

Contents

1	Introduction	5
2	Literature review	6
2.1	Composite materials	6
2.2	Failure of laminated composites	6
2.3	Failure theories	6
2.3.1	Lamina failure	6
2.3.2	Delamination	7
2.4	Defects in composite materials	7
2.4.1	Types of defects	7
2.4.2	Effects of defects in composites	8
2.5	Composite materials testing and characterization	8
2.5.1	Building block approach	8
2.5.2	Delamination testing	9
2.6	FEA methods for delamination analysis	12
2.7	Summary	12
3	Thesis aims and objectives	12
3.1	Delamination at a bi-material interface	12
3.2	Research aims	13
3.3	Objectives	13
4	Experimental investigation	13
4.1	Specimen description and test setup	13
4.2	Automated crack length measurement	15
4.2.1	Image acquisition	15
4.2.2	Image processing	16
4.2.3	Algorithm to find a crack tip	16
5	Analytical investigation	18
5.1	Beam theory	18
5.2	Mode Partitioning	19
5.3	Compliance and effective crack length	20
6	Results	22
6.1	DCB	22
6.2	ADCB	23
6.3	ELS	23
6.4	Summary	24
7	Discussion	26
8	Conclusion	26
	Author's Curriculum vitae	29
	Abstract	31
