Abstract	4
Abstrakt	5
About Author	6
1. Introduction	8
1.1 Alkali activated materials – why yes and why no	8
1.2 Terminology	9
1.3 Activators	10
1.4 Cementing components	10
1.5 Hydration and microstructure of alkali activated materials	11
1.6 Hybrid systems	13
1.7 Admixtures	14
1.8 Some special properties of AAM	15
1.9 Testing procedures	16
2. Experimental part	17
2.1 Optimisation of activator composition and dosage	17
2.2 Frost resistance of AAC	23
2.3 Shrinkage reduction	26
3. Modification of AAC	30
3.1 Use of wash water	30
3.2 Use of powder from recycled concrete	32
3.3 Use of cement kiln dust	34
4. Some applications of AAC	36
4.1 Self-compacting AAC	36
4.2 Vibropressed AAC	42
4.3 Hybrid cements	44
5. Conclusions	47
List of presented papers	48
