

Contents

1	Introduction	5
1.1	Goals and objectives	5
1.2	Artificial neural networks	6
1.2.1	ANN training	7
1.2.2	ANN structure	8
1.2.3	Transfer functions	8
1.3	Small-sample simulation	9
2	Inverse reliability analysis	11
2.1	Problem definition	12
2.1.1	Reliability problem formulation	12
2.1.2	Inverse reliability problem formulation	13
2.2	ANN based inverse reliability method	14
2.3	Example – a timber beam design	15
2.4	Summary	17
3	Damage detection	18
3.1	ANN-based damage detection	19
3.2	Study of modal properties	20
3.2.1	A cantilever beam – numerical study	20
3.2.2	Cantilever beam – experimental study	23
3.3	Example of damage detection – cantilever beam	24
3.4	Summary	27
4	Material parameter identification	28
4.1	Laboratory test	28
4.2	Inverse analysis	29
4.3	Example – standard concrete mixture	31
4.4	Summary	32
5	Software	33
5.1	DLNNET	34
5.2	IRel	35
5.3	FraMePID-3PB	36
	Conclusion and future work	37
