

Contents

Chapter 1	The Scope of Food Microbiology	1
1.1	Micro-organisms and Food	2
1.1.1	Food Spoilage/Preservation	2
1.1.2	Food Safety	4
1.1.3	Fermentation	4
1.2	Microbiological Quality Assurance	5
Chapter 2	Micro-organisms and Food Materials	6
2.1	Diversity of Habitat	6
2.2	Micro-organisms in the Atmosphere	7
2.2.1	Airborne Bacteria	8
2.2.2	Airborne Fungi	10
2.3	Micro-organisms of Soil	14
2.4	Micro-organisms of Water	15
2.5	Micro-organisms of Plants	17
2.6	Micro-organisms of Animal Origin	20
2.6.1	The Skin	20
2.6.2	The Nose and Throat	21
2.7	Conclusions	21
Chapter 3	Factors Affecting the Growth and Survival of Micro-organisms in Foods	23
3.1	Microbial Growth	23
3.2	Intrinsic Factors (Substrate Limitations)	27

Food Microbiology: 4th Edition

By Martin R. Adams, Maurice O. Moss and Peter J. McClure

© Martin R. Adams, Maurice O. Moss and Peter J. McClure, 2016

Published by the Royal Society of Chemistry, www.rsc.org

3.2.1	Nutrient Content	27
3.2.2	pH and Buffering Capacity	28
3.2.3	Redox Potential, E_h	31
3.2.4	Antimicrobial Barriers and Constituents	36
3.2.5	Water Activity	40
3.3	Extrinsic Factors (Environmental Limitations)	50
3.3.1	Relative Humidity	50
3.3.2	Temperature	51
3.3.3	Gaseous Atmosphere	54
3.4	Implicit Factors	55
3.5	Predictive Food Microbiology	58
Chapter 4	The Microbiology of Food Preservation	70
4.1	Heat Processing	70
4.1.1	Pasteurization and Commercial Sterilization (Appertization)	70
4.1.2	Quantifying the Thermal Death of Micro-organisms: D and z Values	73
4.1.3	Heat Sensitivity of Micro-organisms	75
4.1.4	Describing a Heat Process	80
4.1.5	Spoilage of Canned Foods	85
4.1.6	Aseptic Packaging	88
4.2	Irradiation	89
4.2.1	Microwave Radiation	90
4.2.2	UV Radiation	91
4.2.3	Ionizing Radiation	94
4.3	High-pressure Processing – Pascalization	99
4.4	Low-temperature Storage – Chilling and Freezing	102
4.4.1	Chill Storage	103
4.4.2	Freezing	105
4.5	Chemical Preservatives	108
4.5.1	Organic Acids and Esters	109
4.5.2	Nitrite	113
4.5.3	Sulfur Dioxide	116
4.5.4	Natamycin	117
4.5.5	'Natural' Food Preservatives	117
4.6	Modification of Atmosphere	118
4.7	Control of Water Activity	122
4.8	Compartmentalization	126
Chapter 5	Microbiology of Primary Food Commodities	130
5.1	What is Spoilage?	130

5.2	Milk	132
5.2.1	Composition	132
5.2.2	Microflora of Raw Milk	134
5.2.3	Heat Treatment of Milk	138
5.2.4	Milk Products	141
5.3	Meat	143
5.3.1	Structure and Composition	143
5.3.2	The Microbiology of Primary Processing	145
5.3.3	Spoilage of Fresh Meat	148
5.4	Fish	152
5.4.1	Structure and Composition	152
5.4.2	The Microbiology of Primary Processing	153
5.4.3	Crustaceans and Molluscs	154
5.4.4	Spoilage of Fresh Fish	155
5.5	Plant Products	159
5.5.1	Cereals	160
5.5.2	Preservation of High-moisture Cereals	162
5.5.3	Pulses, Nuts and Oilseeds	163
5.5.4	Fruits and Fruit Products	165
5.5.5	Vegetables and Vegetable Products	167
Chapter 6	Food Microbiology and Public Health	172
6.1	Food Hazards	172
6.2	Significance of Foodborne Disease	174
6.3	Incidence of Foodborne Illness	180
6.4	Risk Factors Associated with Foodborne Illness	185
6.5	The Changing Scene and Emerging Pathogens	187
6.6	The Site of Foodborne Illness. The Alimentary Tract: Its Function and Microflora	190
6.7	The Pathogenesis of Diarrhoeal Disease	194
Chapter 7	Bacterial Agents of Foodborne Illness	200
7.1	<i>Aeromonas hydrophila</i>	200
7.1.1	Introduction	200
7.1.2	The Organism and its Characteristics	201
7.1.3	Pathogenesis and Clinical Features	202
7.1.4	Isolation and Identification	202
7.1.5	Association with Foods	203
7.2	<i>Bacillus cereus</i> and Other <i>Bacillus</i> Species	203
7.2.1	Introduction	203
7.2.2	The Organism and its Characteristics	204

