonads as antagonists of <u>Fusarium</u>	411
NOVÁK K., STANĚK M.: Production of phytoalexin in pea roots	419

IV. BIOLOGICAL PREPARATIONS STIMULATING GROWTH AND IMPROVING HEALTH CONDITIONS OF PLANTS	425
HANCOCK J.G., WEINHOLD A.R., VANGUNDY S.D., SCHROTH M.N.: Introduced microbes enhance root health and plant growth	427
KHOTYANOVICH A.V.: Microbial formulations used in plant production in the USSR	439
VESELÝ D.: Biological control of damping-off pathogens by treating sugar-beet seed with a powdery preparation of the mycoparasite <u>Pythium oligandrum</u> in large-scale field trials	445
BAKONDI-ZÁMORY É., KÖVES-PÉCHY K., SOÓS T., SZEGI J.: N-fixa- tion with the use of Bactoleg preparation under different ecological conditions	451
DOMÉY S., LIPPMANN G.: Stimulation of plant growth by phosphate solubilizing bacteria	457
ČATSKÁ V.: Biological control of phytotoxic and phyto- pathogenic microorganisms in the plant rhizosphere	463
VRANÝ J., DOBIÁŠ K., FIKER A.: Yields of potatoes and their contamination by fusaria after inoculation with bacteria and fungi in field experiments	469
BERGMANN H.: Effect of natural amines and lipid components on yield and stress resistance of crops	475
INDEX OF ORGANISMS	481
SUBJECT INDEX	487