7.2.3	Pathogenesis and Clinical Features	205
7.2.4	Isolation and Identification	206
7.2.5	Association with Foods	208
7.3	<i>Brucella</i>	210
7.3.1	Introduction	210
7.3.2	The Organism and its Characteristics	210
7.3.3	Pathogenesis and Clinical Features	210
7.3.4	Isolation and Identification	211
7.3.5	Association with Foods	211
7.4	<i>Campylobacter</i>	211
7.4.1	Introduction	211
7.4.2	The Organism and its Characteristics	212
7.4.3	Pathogenesis and Clinical Features	214
7.4.4	Isolation and Identification	215
7.4.5	Association with Foods	216
7.5	<i>Clostridium botulinum</i>	219
7.5.1	Introduction	219
7.5.2	The Organism and its Characteristics	220
7.5.3	Pathogenesis and Clinical Features	223
7.5.4	Isolation and Identification	226
7.5.5	Association with Foods	228
7.6	<i>Clostridium perfringens</i>	231
7.6.1	Introduction	231
7.6.2	The Organism and its Characteristics	233
7.6.3	Pathogenesis and Clinical Features	234
7.6.4	Isolation and Identification	235
7.6.5	Association with Foods	236
7.7	<i>Cronobacter</i> Species	238
7.7.1	Introduction	238
7.7.2	The Organism and its Characteristics	238
7.7.3	Pathogenesis and Clinical Features	239
7.7.4	Isolation and Identification	239
7.7.5	Association with Foods	239
7.8	<i>Escherichia coli</i>	240
7.8.1	Introduction	240
7.8.2	The Organism and its Characteristics	243
7.8.3	Pathogenesis and Clinical Features	244
7.8.4	Isolation and Identification	248
7.8.5	Association with Foods	249
7.9	<i>Listeria monocytogenes</i>	251
7.9.1	Introduction	251
7.9.2	The Organism and its Characteristics	253

7.9.3	Pathogenesis and Clinical Features	254
7.9.4	Isolation and Identification	256
7.9.5	Association with Foods	257
7.10	<i>Mycobacterium</i> Species	259
7.10.1	Introduction	259
7.10.2	The Organism and its Characteristics	260
7.10.3	Pathogenesis and Clinical Features	260
7.10.4	Isolation and Identification	261
7.10.5	Association with Foods	261
7.11	<i>Plesiomonas shigelloides</i>	262
7.11.1	Introduction	262
7.11.2	The Organism and its Characteristics	263
7.11.3	Pathogenesis and Clinical Features	263
7.11.4	Isolation and Identification	263
7.11.5	Association with Foods	263
7.12	<i>Salmonella</i>	264
7.12.1	Introduction	264
7.12.2	The Organism and its Characteristics	266
7.12.3	Pathogenesis and Clinical Features	267
7.12.4	Isolation and Identification	271
7.12.5	Association with Foods	274
7.13	<i>Shigella</i>	280
7.13.1	Introduction	280
7.13.2	The Organism and its Characteristics	281
7.13.3	Pathogenesis and Clinical Features	281
7.13.4	Isolation and Identification	282
7.13.5	Association with Foods	282
7.14	<i>Staphylococcus aureus</i>	283
7.14.1	Introduction	283
7.14.2	The Organism and its Characteristics	284
7.14.3	Pathogenesis and Clinical Features	286
7.14.4	Isolation and Identification	287
7.14.5	Association with Foods	288
7.15	<i>Vibrio</i>	289
7.15.1	Introduction	289
7.15.2	The Organisms and their Characteristics	291
7.15.3	Pathogenesis and Clinical Features	292
7.15.4	Isolation and Identification	294
7.15.5	Association with Foods	295
7.16	<i>Yersinia enterocolitica</i>	295
7.16.1	Introduction	295
7.16.2	The Organism and its Characteristics	296

7.16.3	Pathogenesis and Clinical Features	298
7.16.4	Isolation and Identification	299
7.16.5	Association with Foods	300
7.17	Scombrototoxic Fish Poisoning	301
7.18	Conclusion	302
Chapter 8	Non-bacterial Agents of Foodborne Illness	303
8.1	Helminths and Nematodes	303
8.1.1	Platyhelminths: Liver Flukes and Tapeworms	303
8.1.2	Roundworms	306
8.2	Protozoa	308
8.2.1	<i>Giardia lamblia</i>	308
8.2.2	<i>Entamoeba histolytica</i>	309
8.2.3	Sporozoid Protozoa	309
8.3	Toxigenic Algae	311
8.3.1	Dinoflagellate Toxins	311
8.3.2	Cyanobacterial Toxins	313
8.3.3	Toxic Diatoms	313
8.4	Toxigenic Fungi	313
8.4.1	Mycotoxins and Mycophagy	315
8.4.2	Mycotoxins of <i>Aspergillus</i>	316
8.4.3	Mycotoxins of <i>Penicillium</i>	325
8.4.4	Mycotoxins of <i>Fusarium</i>	326
8.4.5	Mycotoxins of Other Fungi	332
8.5	Foodborne Viruses	335
8.5.1	Polio	336
8.5.2	Hepatitis A and E	338
8.5.3	Gastroenteritis Viruses	338
8.5.4	Sources of Food Contamination	340
8.5.5	Control	342
8.6	Spongiform Encephalopathies	343
Chapter 9	Fermented and Microbial Foods	347
9.1	Introduction	347
9.2	Yeasts	349
9.3	Lactic Acid Bacteria	352
9.4	Activities of Lactic Acid Bacteria in Foods	355
9.4.1	Antimicrobial Activity of Lactic Acid Bacteria	355
9.4.2	Health-promoting Effects of Lactic Acid Bacteria-Probiotics	357
9.4.3	The Malo-lactic Fermentation	361

9.5	Fermented Milks	361
9.5.1	Yoghurt	361
9.5.2	Other Fermented Milks	365
9.6	Cheese	369
9.7	Fermented Plant Products	376
9.7.1	Sauerkraut and Kimchi	376
9.7.2	Olives	380
9.7.3	Cucumbers	381
9.7.4	Fermented Legumes	383
9.8	Fermented Meats	383
9.9	Fermented Fish	387
9.10	Beer	389
9.11	Vinegar	397
9.12	Mould Fermentations	405
9.12.1	Tempeh	405
9.12.2	Soy Sauce and Rice Wine	408
9.12.3	Mycoprotein	412
9.13	Conclusion	412

Chapter 10 Methods for the Microbiological Examination of Foods

413

10.1	Microbiological Quality and Indicator Organisms	413
10.2	Direct Examination	416
10.3	Cultural Techniques	418
10.4	Enumeration Methods	421
10.4.1	Plate Counts	421
10.4.2	Most Probable Number Counts	425
10.5	Alternative Methods	426
10.5.1	Chemical Analysis	427
10.5.2	Dye-reduction Tests	428
10.5.3	Electrical Methods	428
10.5.4	ATP Determination	432
10.6	Rapid Methods for the Detection of Specific Organisms and Toxins	434
10.6.1	Immunological Methods	434
10.6.2	DNA/RNA Methodology	436
10.6.3	Subtyping	440
10.7	Quality Assurance of Laboratory Performance	442
10.7.1	Use of Validated Methods	442
10.7.2	Laboratory Accreditation	444

Chapter 11 Controlling the Microbiological Quality of Foods	447
11.1 Quality and Criteria	447
11.2 Sampling Schemes	450
11.2.1 Two-class Attributes Plans	450
11.2.2 Three-class Attributes Plans	455
11.2.3 Choosing a Plan Stringency	457
11.2.4 Variables Acceptance Sampling	459
11.3 Quality Control Using Microbiological Criteria	462
11.4 Control at Source	463
11.4.1 Training	463
11.4.2 Facilities and Operations	465
11.4.3 Equipment	468
11.4.4 Cleaning and Disinfection	471
11.5 Codes of Good Manufacturing Practice	479
11.6 The Hazard Analysis and Critical Control Point (HACCP) Concept	480
11.6.1 Hazard Analysis	483
11.6.2 Identification of Critical Control Points (CCPs)	483
11.6.3 Establishment of CCP Critical Limits	484
11.6.4 Monitoring Procedures for CCPs	486
11.6.5 Protocols for CCP Deviations	486
11.6.6 Verification	486
11.6.7 Record Keeping	487
11.6.8 Review HACCP Plan	489
11.7 Quality Systems: BS 5750 and ISO 9000 Series	489
11.8 Risk Analysis	491
Chapter 12 Further Reading	497
Information Sources on the Internet	497
Subject Index	506
